

Where productivity software runs in 2026

Which of 1555 tools have a web app, desktop apps for Mac, Windows and Linux, and phone apps, by category.

61%

of the 1555 tools can be used in a web browser.

58%

list an iPhone or iPad app.

48%

list an Android app.

19%

list a Linux app, the least served of the six platforms.

8%

run on all six: web, Mac, Windows, Linux, iPhone and Android.

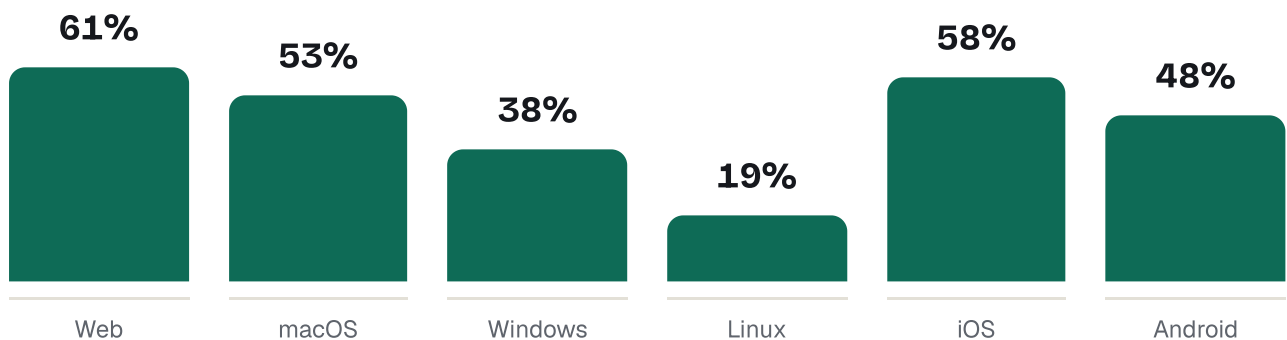

Counted from 1555 listings, each read from the vendor's own pages up to Oct 9, 2026.

01

Phones are better served than desktops

58% of the tools list an iPhone or iPad app and 48% an Android app, against 53% for the Mac and 38% for Windows. 61% can be used in a browser, which is how most of the rest reach a desktop.

Only 117 tools, 8%, list all six platforms.

02

Linux depends on the category

19% of the tools list a Linux app, but the share runs from 65% in Team Communication to 0% in Forms & Surveys. It is highest in Team Communication, Browsers and File Storage & Sync, where open-source and self-hosted tools are common.

How this was counted

- A platform counts when the vendor's own site or store listing shows an app for it. A web app used in a phone's browser is not counted as a phone app.
- A listing that leaves a platform out means the vendor's pages did not mention it when they were read.
- Browser extensions are recorded on the listings but are not a column here.

These figures describe the 1555 tools listed on ToolGPA, not every product on the market. They are counted again whenever a listing changes; this is the October 2026 edition. You may quote them with a link to [this report](#).
