## Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

### Keep it

To replace 34SP you would be making servers kept running, patched and backed up for you. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 94 of the 122 other web hosts grade higher. It costs $159.98 a year.

**What you could not**

- ✕ Servers kept running, patched and backed up for you.
- ✕ A builder that other people can use without writing code.

- ✕ It plugs into other products, WordPress, Weebly and Magento among them.

**What this rests on.** 34SP's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
