GPA, above 64 of the 178 other AI agents we grade

Abacus AI Agent (the DeepAgent product from Abacus.AI) is a general-purpose agent that takes a written request and builds apps, websites, documents and presentations, or carries out agentic tasks against connected systems. It is sold as part of the ChatLLM subscription, which also bundles access to many third-party language, image and video models.

To get you started, here are **8 things to know about Abacus AI DeepAgent**, taken from its own pages and our grades.

1 **Best for a general agent for apps and slides**

Abacus AI's agent turns a written request into apps, documents and slide decks, and is sold inside the ChatLLM subscription at $10 or $20 a month.

2 **Paid plans start at $10 a month**

As its pricing page puts it: $10 per month, after a first month at $7.

3 **It runs on Web**

Web.

4 **Apps from a prompt**

The agent builds full-stack web apps and mobile apps from a text description, with hosting and a database listed on the product page.

5 **Documents and slide decks**

6 **Agent swarms**

Example tasks run several agents in parallel, such as reviewing recent pull requests or researching many companies at once, then merging the results.

That is against the other AI agents we grade, on value, the free plan, features, ease of use and platforms.

Who Abacus AI DeepAgent is for

- ✓ Fits if you want one subscription covering an agent plus several image and language models
- ✓ Works for people who want first drafts of slide decks and small apps from a prompt

Who it is not for

- ✗ Skip it if you want to try before paying, since there is no free plan or trial
- ✗ Tight if you pick Basic: 3 agent conversations a month, with unrestricted use only on Pro
- ✗ Not for you if you want to know what a credit buys, because the page does not say
- ✗ Watch out: the $7 first month applies to Basic only, then it renews at $10

Good to know

Good for

- ✓ Non-programmers who want a working app or site from a description
- ✓ People who want one subscription covering several AI models and an agent
- ✓ Teams trying parallel multi-agent tasks such as code review or research

Worth knowing

- ⓘ Both plans run on monthly credits (20,000 on Basic, 30,000 on Pro); the pricing page does not say what a credit buys.
- ⓘ Basic allows 3 AI Agent conversations a month; unrestricted agent use needs Pro at $20.
- ⓘ The $7 first month applies to Basic only; the page does not state a free plan or a standard free trial.
- ⓘ The pages read list no standalone iOS or Android app for the agent, so it is recorded as web only.
