07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Accounting Seed's own pages, its app-store listings and our grades. Every fact in it is on Accounting Seed's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 12 of the 127 other accounting and invoicing tools we grade

Accounting Seed is accounting software that runs inside Salesforce, so financial records sit beside CRM data without syncing. It covers the general ledger, receivables and payables, billing, bank reconciliation, project accounting, multi-entity and multi-currency books, and AI agents for collections and bill pay. Prices are given only on request.

To get you started, here are **7 things to know about Accounting Seed**, taken from its own pages and our grades.

> "
>
> **No prices are published, and it only works if you have a Salesforce org.**
>
> From our report card of Accounting Seed

1 **Best for companies that already run on Salesforce**

Accounting Seed is a cloud accounting ledger that runs natively inside Salesforce, with multi-entity, project accounting and inventory.

2 **It runs on Web**

Web.

3 **Salesforce-native ledger**

All accounting data stays inside Salesforce, which the vendor says removes the need to sync it with a CRM.

4 **Receivables and payables automation**

AR automation runs invoice generation through collection, and AP automation covers invoice capture, approvals and payments.

5 **Multi-entity and multi-currency**

Handles several legal entities with consolidation and transactions in multiple currencies with automatic exchange rates.

6 **A 1.8 GPA, above 12 of 127**

That is against the other accounting and invoicing tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Accounting Seed you would be making live feeds from your bank, which take an agreement with each bank or a service that has them. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for companies that already run on Salesforce

Accounting Seed is a cloud accounting ledger that runs natively inside Salesforce, with multi-entity, project accounting and inventory. No prices are published, and it only works if you have a Salesforce org.

TOOLGPA REPORT CARD

Accounting Seed

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published; the pricing page is a quote form, so it sits in the middle by default.
Free plan and trial	F	No free plan or trial; the page is a form to request a quote and book a demo.
Features	B	A full ledger with receivables, payables, multi-entity, multi-currency, project accounting and inventory covers the whole job, though only inside Salesforce.
Ease of use	C	Set up inside a Salesforce org, sold through the vendor and partners, and no store rating is on record.
Platforms and integrations	C	Web only, inside Salesforce, and Salesforce is the only listed integration.

Grade point average — Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Accounting Seed is for

- ✓ Fits if your finance team already works in Salesforce and wants the ledger there
- ✓ Makes sense if you need multi-entity or project accounting alongside your CRM

Who it is not for

- ✗ Not for you if you have no Salesforce org, as it runs only inside Salesforce
- ✗ Tight if you want a price up front, as none is published
- ✗ Watch out: the AI agents are listed without plan or price details
- ✗ Skip it if you want to try it yourself, as there is no trial, only a demo

Good to know

Good for

- ✓ Companies that already run their business on Salesforce
- ✓ Professional services, nonprofit and construction firms listed by the vendor
- ✓ Finance teams that need multi-entity consolidation

Worth knowing

- ⓘ No prices are published; the pricing page is a form to request a quote and book a demo.
- ⓘ It runs only inside Salesforce, so it needs a Salesforce org.
- ⓘ Sold through the vendor and partners, with a dedicated customer success manager mentioned.
- ⓘ The AI agents are listed on the site without plan or price details.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Accounting Seed's current pricing could not be confirmed from its own site.

> **No price is published; the pricing page is a quote form, so it sits in the middle by default.**
>
> From our grade for value for money

We could not confirm Accounting Seed's current prices from its own site, so this guide lists no plans. accountingseed.com has them.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Cloud accounting built natively on Salesforce. Here is what it does, as its own site describes it, and what it covers: AI features, invoicing, reports, bookkeeping, bill pay, inventory.

> **Web only, inside Salesforce, and Salesforce is the only listed integration.**

From our grade for platforms and integrations

Salesforce-native ledger

All accounting data stays inside Salesforce, which the vendor says removes the need to sync it with a CRM.

Receivables and payables automation

AR automation runs invoice generation through collection, and AP automation covers invoice capture, approvals and payments.

Multi-entity and multi-currency

Handles several legal entities with consolidation and transactions in multiple currencies with automatic exchange rates.

Project accounting and inventory

Tracks revenue, expenses and time by project, and manages orders and inventory levels.

AI agents and MCP connector

A collections agent, bill pay agent and general ledger agent are listed, along with an MCP connector for outside AI tools.

Cash and accrual books

Multi-book accounting lets a company keep cash basis, accrual basis or both.

Where it runs

Web

What it works with

Salesforce

Accounting Seed is made by Accounting Seed.

Where it stands

Its grades against its category, and whether to keep it or make your own

12/127

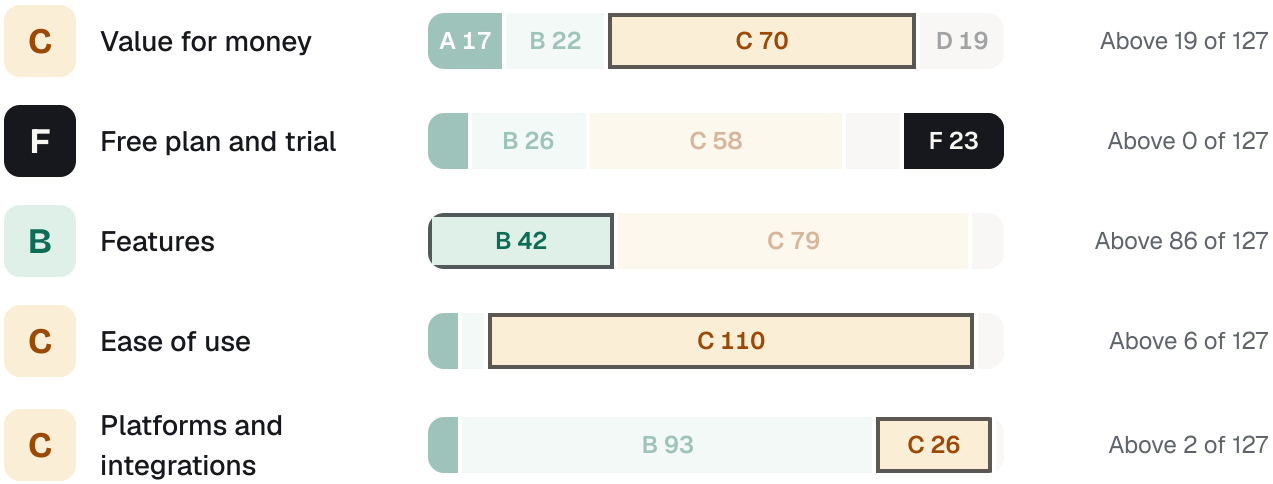

Other accounting and invoicing tools it is graded above

Accounting Seed's GPA of 1.8 is higher than 12 of the 127 other accounting and invoicing tools we grade, and level with 9.

It stands best on features (B, above 86 of 127) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 128 accounting and invoicing tools we grade, cut by the letter each got. Accounting Seed's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Accounting Seed you would be making live feeds from your bank, which take an agreement with each bank or a service that has them. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 106 of the 127 other accounting and invoicing tools grade higher.

What you could make

- Invoicing, reports and inventory: an app builder makes these well.

What you could not

- Live feeds from your bank, which take an agreement with each bank or a service that has them.
- Money moved between bank accounts, which takes a licensed payments partner.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Accounting Seed's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

NetSuite, Acumatica, Odoo, Xero and QuickBooks Online

The 5 tools Accounting Seed is most often weighed against, with where each one differs from it.

1.8 GPA

NetSuite

Paid

Cloud ERP suite with financials, CRM and ecommerce from Oracle.

- Accounting Seed also covers invoicing and bill pay.

Accounting Seed and NetSuite compared in full

1.8 GPA

Acumatica

Paid

Cloud ERP with financials, priced by modules not seats.

- Accounting Seed also covers invoicing and bill pay.
- Acumatica also covers no-code and dashboards.

Accounting Seed and Acumatica compared in full

3.2
GPA

Odoo

Free plan · from $31.10/mo

Business app suite whose Accounting app is free when used on its own.

- Odoo has a free plan. Accounting Seed does not.
- Only Odoo lists iOS and Android apps.
- Odoo is open source and self-hostable, according to its own site.

Accounting Seed and Odoo compared in full

2.6
GPA

Xero

Free trial · from $27/mo

Cloud accounting for small businesses, with unlimited users.

- Only Xero lists iOS and Android apps.
- Accounting Seed also covers bill pay and inventory.
- Xero also covers expense tracking and payroll.

Accounting Seed and Xero compared in full

2.4
GPA

QuickBooks Online

Free plan · from $38/mo

Cloud accounting from Intuit, from a free plan to 25-user Advanced.

- QuickBooks Online has a free plan. Accounting Seed does not.
- Only QuickBooks Online lists iOS and Android apps.
- Accounting Seed also covers bill pay and inventory.
