Image Enhancer upscales and restores photos, Video Enhancer upscales and denoises video, and Image Matting removes or replaces backgrounds. The vendor says processing runs locally and sells lifetime licenses.

Where it stands

Its grades against its category, and whether to keep it or make your own

132/168

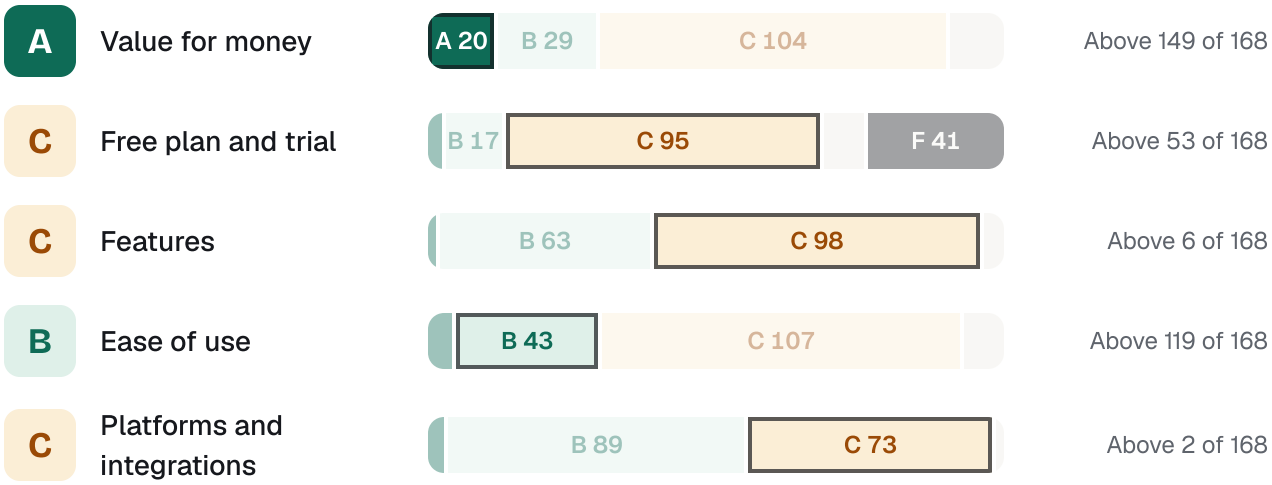

Other AI image and video generators it is graded above

Aiarty's GPA of 2.6 is higher than 132 of the 168 other AI image and video generators we grade, and level with 14.

It stands best on value for money (A, above 149 of 168) and worst on platforms and integrations (C, above 2).

Each grade against the category

Every bar is all 169 AI image and video generators we grade, cut by the letter each got. Aiarty's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Aiarty you would be making a video editor. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.6 is higher than 132 of the 168 other AI image and video generators we grade. It costs $75, paid once.

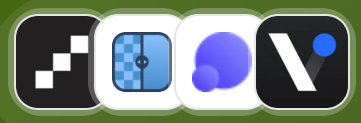

What you could not

- ✕ A video editor.
- ✕ A real app for macOS and Windows. Something home-made would be a web page.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Aiarty's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
