# Welcome

What it is, who it suits, its grades and the ten things to know first

**2.2**

GPA, above 9 of the 42 other spreadsheet and database tools we grade

AITable is a spreadsheet-style visual database with kanban, gantt, calendar and gallery views, forms, dashboards, automation and an API. Paid plans are priced per space with unlimited seats on the team tiers, and a self-hosted option is listed on the pricing page.

To get you started, here are **9 things to know about AITable**, taken from its own pages and our grades.

**1** **Best for a database with views, automation and AI**

AITable is a visual database with kanban and gantt views, automation and AI agents, and its higher plans have unlimited seats.

**2** **Paid plans start at $18 a month**

As its pricing page puts it: $18 per month for 2 seats (billing basis not shown).

**3** **There is a free plan**

2 seats, 20 file nodes, 100 records per datasheet, 250 records per space, 1 GB attachments.

**4** **It runs on Web**

Web.

**5** **Multiple views**

Grid data can be shown as gallery, kanban, architecture, gantt and calendar views, with limits on gantt and calendar views by plan.

**6** **Forms and dashboards**

Forms collect records and dashboards with widgets summarize them; counts rise with each plan.

**7** **Automation and app connections**

The homepage says it connects to 6,000+ apps through Zapier, Make, Pabbly and Activepieces.

**8** **A 2.2 GPA, above 9 of 42**

That is against the other spreadsheet and database tools we grade, on value, the free plan, features, ease of use and platforms.

**9** **Keep it**

To replace AITable you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

PART 04 · STANDING

# Where it stands

Its grades against its category, and whether to keep it or make your own

**9**/42

Other spreadsheet and database tools it is graded above

AITable's GPA of 2.2 is higher than 9 of the 42 other spreadsheet and database tools we grade, and level with 5.

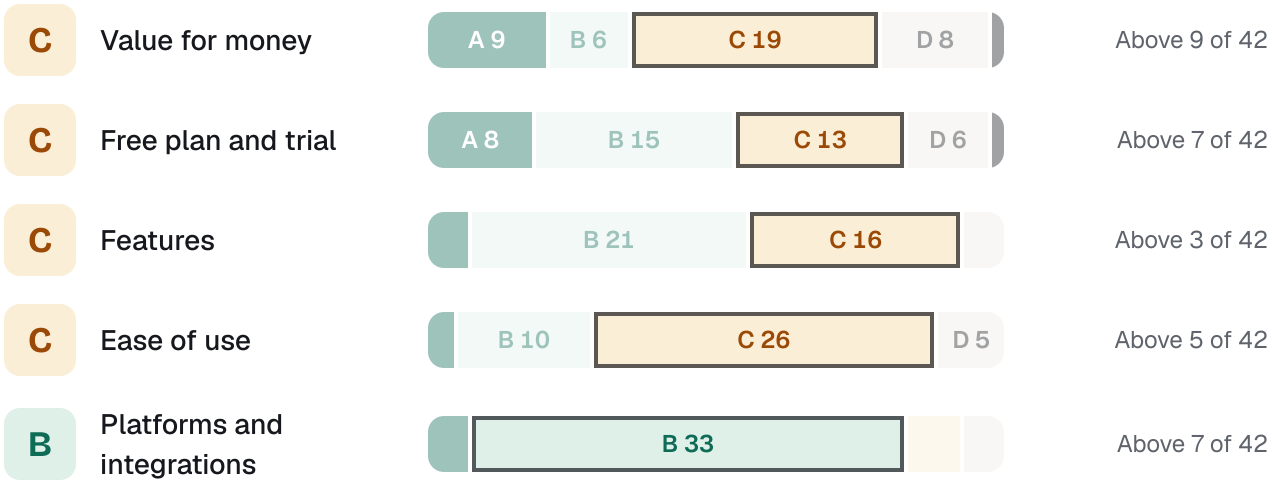

It stands best on platforms and integrations (B, above 7 of 42) and worst on features (C, above 3).

Its paid plans start at $18 a month, against a middle price of $11.38 for the category: 23 of the 35 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 19 tools score higher and cost less.

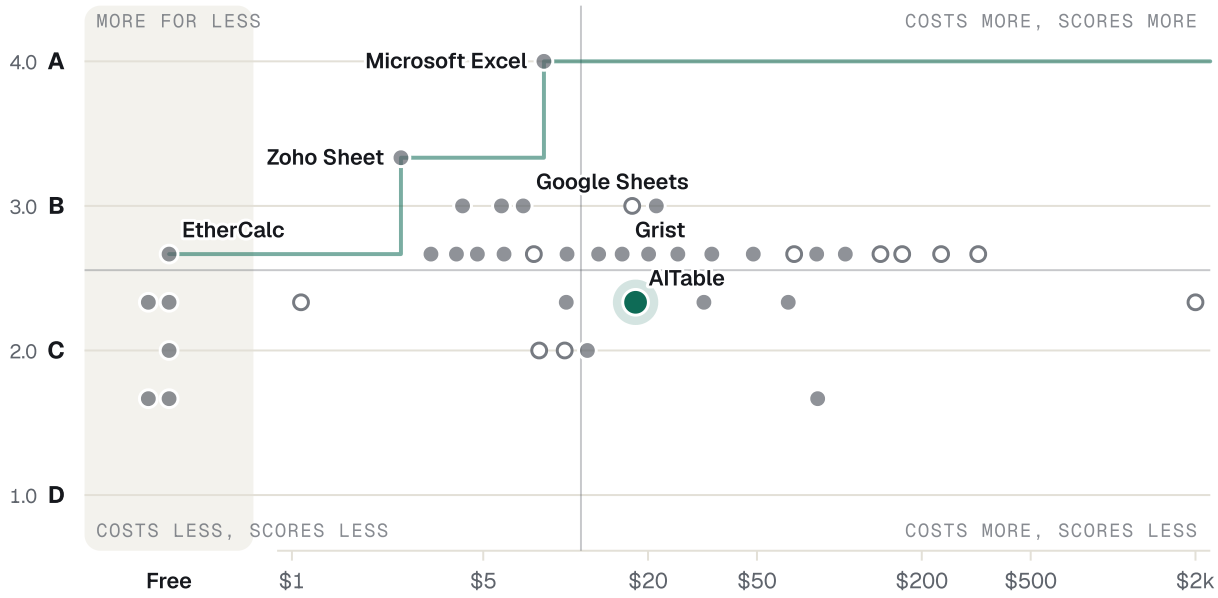

## Each grade against the category

Every bar is all 43 spreadsheet and database tools we grade, cut by the letter each got. AITable's own letter is outlined.

# Price against what you get

Each dot is one of 42 spreadsheet and database tools. Further left costs less; higher up scores better on features, ease of use and platforms. AITable is the marked dot.

What paid plans start at, a month (each step along is roughly double)

# Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

## Keep it

To replace AITable you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 28 of the 42 other spreadsheet and database tools grade higher. It costs $216 a year.

### What you could make

- Kanban boards: an app builder makes this well.

### What you could not

- A builder that other people can use without writing code.

- Connections to other products, each kept working as those products change.
- Databases with views, filters and links between them.
- AI features, unless you pay a model provider for each request yourself.
- Hooks into the device itself: widgets.

**What this rests on.** AITable's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
