Where it stands

Its grades against its category, and whether to keep it or make your own

12/127

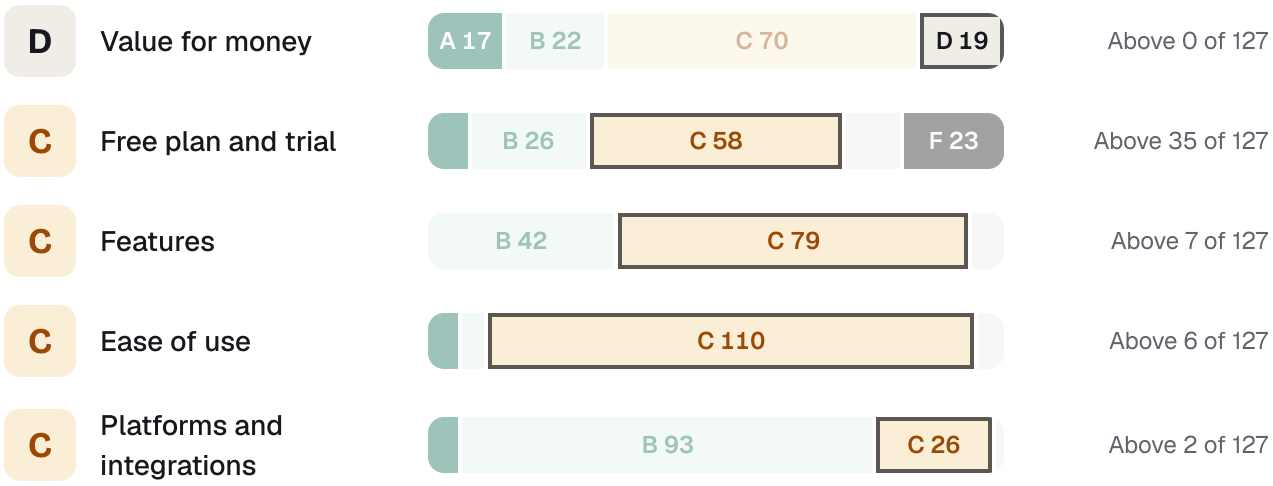

Other accounting and invoicing tools it is graded above

Alegra's GPA of 1.8 is higher than 12 of the 127 other accounting and invoicing tools we grade, and level with 9.

It stands best on free plan and trial (C, above 35 of 127) and worst on value for money (D, above 0).

Each grade against the category

Every bar is all 128 accounting and invoicing tools we grade, cut by the letter each got. Alegra's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Alegra you would be making live feeds from your bank, which take an agreement with each bank or a service that has them. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 106 of the 127 other accounting and invoicing tools grade higher.

What you could make

- Invoicing, inventory and reports: an app builder makes these well.

What you could not

- Live feeds from your bank, which take an agreement with each bank or a service that has them.
- An API that other software can build on.

What this rests on. Alegra's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
