To get you started, here are **8 things to know about Amberscript**, taken from its own pages and our grades.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

3/68

Other AI meeting note takers it is graded above

Amberscript's GPA of 2.0 is higher than 3 of the 68 other AI meeting note takers we grade, and level with 4.

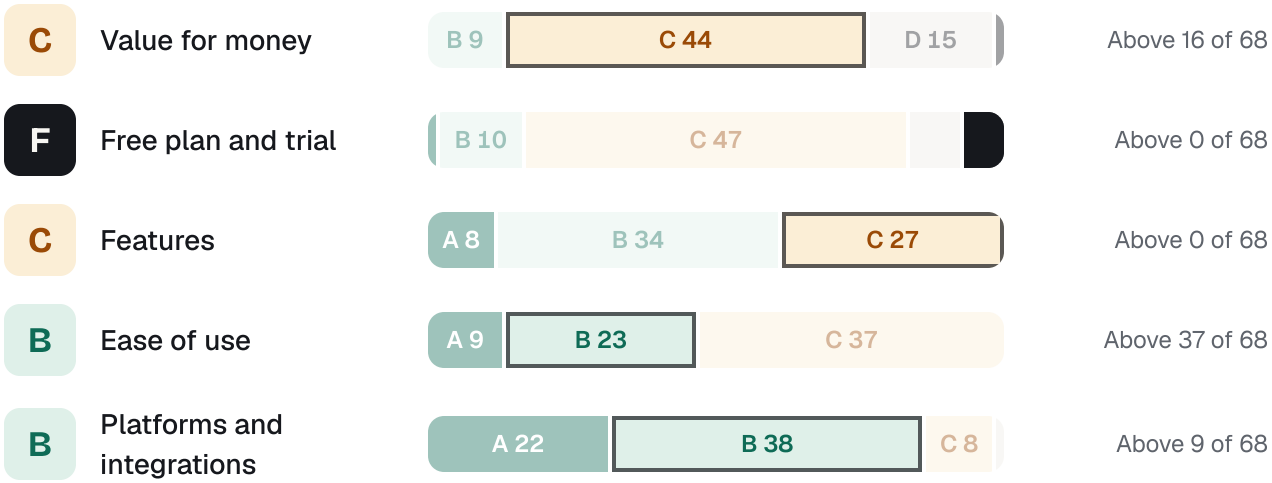

It stands best on ease of use (B, above 37 of 68) and worst on free plan and trial (F, above 0).

Its paid plans start at about $21.23 a month, against a middle price of $11.99 for the category: 54 of the 62 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 26 tools score higher and cost less.

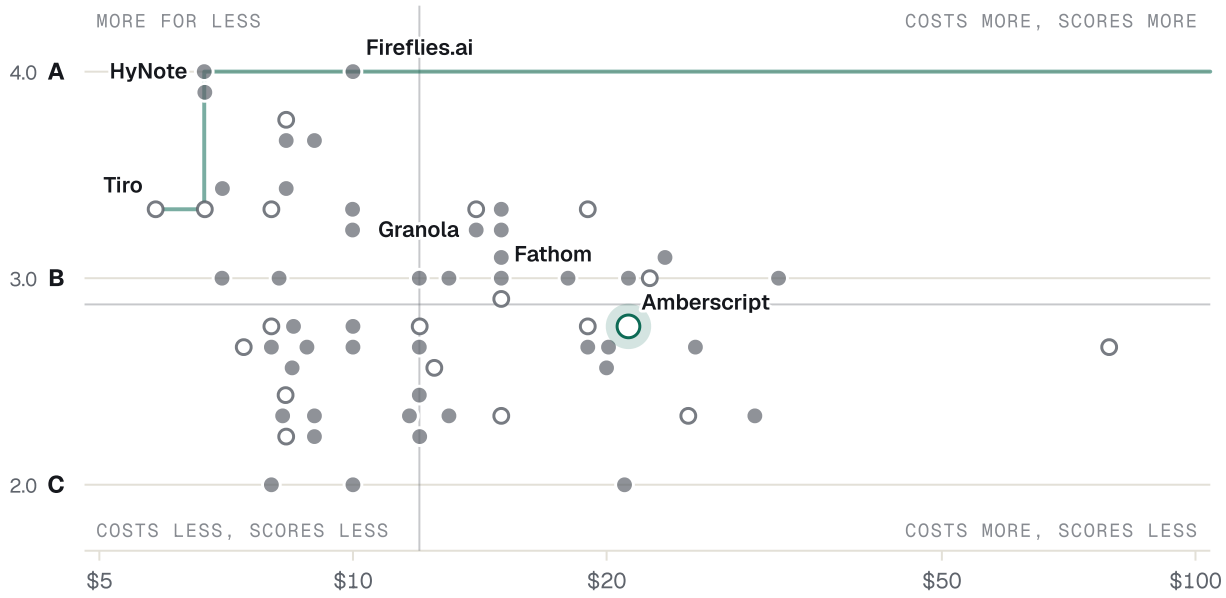

Each grade against the category

Every bar is all 69 AI meeting note takers we grade, cut by the letter each got. Amberscript's own letter is outlined.

Price against what you get

Each dot is one of 63 AI meeting note takers. Further left costs less; higher up scores better on features, ease of use and platforms. Amberscript is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Amberscript you would be making a bot that joins your calls and turns the talk into notes. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 61 of the 68 other AI meeting note takers grade higher. It costs $254.72 a year.

What you could not

- ✕ A bot that joins your calls and turns the talk into notes.
- ✕ Speech turned into text you can trust.

- ✕ It plugs into other products, Zoom, Microsoft Teams and Google Meet among them, and has an API.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Amberscript's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
