Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 55 of the 77 other business phone systems we grade

Anveo is a hosted phone service for small businesses and individuals, with a drag-and-drop IVR call flow builder, extensions, voicemail, call queues, online fax and conference calling. It also sells phone numbers, SMS and wholesale voice termination, and it works with your own SIP phones.

To get you started, here are **9 things to know about Anveo**, taken from its own pages and our grades.

1 **Best for a hosted phone system with a visual call flow**

Calls, numbers and SMS are billed separately, and attended transfers and call parking are add-ons.

2 **Paid plans start at $6.55 a month**

As its pricing page puts it: $6.55 per month, billed annually ($7.85 billed monthly).

3 **There is a free plan**

Free package with 2 users or SIP accounts, a 10-item IVR call flow and voicemail to email.

4 **It runs on Web**

Web.

5 **Visual call flow builder**

A drag-and-drop builder for inbound and outbound IVR menus and auto attendants, free on every package, with the flow size capped by plan.

6 **PBX features on every plan**

Unlimited extensions and voicemail boxes, call queues, call transfers, conference calling, voicemail to email and the ability to use your own SIP device.

7 **Fax and call campaigns**

Online fax with fax to email, plus call campaigns, voice broadcast and outbound IVR, are listed for all packages.

8 **A 2.4 GPA, above 55 of 77**

That is against the other business phone systems we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Anveo you would be making phone numbers and calls carried over the phone network. That is not a weekend's work, with an AI app builder or without one.

Who Anveo is for

- ✓ Fits if you need a small phone setup for 2 to 6 people and want a drawn call flow
- ✓ Works for people who want to pay for minutes as they use them

What this rests on. Anveo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
