Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 54 of the 134 other automation tools we grade

APIANT, now at apiant.ai, builds integrations from a plain-language request: an AI assistant or your own MCP-capable AI client drafts, tests and runs the automation. Plans are priced by connected apps, monthly tasks, assistant credits and run-history retention rather than by seat. A managed tier has APIANT build and run integrations for you.

>
> **You build integrations and connect accounts.**
>
> From our grade for ease of use

To get you started, here are **9 things to know about Apiant**, taken from its own pages and our grades.

1 **Best for app integrations priced by connections**

APIANT connects apps and now points to a newer apiant.ai site.

2 **Paid plans start at $29 a month**

As its pricing page puts it: $29 per month, billed yearly ($45 billed monthly).

3 **There is a free plan**

2 connections, 1,500 tasks a month, 5 form submissions and 7 days of run history, plus 500 one-time credits.

4 **It runs on Web**

Web.

5 **Ask for an integration**

Describe the apps and what should happen; the AI agent writes a spec, builds the automation, tests scenarios and runs it after approval.

6 **Works from your AI client**

Any client that supports a remote MCP server, including Claude Code, can build and test automations on every plan, free included.

7 **Plan-wide engine**

Every plan includes unlimited steps per automation, real-time triggers, two-way sync, subroutines and scenario testing.

8 **A 2.2 GPA, above 54 of 134**

That is against the other automation tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Apiant you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

Grade point average — Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Apiant is for

- ✓ Fits if you want connections priced by usage rather than seats
- ✓ Works for small setups that stay under 2 connections on Free

Who it is not for

- ✕ Tight if you need more than 2 connections or 7 days of run history on Free
- ✕ Pricey if usage grows, because connections, tasks and credits move you up a tier
- ✕ Watch out: credit packs cost $25 for 500 or $80 for 2,000 and expire after six months
- ✕ Watch out: apiant.com now points to apiant.ai, and the old pricing page redirects

Good to know

Good for

- ✓ Teams that want an AI agent to build and run integrations
- ✓ Developers who prefer driving automation from an MCP-capable AI client

Worth knowing

- ⓘ Prices follow connections, tasks and credits, not seats, so heavy usage moves you up a tier.
- ⓘ Credit packs, available on Pro and above, are $25 for 500 or $80 for 2,000 and last six months.
- ⓘ The Managed plan lists 5 hours of consulting on the first build and 2 hours a month after, with more at $250 an hour.
- ⓘ apiant.com now points to the newer apiant.ai site.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

54/134

Other automation tools it is graded above

Apiant's GPA of 2.2 is higher than 54 of the 134 other automation tools we grade, and level with 35.

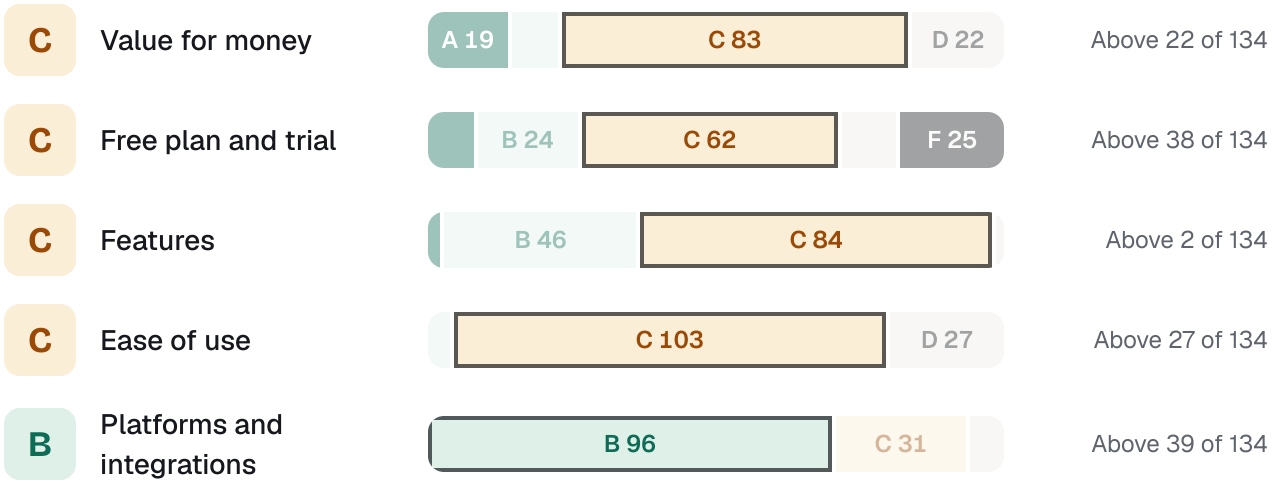

It stands best on platforms and integrations (B, above 39 of 134) and worst on features (C, above 2).

Its paid plans start at $29 a month, against a middle price of $22.17 for the category: 39 of the 65 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 15 tools score higher and cost less.

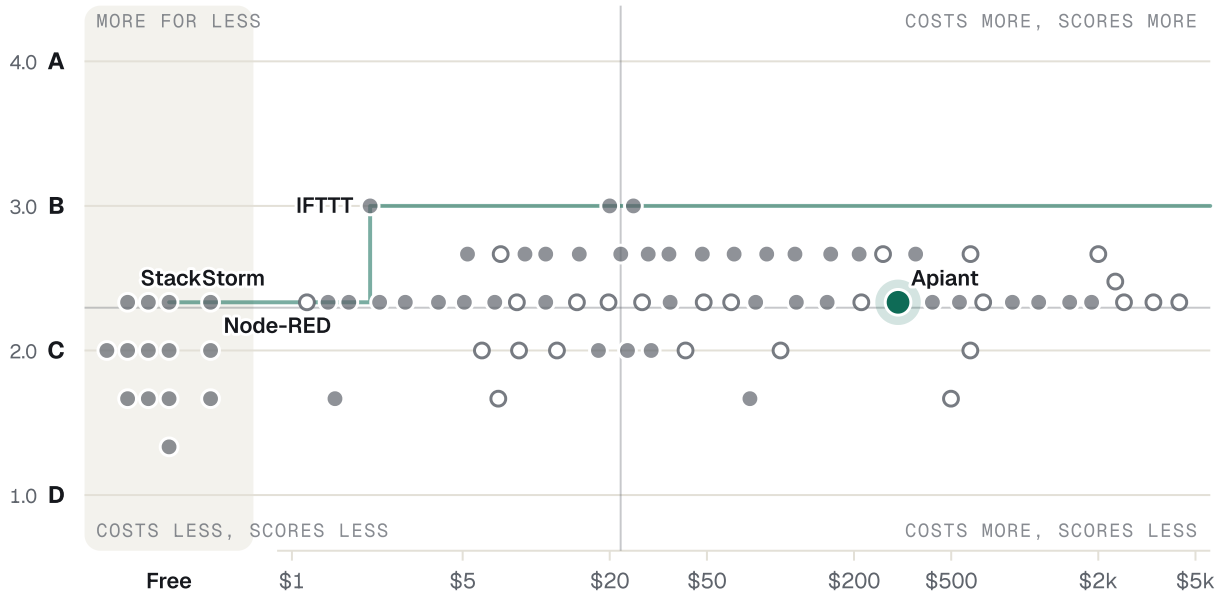

Each grade against the category

Every bar is all 135 automation tools we grade, cut by the letter each got. Apiant's own letter is outlined.

Price against what you get

Each dot is one of 80 automation tools. Further left costs less; higher up scores better on features, ease of use and platforms. Apiant is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Apiant you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

It costs $348 a year.

What you could not

- Connections to other products, each kept working as those products change.
- An AI agent, with the models and the safeguards behind it.

✕ What a company asks for before it lets staff use something: roles and permissions.

What this rests on. Apiant's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

Where this guide comes from

The prices, plans, platforms and features were read from Apiant's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from APIANT's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews. The pricing page would not load as text when we checked, so the grades rest on the listing.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by APIANT. Prices change, so check apiant.ai before you buy.
