Welcome

What it is, who it suits, its grades and the ten things to know first

2.6

GPA, above 67 of the 89 other AI app builders we grade

AppMySite converts a website or an online store (WordPress, WooCommerce, Shopify or any site) into an Android or iPhone app, and also offers a custom app builder that does not need a website. An AI app builder uses credits that come with each plan, and an agency product lets resellers create apps for clients under their own brand.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace AppMySite you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.6 is higher than 67 of the 89 other AI app builders we grade. It costs $48 a year.

What you could not

- ✕ A tool that builds and hosts other apps.
- ✕ A builder that other people can use without writing code.

- ✕ Checkout, card payments and sales tax handled for you.
- ✕ It plugs into other products, WordPress, WooCommerce and Shopify among them.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. AppMySite's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
