Who Appscenic is for

- ✓ Fits if you want a supplier catalog with automatic ordering on one store
- ✓ Works for sellers who want price and stock sync

Who it is not for

- ✕ Skip it if you want to sell free, as the Free plan places no orders
- ✕ Tight if you list widely: Standard caps pushed products at 100, Pro at 5,000
- ✕ Pricey if you want premium products: they need Pro at $79 a month
- ✕ Watch out: the pricing FAQ mentions a sales fee over $75,000 a month but gives no rate

Good to know

Good for

- ✓ Dropshippers who want suppliers in the US, UK, EU or Canada for shorter shipping
- ✓ Stores that want product sync and ordering handled automatically

Worth knowing

- ⓘ The Free plan places no orders; automatic ordering needs Standard or higher.
- ⓘ Premium products are only on Pro and Elite, and pushed products are capped at 100, 5,000 or 20,000.
- ⓘ The monthly and annual toggle shows only monthly prices in the page text we could read, so no yearly price is recorded.
- ⓘ The pricing FAQ refers to a sales fee for stores processing over $75,000 a month but the page does not state its rate.

Where it stands

Its grades against its category, and whether to keep it or make your own

16/70

Other print-on-demand and dropshipping services it is graded above

Appscenic's GPA of 2.2 is higher than 16 of the 70 other print-on-demand and dropshipping services we grade, and level with 16.

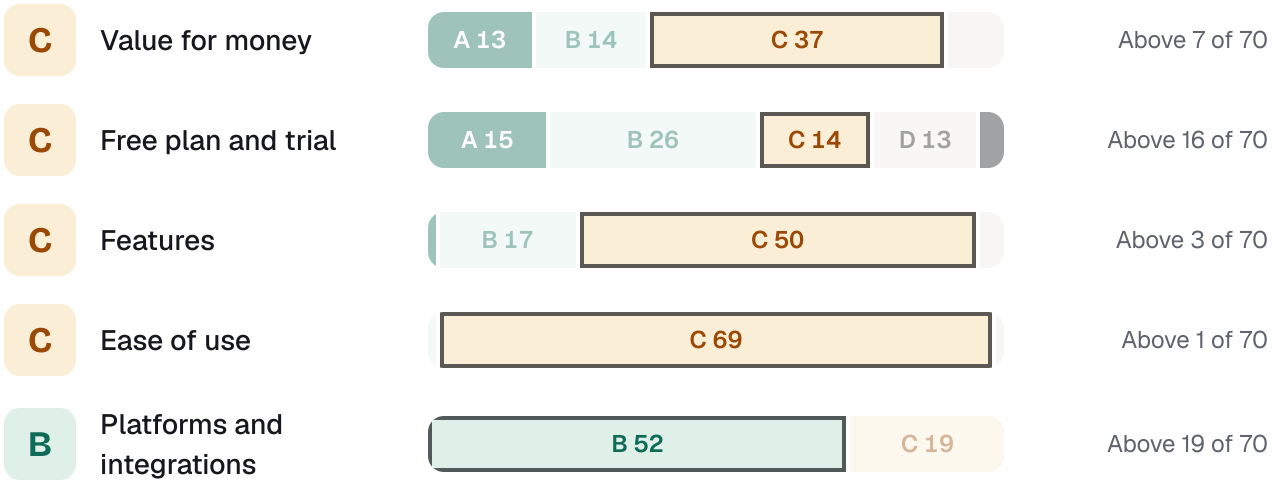

It stands best on platforms and integrations (B, above 19 of 70) and worst on ease of use (C, above 1).

Its paid plans start at $39 a month, against a middle price of $25 for the category: 24 of the 36 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 11 tools score higher and cost less.

Price against what you get

Each dot is one of 68 print-on-demand and dropshipping services. Further left costs less; higher up scores better on features, ease of use and platforms. Appscenic is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Appscenic you would be making suppliers who ship each order for you. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 38 of the 70 other print-on-demand and dropshipping services grade higher. It costs $468 a year.

What you could make

- Inventory: an app builder makes this well.

What you could not

- Suppliers who ship each order for you.
- Checkout, card payments and sales tax handled for you.
- It plugs into other products, Shopify, WooCommerce and Wix among them.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Appscenic's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
