Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 5 of the 80 other online store builders we grade

Arcadier is a marketplace platform sold to businesses that want to run a B2C, B2B, peer-to-peer or services marketplace on top of their existing systems. It provides buyer, seller and admin experiences, an admin portal, webhooks and a headless, API-first architecture. Pricing is scoped per deployment and quoted by the vendor.

> **Setup is scoped and done with Arcadier, so there's work before launch.**
>
> From our grade for ease of use

To get you started, here are **7 things to know about Arcadier**, taken from its own pages and our grades.

1 **Best for marketplace operators who accept a quoted build**

Nothing is priced: setup, platform, maintenance and support fees are all scoped and quoted, and the listing shows no trial.

2 **It runs on Web**

Web.

3 Three-sided experiences

Buyer, seller and admin experiences are built in, with the marketplace workflows a team would otherwise have to write itself.

4 Headless, API-first design

Full API access and webhooks let a team build its own features and custom workflows around the platform's core.

5 No feature gates

The pricing page says there are no feature gates or ceilings, so the whole platform is available from the first day.

6 A 1.6 GPA, above 5 of 80

That is against the other online store builders we grade, on value, the free plan, features, ease of use and platforms.

7 Keep it

To replace Arcadier you would be making checkout, card payments and sales tax handled for you. That is not a weekend's work, with an AI app builder or without one.

Best for marketplace operators who accept a quoted build

Arcadier is an API-first marketplace platform for B2C, B2B, peer-to-peer and services. Nothing is priced: setup, platform, maintenance and support fees are all scoped and quoted, and the listing shows no trial.

TOOLGPA REPORT CARD

Arcadier

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published, so it sits in the middle by default. The pricing page lists a one-time setup fee plus monthly platform and maintenance fees.
Free plan and trial	F	No free plan and no trial are on record, so nothing can be tried without paying or a sales call.
Features	C	API-first marketplace types with three-sided experiences and managed services, and a claim of no feature gates. Little else is listed, so we can't tell where the gaps are.
Ease of use	C	No rating on record. Setup is scoped and done with Arcadier, so there's work before launch.
Platforms and integrations	C	Web only, headless and API-first. No integration list on the pages we read.

Grade point average — Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Arcadier is for

- ✓ Fits if you want a marketplace built and run with the vendor's help
- ✓ Works for operators who need B2B or services marketplaces

Who it is not for

- ✕ Skip it if you want a price before a sales call, as none is published
- ✕ Tight if you want to try it first, since no trial is listed
- ✕ Watch out: technical support is billed as used
- ✕ Watch out: the site says it doesn't default to transaction fees, but a quote may differ by deployment

Good to know

Good for

- ✓ Established businesses adding a marketplace to an existing stack
- ✓ Enterprise teams that want API-first control rather than a template builder
- ✓ Marketplaces that prefer scoped fees over a cut of each sale

Worth knowing

- ⓘ No prices are published; setup, platform, maintenance and support fees are all scoped and quoted.
- ⓘ The pricing page lists a one-time setup fee plus monthly platform and maintenance fees, with technical support billed as used.
- ⓘ The site says it does not default to transaction fees, so a quote may differ by deployment.
- ⓘ Services such as full build, ad hoc support and infrastructure management are quoted separately.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Arcadier's current pricing could not be confirmed from its own site.

> **No price is published, so it sits in the middle by default.**
>
> From our grade for value for money

We could not confirm Arcadier's current prices from its own site, so this guide lists no plans. arcadier.com has them.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

API-first marketplace platform for B2C, B2B, P2P and services. Here is what it does, as its own site describes it, and what it covers: public API, online store.

> **API-first marketplace types with three-sided experiences and managed services, and a claim of no feature gates.**
>
> From our grade for features

Three-sided experiences

Buyer, seller and admin experiences are built in, with the marketplace workflows a team would otherwise have to write itself.

Headless, API-first design

Full API access and webhooks let a team build its own features and custom workflows around the platform's core.

No feature gates

The pricing page says there are no feature gates or ceilings, so the whole platform is available from the first day.

Marketplace types

Aimed at B2C, B2B, P2P and services marketplaces, with the site promising a live marketplace in weeks.

Managed services

Arcadier's team can build, partly build or run the marketplace, with front-end hosting and infrastructure oversight quoted separately.

Arcadier is made by Arcadier Pte. Ltd.

Where it stands

Its grades against its category, and whether to keep it or make your own

5/80

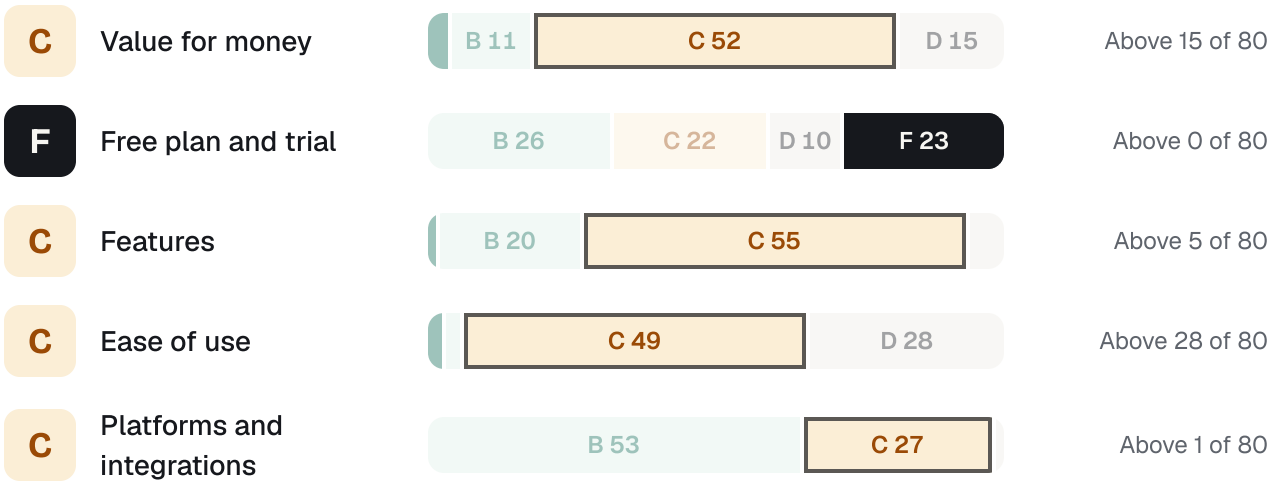

Other online store builders it is graded above

Arcadier's GPA of 1.6 is higher than 5 of the 80 other online store builders we grade, and level with 9.

It stands best on ease of use (C, above 28 of 80) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 81 online store builders we grade, cut by the letter each got. Arcadier's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Arcadier you would be making checkout, card payments and sales tax handled for you. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 66 of the 80 other online store builders grade higher.

What you could not

- ✕ Checkout, card payments and sales tax handled for you.
- ✕ An API that other software can build on.

What this rests on. Arcadier's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
