Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 63 of the 168 other AI image and video generators we grade

ArchiVinci is a browser-based tool that turns sketches, photos, floor plans, elevations and 3D-model screenshots into rendered images. Separate modules cover interior and exterior renders, landscapes, masterplans, floor plans and furnishing empty rooms, and a render-to-video module is also offered. Rendering runs in the cloud, so no local GPU is needed.

8 **A 2.2 GPA, above 63 of 168**

That is against the other AI image and video generators we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace ArchiVinci you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

It costs $2,028 a year.

What you could not

- ✕ An image model, which you can rent by the picture but not make.
- ✕ A video model, which you can rent by the second but not make.

- ✕ It plugs into other products, SketchUp, Revit and AutoCAD among them.
- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. ArchiVinci's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
