Welcome

What it is, who it suits, its grades and the ten things to know first

1.4

GPA, above 0 of the 56 other antivirus apps we grade

Arctic Wolf sells managed detection and response and endpoint security on its Aurora platform, backed by security staff who monitor customer environments around the clock. It also offers incident response, exposure management, security awareness training and a security operations warranty.

To get you started, here are **7 things to know about Arctic Wolf**, taken from its own pages and our grades.

1 **Best for companies that want a managed security team**

No prices are published and buyers are directed to request a demo.

2 **It runs on Web**

Web.

3 **Managed detection and response**

Security experts monitor and respond to threats 24x7, according to the vendor.

4 **Aurora Endpoint Security**

AI-driven prevention, detection and response for endpoint threats.

5 **Incident response**

Covers containment through restoring operations after an attack, with an Incident360 retainer option.

6 **A 1.4 GPA, above 0 of 56**

That is against the other antivirus apps we grade, on value, the free plan, features, ease of use and platforms.

7

Keep it

To replace Arctic Wolf you would be making an engine that recognises new malware as it appears. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for companies that want a managed security team

Arctic Wolf is a managed detection and response service with a 24x7 security team, not software you install yourself. No prices are published and buyers are directed to request a demo. Warranty terms are set by the vendor.

TOOLGPA REPORT CARD **Arctic Wolf** Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published, so there is nothing to set against this category's $2.58 to $6.50 a month; the listing says it is by quote. The homepage mentions flat pricing for MSPs without figures.
Free plan and trial	F	Nothing free on record: no free plan and no trial, and a demo request is not a trial. The site directs buyers to request a demo.
Features	D	A managed service that watches data from other tools, so it needs your own security products underneath.
Ease of use	C	Business product with a console and agents to roll out; no store rating is on record and the listing shows setup work, so it sits at the ordinary grade.
Platforms and integrations	C	Only a web console is on record. Operating systems, phone apps and integrations are not listed.
Grade point average		Weak, out of 4.0 **1.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Arctic Wolf is for

- ✓ Fits if you want a security team to watch alerts for you around the clock
- ✓ Works for MSPs that sell managed detection to customers

Who it is not for

- ✕ Not for you if you want software you install yourself, as this is a managed service
- ✕ Not for you if you want a published price, since buyers must request a demo
- ✕ Watch out: warranty terms and eligibility are set by the vendor and were not reviewed
- ✕ Too light for a free try: no trial or free plan is on record

Good to know

Good for

- ✓ Mid-size organizations without their own security operations center
- ✓ MSPs that want a managed security partner

Worth knowing

- ⓘ No prices are published; the site directs buyers to request a demo.
- ⓘ The homepage mentions flat, predictable pricing for MSPs without giving figures.
- ⓘ Warranty terms and eligibility are set by the vendor and were not reviewed here.
- ⓘ It is a managed service, not a self-installed antivirus.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

0/56

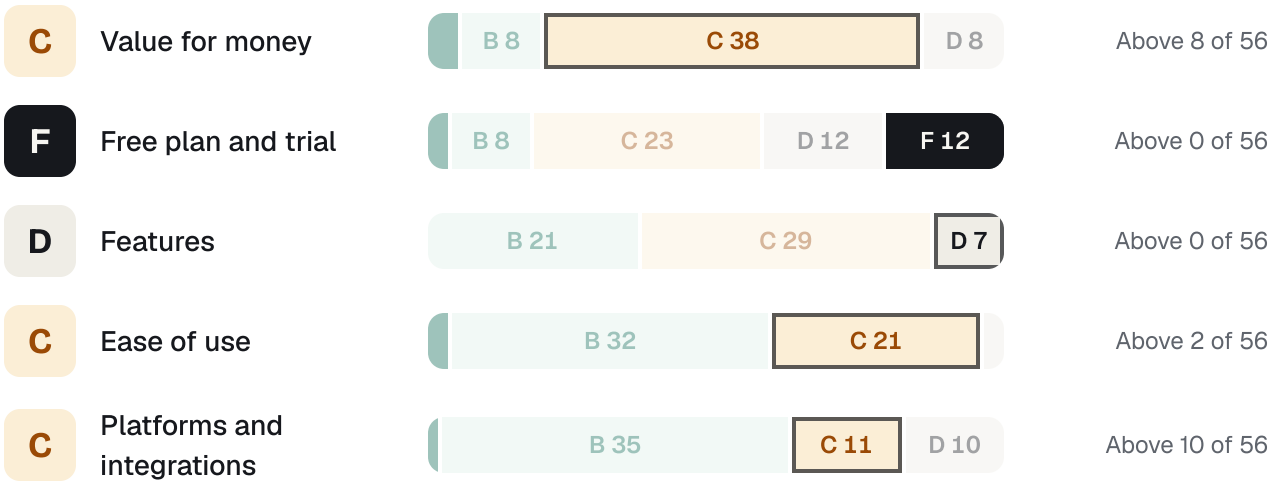

Other antivirus apps it is graded above

Arctic Wolf's GPA of 1.4 is higher than 0 of the 56 other antivirus apps we grade, and level with 2.

It stands best on platforms and integrations (C, above 10 of 56) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 57 antivirus apps we grade, cut by the letter each got. Arctic Wolf's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Arctic Wolf you would be making an engine that recognises new malware as it appears. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 54 of the 56 other antivirus apps grade higher.

What you could not

- ✕ An engine that recognises new malware as it appears.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Arctic Wolf's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
