07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from AudioStack's own pages, its app-store listings and our grades. Every fact in it is on AudioStack's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 5 of the 72 other AI voice generators we grade

AudioStack produces broadcast-ready audio from a brief or raw text for agencies, ad-tech platforms and publishers. It draws on voices, music and sound effects from several providers, and can be used in its own console or embedded in another product through an API. Pricing is available only through a demo.

To get you started, here are **7 things to know about AudioStack**, taken from its own pages and our grades.

> "
>
> **Briefs, ad tags and an API embed mean a team has to set it up.**
>
> From our grade for ease of use

1 **Best for producing ad audio at scale**

No price is published, there is no free plan or trial, and it is built for media teams rather than one person with a script.

2 **It runs on Web**

Web.

3 **InstantCreative**

Self-serve console where a team types a brief and produces finished ad audio.

4 **DynamicCreative**

Produces thousands of variants of one asset served from a single VAST tag.

5 **CreativeEngine**

The production engine embedded in another platform through an API call.

6 **A 1.8 GPA, above 5 of 72**

That is against the other AI voice generators we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace AudioStack you would be making a voice model, which you can rent by the minute but not make. That is not a weekend's work, with an AI app builder or without one.

OUR GRADE 1.8 GPA, weak	

The report card

Best for producing ad audio at scale

AudioStack makes ad audio for agencies and ad-tech platforms, from a self-serve console or through an API, using voices and music from 17 providers. No price is published, there is no free plan or trial, and it is built for media teams rather than one person with a script.

TOOLGPA REPORT CARD	AudioStack	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published and the site points to a demo, so it sits in the middle by default. The old pricing address returns a 404.
Free plan and trial	F	No free plan and no trial on record, so you pay before you see it.
Features	C	A console for finished ad audio, dynamic variants from one tag, a production engine for an API and long-form audio. The listing says the console and the API are separate ways to buy the same engine.
Ease of use	C	No store rating on record. Briefs, ad tags and an API embed mean a team has to set it up.
Platforms and integrations	B	Web console plus an API for embedding it elsewhere. No desktop or phone app is listed.

Grade point average Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who AudioStack is for

- ✓ Fits if you are an agency making many radio or streaming ad variants
- ✓ Makes sense if you run an ad-tech or publishing platform and want audio production built in

Who it is not for

- ✗ Skip it if you want to see a price first, because there isn't one and you book a demo
- ✗ Not for you if you are a solo creator: it is built for media and advertising teams
- ✗ Skip it if you want a free try, as there is no free plan or trial listed
- ✗ Watch out: the console and the API are bought separately, even though the engine is the same
- ✗ Watch out: the pricing page address returns a 404

Good to know

Good for

- ✓ Agencies producing many ad variants for radio and streaming
- ✓ Ad-tech and publishing platforms that want audio production built in

Worth knowing

- ⓘ No prices are published and the pricing address returns a 404; the site points to a demo booking.
- ⓘ Built for media and advertising teams rather than individual creators.
- ⓘ The self-serve console and the API are separate ways to buy the same engine.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

AudioStack's current pricing could not be confirmed from its own site.

> **No price is published and the site points to a demo, so it sits in the middle by default.**
>
> From our grade for value for money

We could not confirm AudioStack's current prices from its own site, so this guide lists no plans. audiostack.ai has them.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Audio production platform for advertising and media. Here is what it does, as its own site describes it, and what it covers: public API, AI features, ad creative, text to speech.

> **A console for finished ad audio, dynamic variants from one tag, a production engine for an API and long-form audio.**
>
> From our grade for features

InstantCreative

Self-serve console where a team types a brief and produces finished ad audio.

DynamicCreative

Produces thousands of variants of one asset served from a single VAST tag.

CreativeEngine

The production engine embedded in another platform through an API call.

StoryEngine

Turns raw text into long-form audio such as audiobooks.

Multi-provider voices

Lists over 2,600 voices and 1,000 sonic assets from 17 providers.

Where it runs

Web

What it works with

Its own pages name no integrations.

AudioStack is made by Aflorithmic Labs Ltd.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

5/72

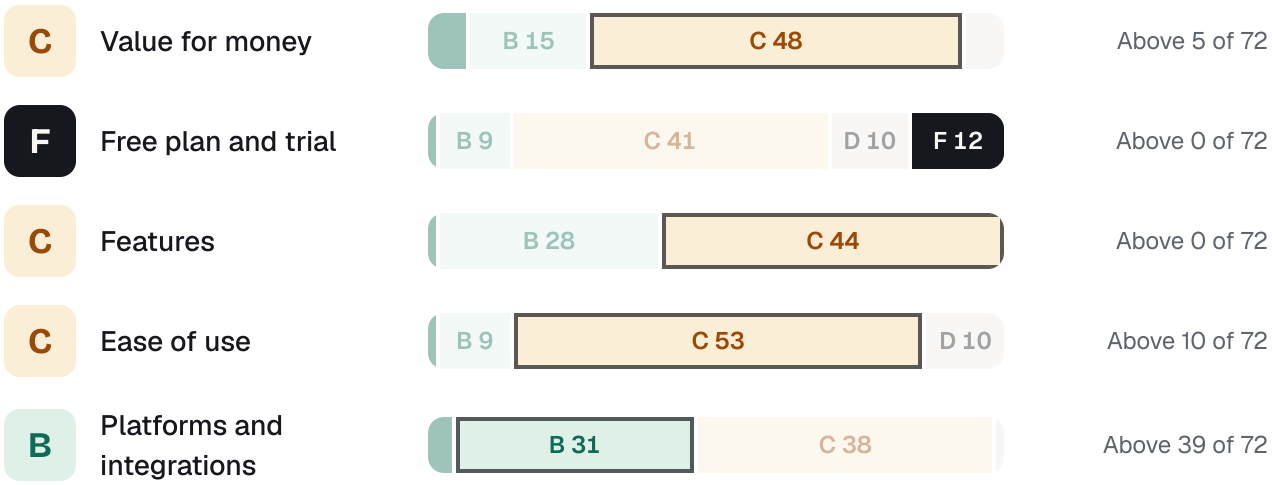

Other AI voice generators it is graded above

AudioStack's GPA of 1.8 is higher than 5 of the 72 other AI voice generators we grade, and level with 9.

It stands best on platforms and integrations (B, above 39 of 72) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 73 AI voice generators we grade, cut by the letter each got. AudioStack's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace AudioStack you would be making a voice model, which you can rent by the minute but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 58 of the 72 other AI voice generators grade higher.

What you could not

- A voice model, which you can rent by the minute but not make.
- Ad images and videos made to each network's sizes.
- An API that other software can build on.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. AudioStack's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

ElevenLabs, WellSaid, ReadSpeaker and BeyondWords

The 4 tools AudioStack is most often weighed against, with where each one differs from it.

3.0 GPA

ElevenLabs

Free plan · from $5/mo

AI voice platform for speech, voice cloning, dubbing and voice agents.

- ElevenLabs has a free plan. AudioStack does not.
- Only ElevenLabs lists iOS and Android apps.
- AudioStack also covers ad creative.

AudioStack and ElevenLabs compared in full

2.0 GPA

WellSaid

Free plan · from $10/mo

AI voiceover studio with voices licensed from paid voice actors.

- WellSaid has a free plan. AudioStack does not.
- AudioStack also covers ad creative.

AudioStack and WellSaid compared in full

2.4
GPA

ReadSpeaker

Free trial · from $9/mo

Text-to-speech for websites, apps, schools and custom brand voices.

- Only ReadSpeaker lists a browser extension.
- AudioStack also covers ad creative.
- ReadSpeaker also covers voice cloning.

AudioStack and ReadSpeaker compared in full

2.0
GPA

BeyondWords

Paid

AI audio publishing for news and article sites.

- AudioStack also covers ad creative.
- BeyondWords also covers web analytics and voice cloning.
