Who Autenti is for

- ✓ Fits if you sign with clients in Poland or elsewhere in the EU
- ✓ Makes sense if you need qualified signatures with a mobile option

Who it is not for

- ✗ Tight if you pay monthly, where PRO caps at 10 documents and PREMIUM at 15 a month
- ✗ Watch out: prices are in euros and exclude VAT
- ✗ Skip it if you want the API on a small plan, as standard API access starts at Corporate with no published price
- ✗ Watch out: a Black Weeks discount is shown on the page, so displayed prices may change
- ✗ Skip it if you want a free plan, because only a trial of unstated length is offered

Good to know

Good for

- ✓ Companies in Poland and Central Europe needing qualified signatures
- ✓ Small teams that sign a handful of documents and want fixed monthly prices
- ✓ Larger organizations that need KYC, e-delivery and signing in one vendor

Worth knowing

- ⓘ Prices are in euros and exclude VAT, not in US dollars.
- ⓘ On monthly billing PRO is limited to 10 documents and PREMIUM to 15 documents a month; annual plans show no limit.
- ⓘ Corporate and Enterprise have no published price, and API access is standard only from Corporate.
- ⓘ A Black Weeks promotion is running on the pricing page, so displayed discounts may change after it ends.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

19/78

Other e-signature and proposal tools it is graded above

Autenti's GPA of 2.0 is higher than 19 of the 78 other e-signature and proposal tools we grade, and level with 18.

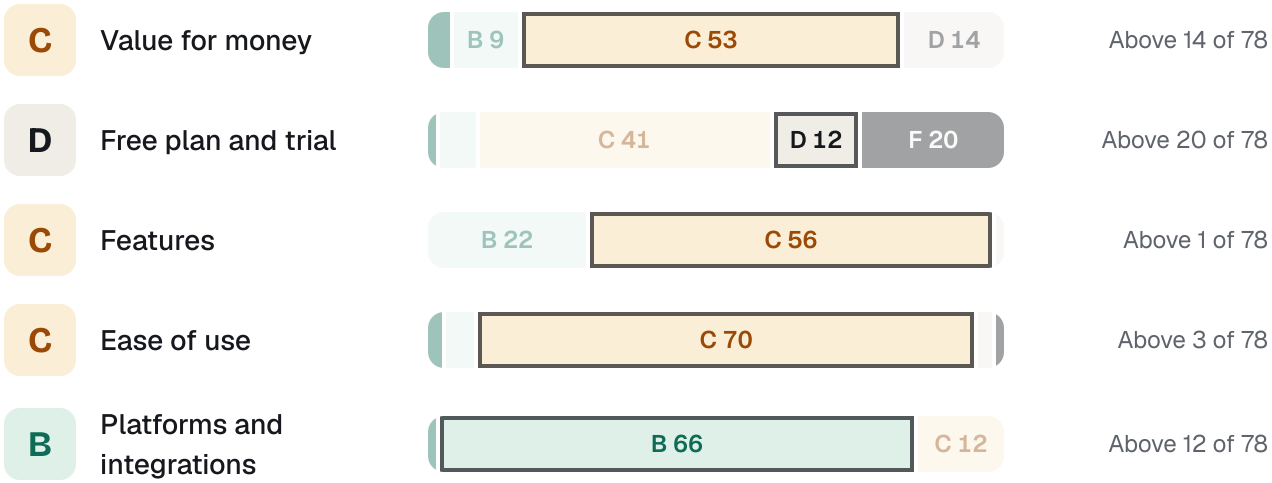

It stands best on platforms and integrations (B, above 12 of 78) and worst on free plan and trial (D, above 20).

Its paid plans start at about $22.34 a month, against a middle price of $19 for the category: 30 of the 54 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 12 tools score higher and cost less.

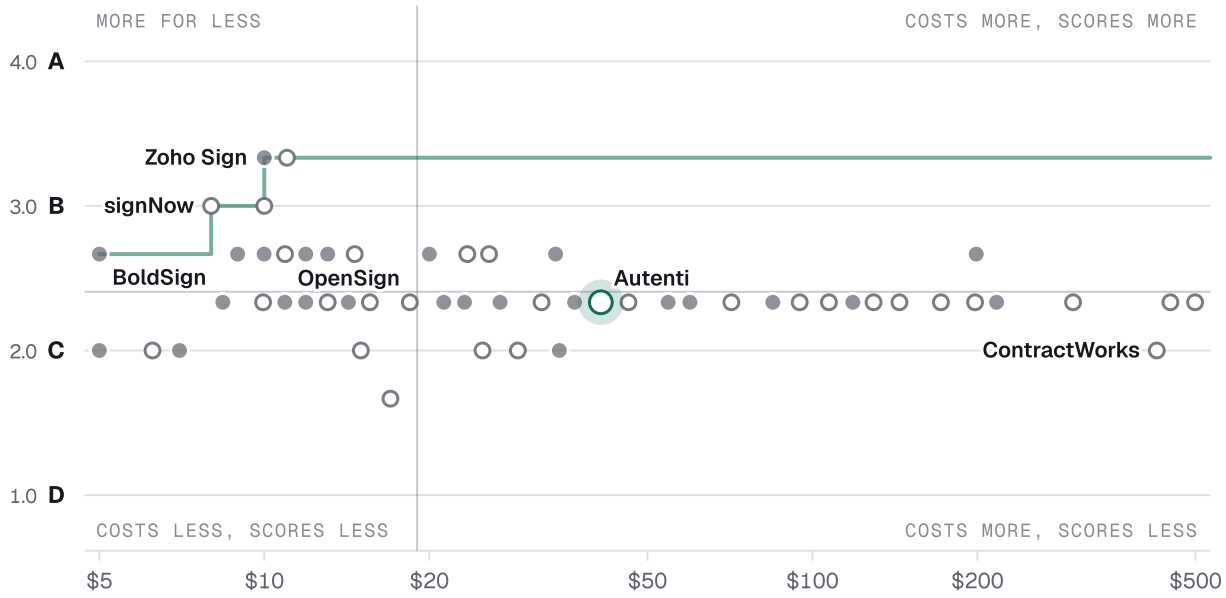

Each grade against the category

Every bar is all 79 e-signature and proposal tools we grade, cut by the letter each got. Autenti's own letter is outlined.

Price against what you get

Each dot is one of 55 e-signature and proposal tools. Further left costs less; higher up scores better on features, ease of use and platforms. Autenti is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Autenti you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 41 of the 78 other e-signature and proposal tools grade higher. It costs $268.13 a year.

What you could make

- Documents, templates and forms: an app builder makes these well.

What you could not

- Connections to other products, each kept working as those products change.

What this rests on. Autenti's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
