Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 0 of the 26 other email sending services we grade

AuthSMTP is an outgoing SMTP relay for websites, mailing lists and email applications. Accounts are named by their monthly message allowance and billed annually, from 2,000 messages a month up to millions, with shared IPs on the smaller accounts. A 14-day money-back guarantee covers new accounts paid by card or PayPal.

To get you started, here are **8 things to know about AuthSMTP**, taken from its own pages and our grades.

> **It has no campaign builder or marketing tools, and there is no free plan or trial.**

From our report card of AuthSMTP

1 **Best for sending from an app or device through SMTP**

AuthSMTP is an authenticated SMTP relay: you point your mail program or app at it and send.

2 **Paid plans start at $6 a month when paid by the year**

As its pricing page puts it: $72 per year for 2,000 emails a month.

3 **It runs on Web**

Web.

4 **Authenticated SMTP**

Sends from any application through an authenticated SMTP server, with SSL or TLS, alternative ports and multiple concurrent connections.

5 **Multiple from addresses and domains**

Each account allows a set number of from addresses or domains, from 20 on the smallest to 600 on the larger accounts.

6 **Flexible quota upgrades**

The site says an account can be boosted in a month as usage grows, with no automatic payments.

7 **A 1.8 GPA, above 0 of 26**

That is against the other email sending services we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace AuthSMTP you would be making mail servers with a good name among inbox providers. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for sending from an app or device through SMTP

AuthSMTP is an authenticated SMTP relay: you point your mail program or app at it and send. It starts at $72 a year for 2,000 emails a month, with plans billed by the year only. It has no campaign builder or marketing tools, and there is no free plan or trial.

TOOLGPA REPORT CARD	AuthSMTP	Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	B	$72 a year for 2,000 emails a month works out to $6 a month, inside the cheapest quarter of email sending tools. It is billed yearly, and 10,000 emails a month is $216 a year.
Free plan and trial	F	No free plan and no trial. A 14-day money-back guarantee is not a trial, and it ends after 100 messages sent or an upgrade.
Features	C	It does one job: authenticated SMTP sending, with several from addresses, a control panel, logs and scanning. It is a smaller job, and it does that job fully.
Ease of use	C	A web control panel with no rating on record. You enter SMTP credentials into whatever sends your mail.
Platforms and integrations	C	Web control panel only, with no integrations listed on the pages read.

Grade point average Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who AuthSMTP is for

- ✓ Fits if you want to send from your own domain through SMTP and need nothing else
- ✓ Works for older apps and devices that can only send through SMTP

Who it is not for

- ✗ Not for you if you want to try it free, because there is no free plan or trial
- ✗ Skip it if you want a campaign builder or marketing tools, as it is an SMTP relay only
- ✗ Watch out: pricing is by the year only, charged up front
- ✗ Watch out: the 14-day money-back guarantee covers only new card or PayPal accounts and ends after 100 messages
- ✗ Tight if you send big files: data allowances assume an average message of 300 KB

Good to know

Good for

- ✓ Small senders who want a low yearly price for an SMTP relay
- ✓ People who prefer paying once a year over a metered bill
- ✓ Sites that need a dependable relay without campaign tools

Worth knowing

- ⓘ Pricing is by the year only, and no free plan or trial is offered.
- ⓘ The 14-day money-back guarantee ends after 14 days, after 100 messages sent or after an upgrade, and covers new card or PayPal accounts only.
- ⓘ It is an SMTP relay without a campaign builder or marketing tools.
- ⓘ Data allowances are calculated on an average message size of 300 KB, which the pricing page lets you change.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Authenticated outgoing SMTP relay, billed by the year. Here is what it does, as its own site describes it, and what it covers: public API, transactional email.

> **It does one job: authenticated SMTP sending, with several from addresses, a control panel, logs and scanning.**
>
> From our grade for features

Authenticated SMTP

Sends from any application through an authenticated SMTP server, with SSL or TLS, alternative ports and multiple concurrent connections.

Multiple from addresses and domains

Each account allows a set number of from addresses or domains, from 20 on the smallest to 600 on the larger accounts.

Flexible quota upgrades

The site says an account can be boosted in a month as usage grows, with no automatic payments.

Control panel and logs

An online control panel shows account status and logged errors. A separate REST API is described, with message submission in beta.

Security and scanning

Messages are virus-scanned, with sender-domain validation and SPF and DKIM support. The site says it maintains PCI DSS compliance.

Where it stands

Its grades against its category, and whether to keep it or make your own

0/26

Other email sending services it is graded above

AuthSMTP's GPA of 1.8 is higher than 0 of the 26 other email sending services we grade, and level with 1.

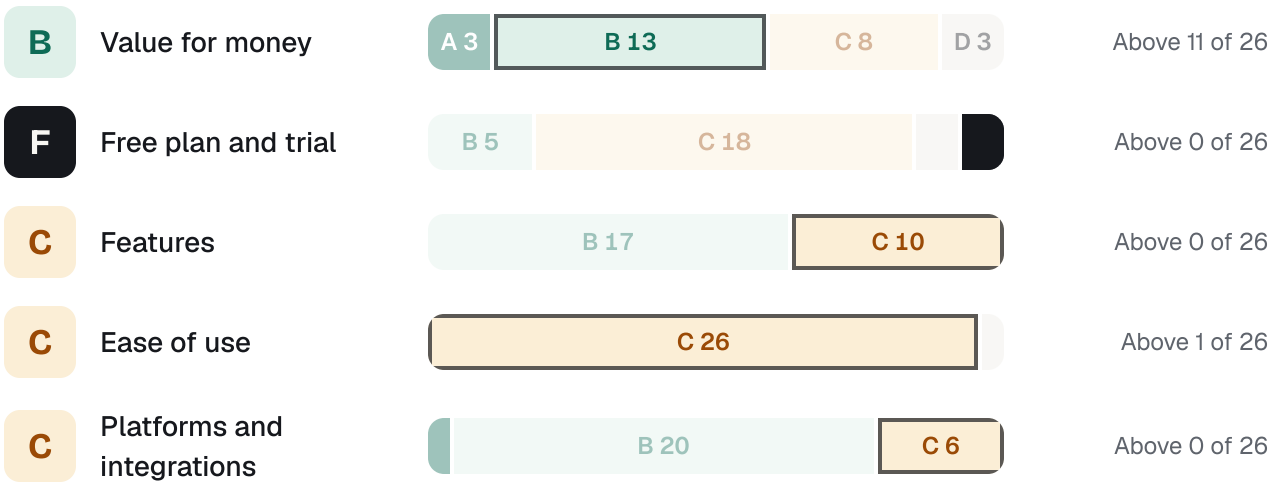

It stands best on value for money (B, above 11 of 26) and worst on free plan and trial (F, above 0).

Its paid plans start at $6 a month when paid by the year, against a middle price of $13.73 for the category: 2 of the 25 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 2 tools score higher and cost less.

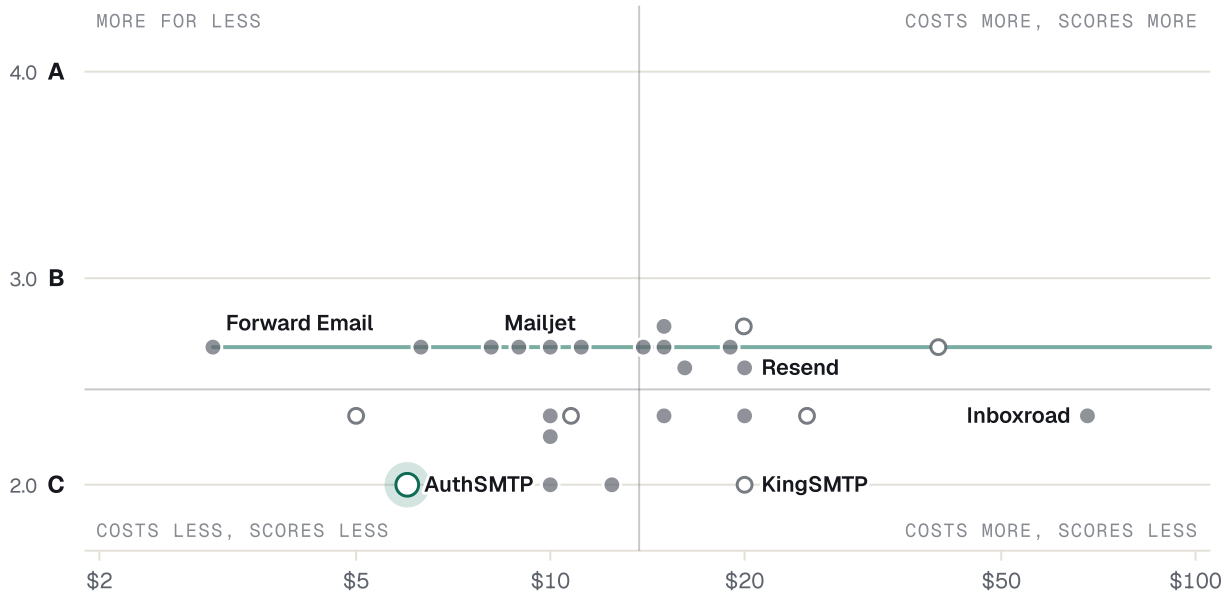

Each grade against the category

Every bar is all 27 email sending services we grade, cut by the letter each got. AuthSMTP's own letter is outlined.

Price against what you get

Each dot is one of 26 email sending services. Further left costs less; higher up scores better on features, ease of use and platforms. AuthSMTP is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace AuthSMTP you would be making mail servers with a good name among inbox providers. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 25 of the 26 other email sending services grade higher. It costs $72 a year.

What you could not

- ✕ Mail servers with a good name among inbox providers.
- ✕ An API that other software can build on.

What this rests on. AuthSMTP's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
