Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 34 of the 91 other file storage and sync services we grade

Autosync, by MetaCtrl, is an Android app that keeps folders on a phone or tablet in sync with cloud storage and network drives. You pick which device folder pairs with which cloud folder and how files move. The Universal app covers many services; single-cloud apps from the same maker serve one service each.

To get you started, here are **9 things to know about Autosync**, taken from its own pages and our grades.

1 **Best for folder sync on Android phones**

Autosync syncs Android folders with Google Drive, Dropbox, OneDrive, Box and more, with chosen folder pairs.

2 **What it costs**

Paid plans start at $2.99 per in-app purchase.

3 **You can try it first**

Free trial, counted separately for each storage service type; its length is not stated

4 **It runs on Android**

Android.

5 **Many storage services in one app**

Autosync Universal connects to Google Drive, OneDrive, SharePoint Online, Dropbox, Box, MEGA, Nextcloud, ownCloud and pCloud, among others.

6 **Protocol support**

WebDAV, FTP, SFTP and LAN/SMB network drives are supported, so storage without its own integration can still be reached.

7 **Chosen folder pairs**

You decide which device folder syncs with which cloud folder, and in which direction files move.

8 **A 2.2 GPA, above 34 of 91**

That is against the other file storage and sync services we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Autosync you would be making files kept in step across devices without losing one. That is not a weekend's work, with an AI app builder or without one.

Who Autosync is for

- ✓ Fits if you want an Android phone's folders synced with a cloud service
- ✓ Works for people on Nextcloud, ownCloud or WebDAV who want a plain sync app

Who it is not for

- ✗ Skip it if you use iPhone, Windows or Mac, as it is Android only
- ✗ Watch out: a licence is tied to one Google account and not shared across Family libraries
- ✗ Watch out: a purchase in one MetaCtrl app does not transfer to another
- ✗ Tight if you want a clear price, as each in-app item's price isn't shown
- ✗ Watch out: the trial length isn't stated

Good to know

Good for

- ✓ Android users who want folders mirrored to a cloud service
- ✓ People who use several cloud services and want one sync app
- ✓ Backing up phone folders to a NAS over SMB or SFTP

Worth knowing

- ⓘ Android only; the maker lists no iOS, Windows or Mac version.
- ⓘ Licenses are tied to one Google account and are not shared across Google Family libraries.
- ⓘ A purchase in one MetaCtrl app does not transfer to another, including the single-cloud apps.
- ⓘ The trial length and the price of each in-app item are not shown on the vendor's pages.

From our grade for features

Many storage services in one app

Autosync Universal connects to Google Drive, OneDrive, SharePoint Online, Dropbox, Box, MEGA, Nextcloud, ownCloud and pCloud, among others.

Protocol support

WebDAV, FTP, SFTP and LAN/SMB network drives are supported, so storage without its own integration can still be reached.

Chosen folder pairs

You decide which device folder syncs with which cloud folder, and in which direction files move.

Direct transfers

The vendor says files go straight between the device and the cloud service and do not pass through its own servers.

Automation

The maker publishes an automation guide for triggering syncs from other Android automation apps.

Single-cloud apps

Separate apps cover one service each, such as OneSync for OneDrive and Dropsync for Dropbox, with fewer features.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

34/91

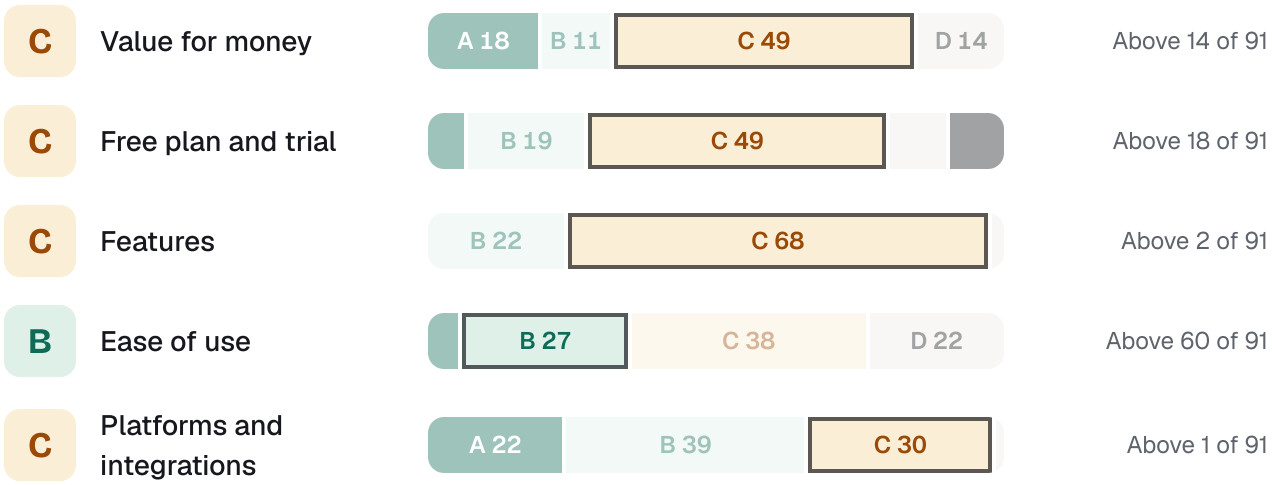

Other file storage and sync services it is graded above

Autosync's GPA of 2.2 is higher than 34 of the 91 other file storage and sync services we grade, and level with 9.

It stands best on ease of use (B, above 60 of 91) and worst on platforms and integrations (C, above 1).

Each grade against the category

Every bar is all 92 file storage and sync services we grade, cut by the letter each got. Autosync's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Autosync you would be making files kept in step across devices without losing one. That is not a weekend's work, with an AI app builder or without one.

What you could not

- ✕ Files kept in step across devices without losing one.
- ✕ Storing and serving files for other people.
- ✕ A real app for Android. Something home-made would be a web page.
- ✕ It plugs into other products, Google Drive, OneDrive and Dropbox among them.

What this rests on. Autosync's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
