PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

0/149

Other project management tools it is graded above

Axosoft's GPA of 1.4 is higher than 0 of the 149 other project management tools we grade.

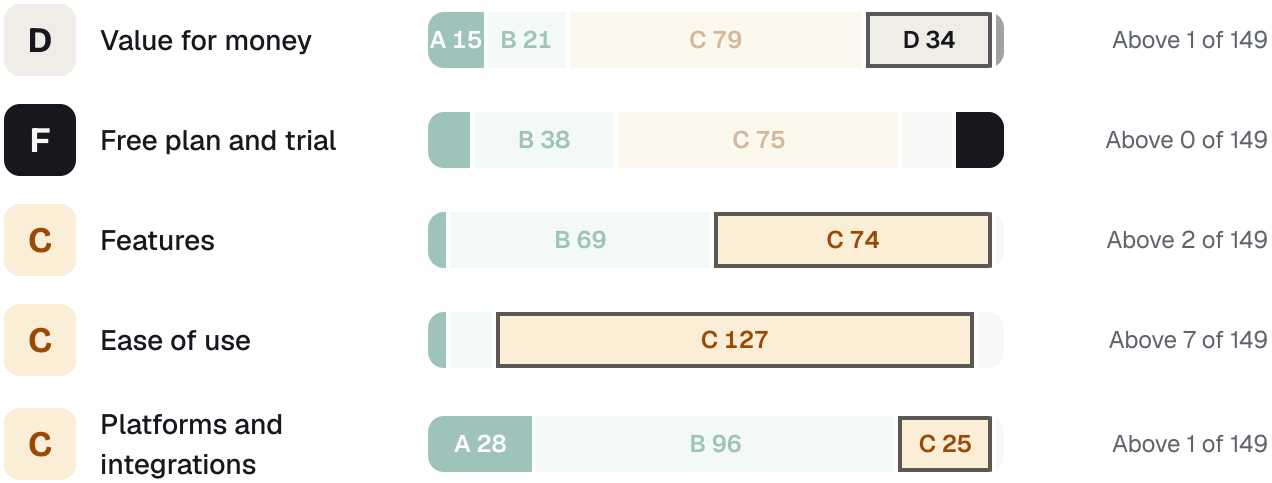

It stands best on ease of use (C, above 7 of 149) and worst on free plan and trial (F, above 0).

Its paid plans start at $105 a month, against a middle price of $9 for the category: 119 of the 121 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 111 tools score higher and cost less.

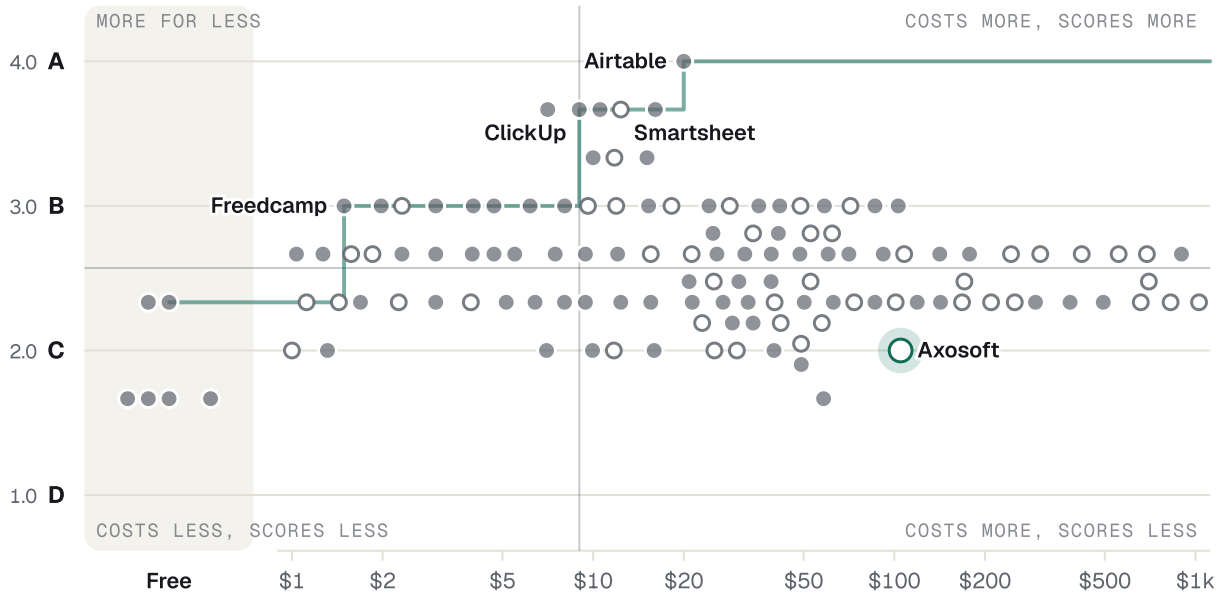

Each grade against the category

Every bar is all 150 project management tools we grade, cut by the letter each got. Axosoft's own letter is outlined.

Price against what you get

Each dot is one of 128 project management tools. Further left costs less; higher up scores better on features, ease of use and platforms. Axosoft is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Axosoft you could make: issue tracking, kanban boards, wiki and help desk. What surrounds it you could not. The 1 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 149 of the 149 other project management tools grade higher. It costs $1,260 a year.

What you could make

- Issue tracking, kanban boards, wiki and help desk: an app builder makes these well.

What you could not

- Connections that pull numbers from dozens of other services.

What this rests on. Axosoft's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
