Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 9 of the 50 other VPNs we grade

AzireVPN is a VPN launched in Sweden in 2012 and now part of Malwarebytes. Signing up needs no email, address or phone number, and the vendor says its servers run without hard drives and keep no logs, a claim it says a third-party audit verified. Apps cover Windows, macOS, iOS and Android.

To get you started, here are **8 things to know about AzireVPN**, taken from its own pages and our grades.

> "
>
> **No rating on record, but it is an app you install and press connect.**

From our grade for ease of use

1 **Best for a privacy-minded VPN with no sign-up details**

AzireVPN, now part of Malwarebytes, needs no email or phone to sign up and runs diskless servers, with prices from EUR 3.75 a month on the 12-month plan.

2 **Paid plans start at about $4.19 a month**

As its pricing page puts it: €3.75 per month on the 12-month plan, €45 total.

3 **It runs on 4 platforms**

Windows, macOS, iOS and Android.

4 **No personal data to sign up**

The site says it needs no email, address, phone number or credit card details to create an account.

5 **Diskless servers**

AzireVPN says it owns its servers, runs them without hard drives and uses a Blind Operator setup so data cannot be stored.

6 **Kill switch and WireGuard**

A built-in kill switch and always-on mode, and the WireGuard protocol, are listed on the apps page.

7 **A 2.0 GPA, above 9 of 50**

That is against the other VPNs we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace AzireVPN you would be making servers in dozens of countries, kept fast and private. That is not a weekend's work, with an AI app builder or without one.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

9/50

Other VPNs it is graded above

AzireVPN's GPA of 2.0 is higher than 9 of the 50 other VPNs we grade, and level with 5.

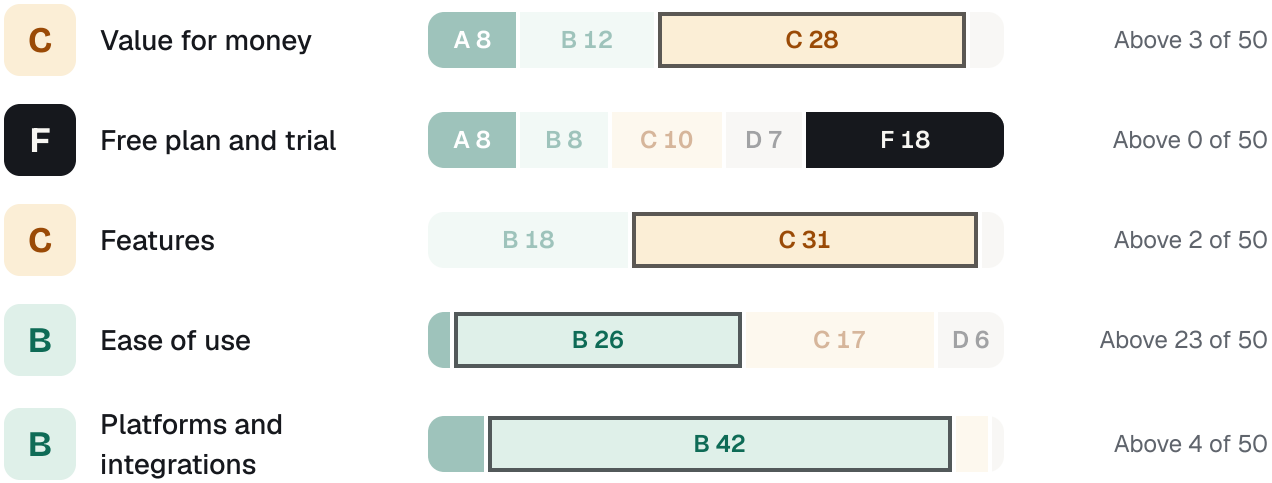

It stands best on ease of use (B, above 23 of 50) and worst on free plan and trial (F, above 0).

Its paid plans start at about $4.19 a month, against a middle price of $4.99 for the category: 15 of the 40 others that charge start lower.

Each grade against the category

Every bar is all 51 VPNs we grade, cut by the letter each got. AzireVPN's own letter is outlined.

Price against what you get

Each dot is one of 46 VPNs. Further left costs less; higher up scores better on features, ease of use and platforms. AzireVPN is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace AzireVPN you would be making servers in dozens of countries, kept fast and private. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 36 of the 50 other VPNs grade higher. It costs $50.27 a year.

What you could not

- ✕ Servers in dozens of countries, kept fast and private.
- ✕ Storing and serving files for other people.

- ✕ Apps for macOS, Windows, iOS and Android that stay in step with each other.

What this rests on. AzireVPN's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
