PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

23/98

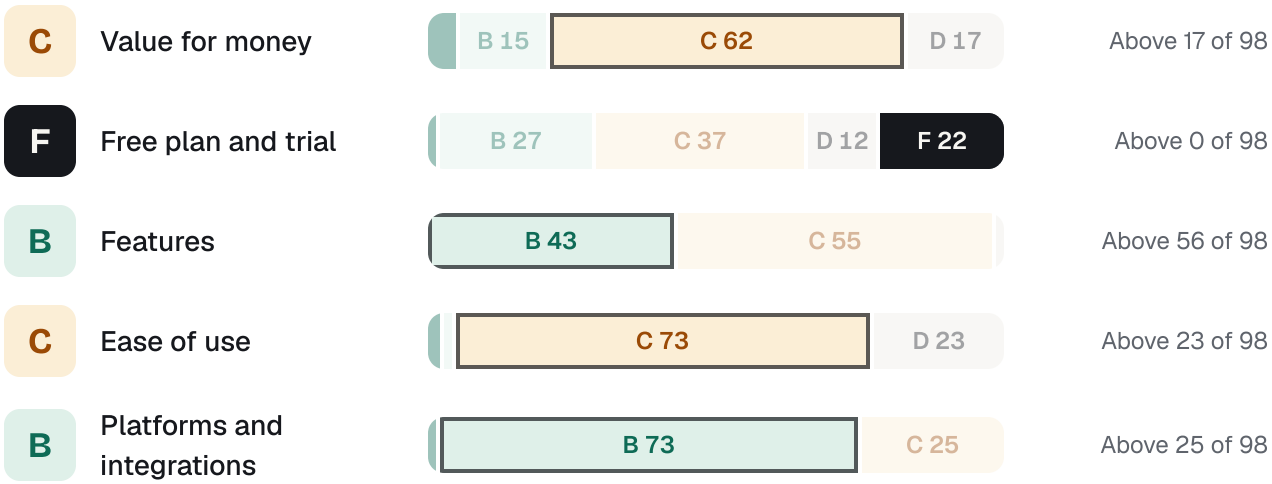

Other course and community platforms it is graded above

Bevy's GPA of 2.0 is higher than 23 of the 98 other course and community platforms we grade, and level with 21.

It stands best on features (B, above 56 of 98) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 99 course and community platforms we grade, cut by the letter each got. Bevy's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Bevy you could make: reports. What surrounds it you could not. The 4 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 54 of the 98 other course and community platforms grade higher.

What you could make

- Reports: an app builder makes this well.

What you could not

- A members' space with posts, chat and events that people keep coming back to.
- AI features, unless you pay a model provider for each request yourself.
- What a company asks for before it lets staff use something: single sign-on.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Bevy's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
