Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from BeyondWords's own pages, its app-store listings and our grades. Every fact in it is on BeyondWords's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 15 of the 72 other AI voice generators we grade

BeyondWords is an audio CMS for publishers that turns articles into audio with AI voices, including professional and instant voice clones. It provides a customizable player, listener analytics, ad-server monetization and publishing from CMSs such as WordPress and Ghost. Pricing is by demo request only.

To get you started, here are **7 things to know about BeyondWords**, taken from its own pages and our grades.

> "
>
> **It publishes no prices, and the pricing address redirects to a demo form.**
>
> From our report card of BeyondWords

1 **Best for audio for news and article sites**

BeyondWords turns articles into audio for publishers, with a player, analytics and CMS publishing.

2 **It runs on Web**

Web.

3 **Audio articles**

Turns articles into audio with control over pronunciations, including names, dates and stock symbols.

4 **Voice cloning**

Instant cloning from about five seconds of audio, or professional cloning from five recorded articles.

5 **Embeddable player**

A customizable player that the site says meets WCAG 2 accessibility standards, with web, iOS and Android SDKs.

6 **A 2.0 GPA, above 15 of 72**

That is against the other AI voice generators we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace BeyondWords you would be making a voice model, which you can rent by the minute but not make. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for audio for news and article sites

BeyondWords turns articles into audio for publishers, with a player, analytics and CMS publishing. It publishes no prices, and the pricing address redirects to a demo form.

TOOLGPA REPORT CARD	BeyondWords	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published; the pricing address redirects to a book-a-demo form.
Free plan and trial	F	No free plan, no trial and no price on its pages, so nothing to try first.
Features	B	Audio articles, voice cloning, an embeddable player, listener analytics, monetization and CMS publishing.
Ease of use	C	No store rating on record, and it is set up through a demo and a CMS connection.
Platforms and integrations	B	Web with WordPress, Ghost, Spotify, Google Analytics and Google Ad Manager connections, plus OpenAI. No desktop or phone apps.
Grade point average		Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who BeyondWords is for

- ✓ Fits if you run a news or article site and want audio versions of every article
- ✓ Works for a publisher with a CMS such as WordPress or Ghost

Who it is not for

- ✗ Skip it if you want a price, as the pricing page sends you to a demo form
- ✗ Not for you if you are an individual wanting a voiceover, as the product is aimed at publishers
- ✗ Too light for one-off voiceovers, since it is built around article volume
- ✗ Watch out: the demo form asks about your monthly publishing volume

Good to know

Good for

- ✓ News and content publishers adding audio to every article
- ✓ Newsrooms that want writers' own voices as narrators

Worth knowing

- ⓘ No prices are published; the pricing address redirects to a book-a-demo form.
- ⓘ Built for publishers, with the demo form asking about monthly article volume.
- ⓘ The site says it complies with SOC2 and GDPR.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

BeyondWords's current pricing could not be confirmed from its own site.

> **No price is published; the pricing address redirects to a book-a-demo form.**
>
> From our grade for value for money

We could not confirm BeyondWords's current prices from its own site, so this guide lists no plans. beyondwords.io has them.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

AI audio publishing for news and article sites. Here is what it does, as its own site describes it, and what it covers: public API, web analytics, text to speech, voice cloning.

> **Audio articles, voice cloning, an embeddable player, listener analytics, monetization and CMS publishing.**
>
> From our grade for features

Audio articles

Turns articles into audio with control over pronunciations, including names, dates and stock symbols.

Voice cloning

Instant cloning from about five seconds of audio, or professional cloning from five recorded articles.

Embeddable player

A customizable player that the site says meets WCAG 2 accessibility standards, with web, iOS and Android SDKs.

Listener analytics

Reports listen rates, time spent and completion rates, and sends events to Google Analytics.

Monetization

Connects to ad servers such as Google Ad Manager for audio and video ads.

CMS publishing

A WordPress plugin, a Ghost integration, an RSS importer and a one-line embed script publish audio automatically.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

15/72

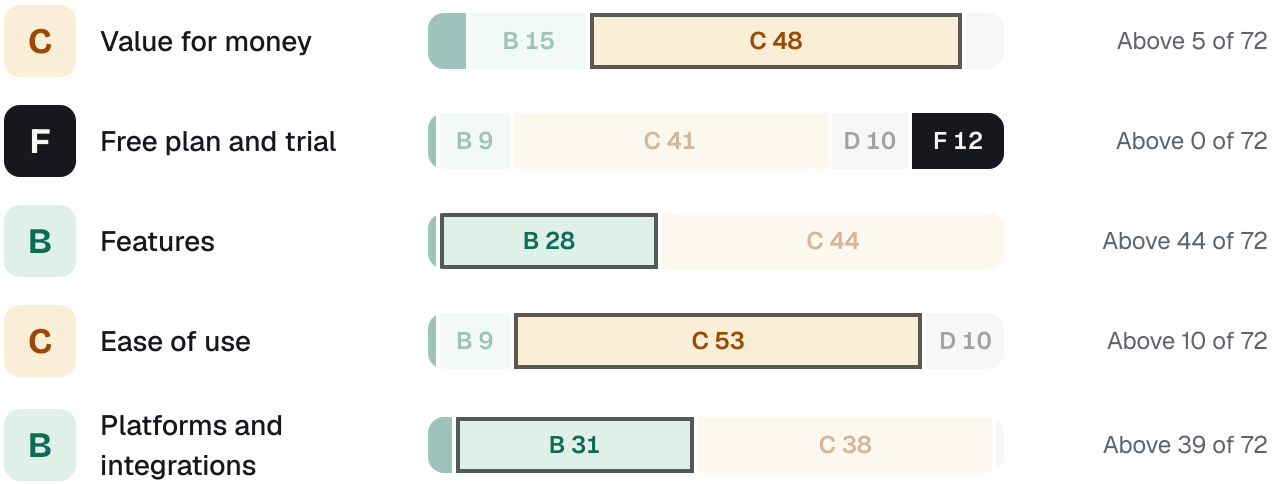

Other AI voice generators it is graded above

BeyondWords's GPA of 2.0 is higher than 15 of the 72 other AI voice generators we grade, and level with 14.

It stands best on features (B, above 44 of 72) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 73 AI voice generators we grade, cut by the letter each got. BeyondWords's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace BeyondWords you would be making a voice model, which you can rent by the minute but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 43 of the 72 other AI voice generators grade higher.

What you could not

- A voice model, which you can rent by the minute but not make.
- A voice model trained on your recordings.
- A tracking script and a database that counts every visit.
- It plugs into other products, WordPress, Ghost and Spotify among them, and has an API.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. BeyondWords's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

ElevenLabs, WellSaid, Audioread and ReadSpeaker

The 4 tools BeyondWords is most often weighed against, with where each one differs from it.

3.0 GPA

ElevenLabs
