Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 26 of the 134 other automation tools we grade

Bika.ai combines a tabular database with automations and AI agents. Users install templates for work such as email outreach, reporting and social posting, then set triggers and schedules so tasks run on their own. Plans are priced per seat, with a free plan for up to five seats.

To get you started, here are **9 things to know about Bika.ai**, taken from its own pages and our grades.

> "
>
> **You build databases and install templates before it does anything.**
>
> From our grade for ease of use

1 **Best for a database with scheduled AI automations**

Bika.ai is a database with agent templates, scheduled automations and reports.

2 **Paid plans start at $16 a month for each person**

As its pricing page puts it: $16 per seat / month, billing term not shown.

3 **There is a free plan**

Free plan for up to 5 seats: 200 automation runs, 5GB storage and 10,000 records per database.

4 **It runs on Web**

Web.

5 **Automation database**

Tables with built-in automations that trigger on a schedule or when new data arrives, rather than through a chatbot.

6 **Agent templates**

A template center offers installable apps such as an email marketer, an AI writer and a GitHub issues creator.

7 **Missions and reports**

Missions, notifications and scheduled reports are included, with monthly allowances that grow on higher plans.

8 **A 2.0 GPA, above 26 of 134**

That is against the other automation tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Bika.ai you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Bika.ai is for

- ✓ Fits if a team of up to five wants a database and scheduled automations together
- ✓ Works for people who like installing ready-made agent templates

Who it is not for

- ✗ Tight if you run more than 200 automations on the free plan, which also keeps only 7 days of run history
- ✗ Pricey if you need the Business plan, at $166 a seat
- ✗ Watch out: custom domains, data sync and removing logos are listed as coming soon
- ✗ Watch out: the page does not show whether the per-seat prices are monthly or yearly rates

Good to know

Good for

- ✓ Small teams that want a database and scheduled automations in one tool
- ✓ Users who prefer installing ready-made agent templates

Worth knowing

- ⓘ The page does not show whether the per-seat prices are the monthly or yearly rate; the yearly toggle carries an 85% label.
- ⓘ Several features are marked coming soon, including custom domains, data sync and removing logos.
- ⓘ Free-plan automation runs are capped at 200, with 7 days of run history.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

26/134

Other automation tools it is graded above

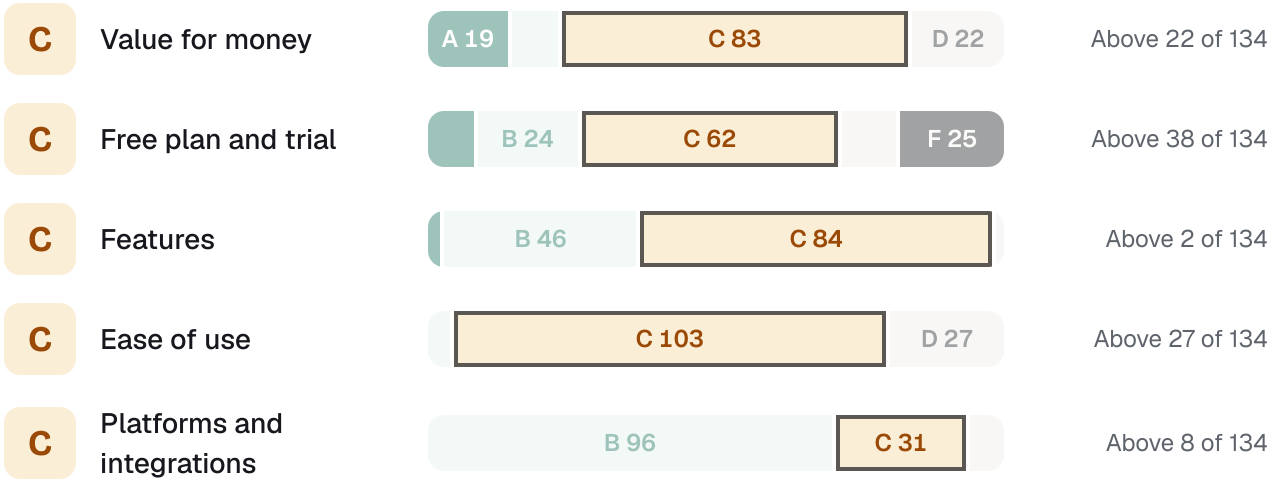

Bika.ai's GPA of 2.0 is higher than 26 of the 134 other automation tools we grade, and level with 27.

Its paid plans start at $16 a month for each person, against a middle price of $22.17 for the category: 20 of the 65 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 18 tools score higher and cost less.

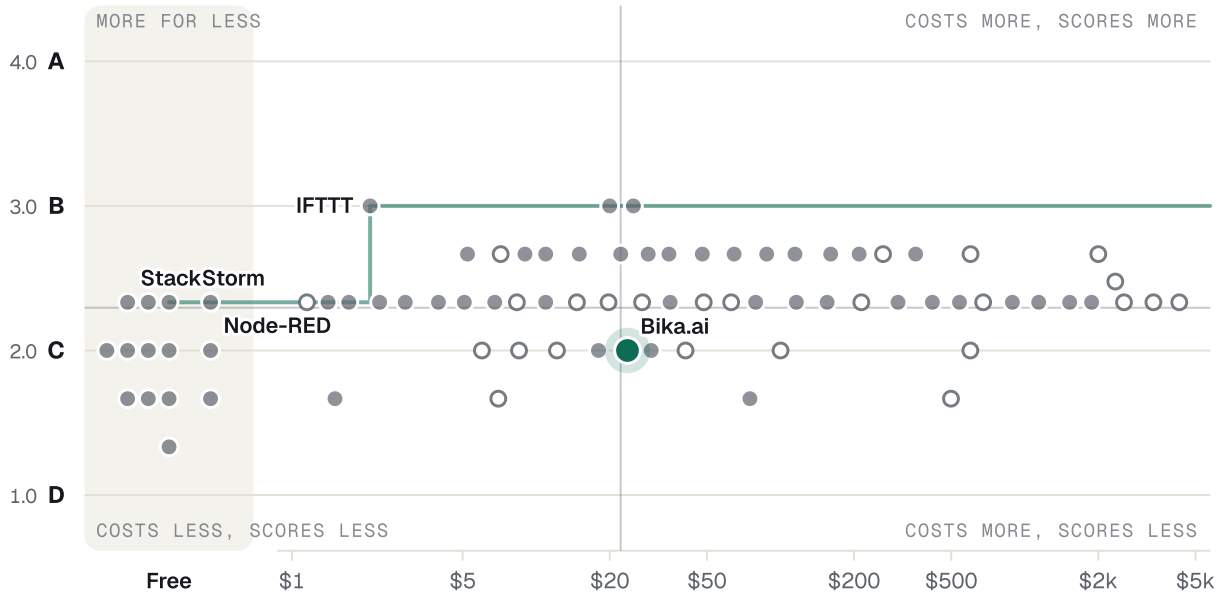

Each grade against the category

Every bar is all 135 automation tools we grade, cut by the letter each got. Bika.ai's own letter is outlined.

Price against what you get

Each dot is one of 80 automation tools. Further left costs less; higher up scores better on features, ease of use and platforms. Bika.ai is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Bika.ai you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 81 of the 134 other automation tools grade higher. It costs $192 a year.

What you could make

- Templates: an app builder makes this well.

What you could not

- Connections to other products, each kept working as those products change.
- An AI agent, with the models and the safeguards behind it.
- Databases with views, filters and links between them.
- It is priced for each person, which means accounts and billing for a team.

What this rests on. Bika.ai's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
