PART 04 · STANDING

# Where it stands

Its grades against its category, and whether to keep it or make your own

**6**/84

Other screen recording and video tools it is graded above

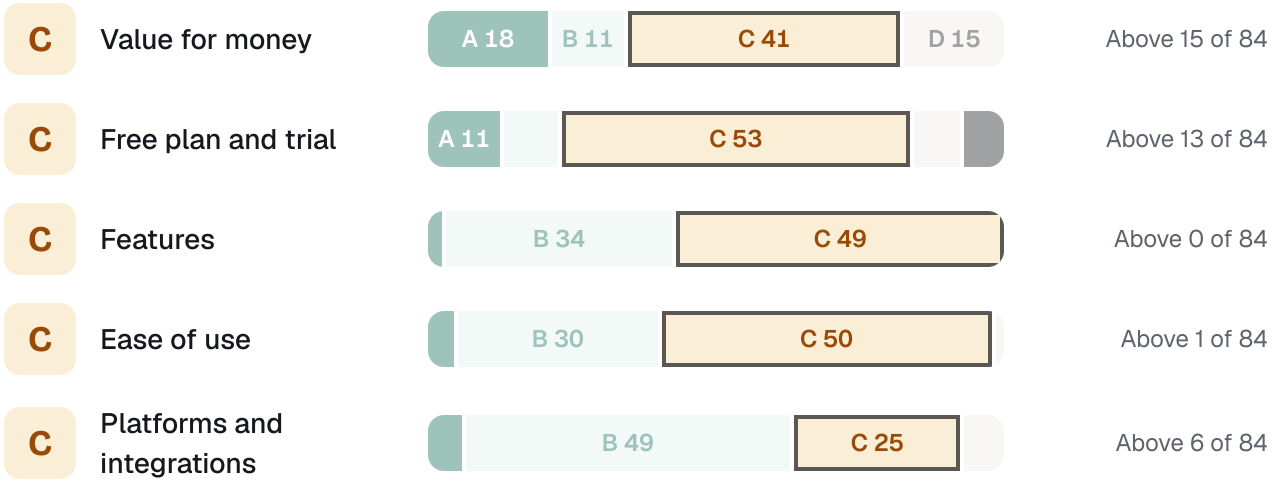

Biteable's GPA of 2.0 is higher than 6 of the 84 other screen recording and video tools we grade, and level with 12.

Its paid plans start at $15 a month, against a middle price of $12 for the category: 39 of the 62 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 38 tools score higher and cost less.

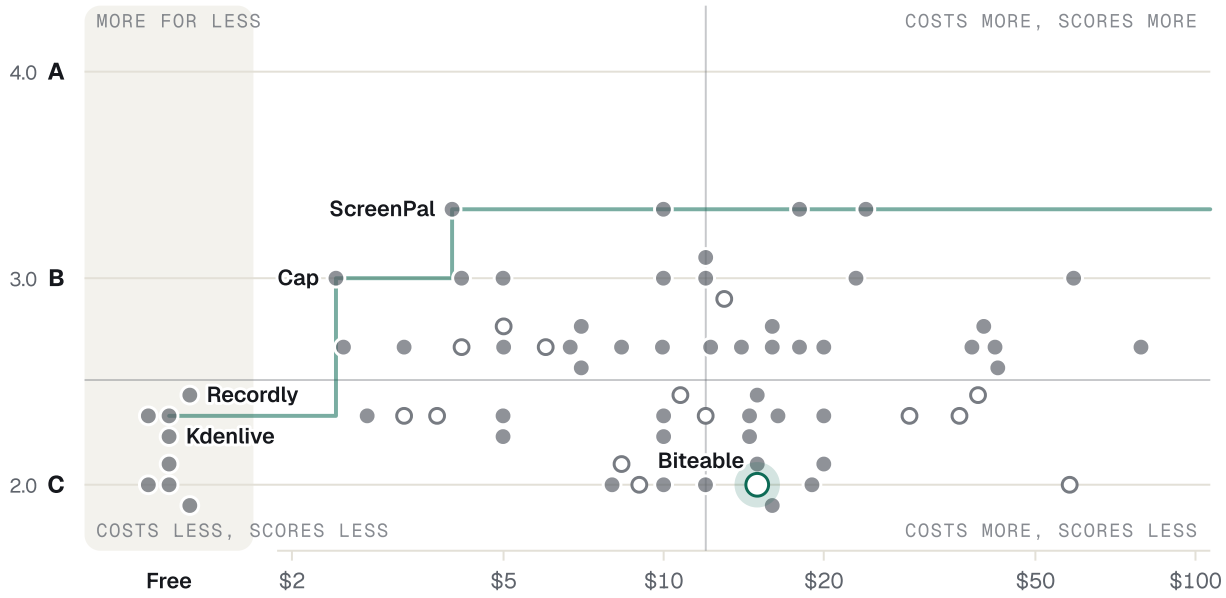

## Each grade against the category

Every bar is all 85 screen recording and video tools we grade, cut by the letter each got. Biteable's own letter is outlined.

## Price against what you get

Each dot is one of 71 screen recording and video tools. Further left costs less; higher up scores better on features, ease of use and platforms. Biteable is the marked dot.

What paid plans start at, a month (each step along is roughly double)

## Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

### Keep it

To replace Biteable you would be making a video editor. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 66 of the 84 other screen recording and video tools grade higher. It costs $180 a year.

#### What you could make

- Templates: an app builder makes this well.

#### What you could not

- A video editor.
- A voice model, which you can rent by the minute but not make.

- Recording the screen with its sound, and somewhere to keep the video.
- AI features, unless you pay a model provider for each request yourself.
- What a company asks for before it lets staff use something: single sign-on.
- Sharing with other people, which means accounts and invitations.

**What this rests on.** Biteable's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
