Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 54 of the 134 other automation tools we grade

Bizagi is an enterprise automation platform that combines process automation, low-code app building and AI agents. A free Modeler is offered for mapping and documenting business processes, which can then be automated on the paid platform. The platform is sold on consumption-based pricing through a quote.

To get you started, here are **7 things to know about Bizagi**, taken from its own pages and our grades.

1 **Best for process automation for large organisations**

Bizagi is a process automation platform with a free modeling tool and a paid platform for automation, apps and AI.

2 **It runs on Web**

Web.

3 **Process automation**

Models business processes and runs them with visibility and control over each step, with built-in compliance management.

4 **Low-code apps**

Apps are built with a visual wizard aimed at citizen developers, using reusable business objects, actions and processes.

5 **AI agents and assistants**

The platform lists AI Agents, AI Workers and an AI Assistant, and an AI Advisor launched to help find where agents could be used.

6 **A 2.2 GPA, above 54 of 134**

That is against the other automation tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Bizagi you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for process automation for large organisations

Bizagi is a process automation platform with a free modeling tool and a paid platform for automation, apps and AI. No prices are published, billing follows usage through a quote, and the pricing page address we had now returns a 404.

TOOLGPA REPORT CARD

Bizagi

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price published. The vendor describes consumption-based pricing and sends you to a quote.
Free plan and trial	C	The Modeler for drawing processes is free. Automation, apps and AI need the paid platform.
Features	C	Process modeling, automation, case management and low-code apps. Most of it sits behind the paid platform.
Ease of use	C	No store rating on record. There are processes to model and a platform to configure, so expect a learning curve.
Platforms and integrations	B	Web platform with SAP, SharePoint and Visio connections. No phone or desktop apps on the listing.

Grade point average — Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Bizagi is for

- ✓ Fits if you're an enterprise team modeling and automating long business processes
- ✓ Works for people who only need the free Modeler to draw processes

Who it is not for

- ✗ Skip it if you want a price before talking to sales
- ✗ Not for you if you need automation on the free tier, as only modeling is free
- ✗ Watch out: cost follows usage, so it can't be fixed in advance
- ✗ Watch out: the old pricing page address now returns a 404

Good to know

Good for

- Large enterprises automating regulated, case-based processes
- Teams starting with free process mapping before buying automation
- Organizations that want unlimited users and apps under one consumption contract

Worth knowing

- No prices are published: the pricing page describes consumption-based pricing and points to a quote request.
- The pricing page says subscriptions have no limit on users or apps, with cost following usage.
- The free Modeler covers process modeling; automation, apps and AI need the paid platform.

What it costs

Where it stands

Its grades against its category, and whether to keep it or make your own

54/134

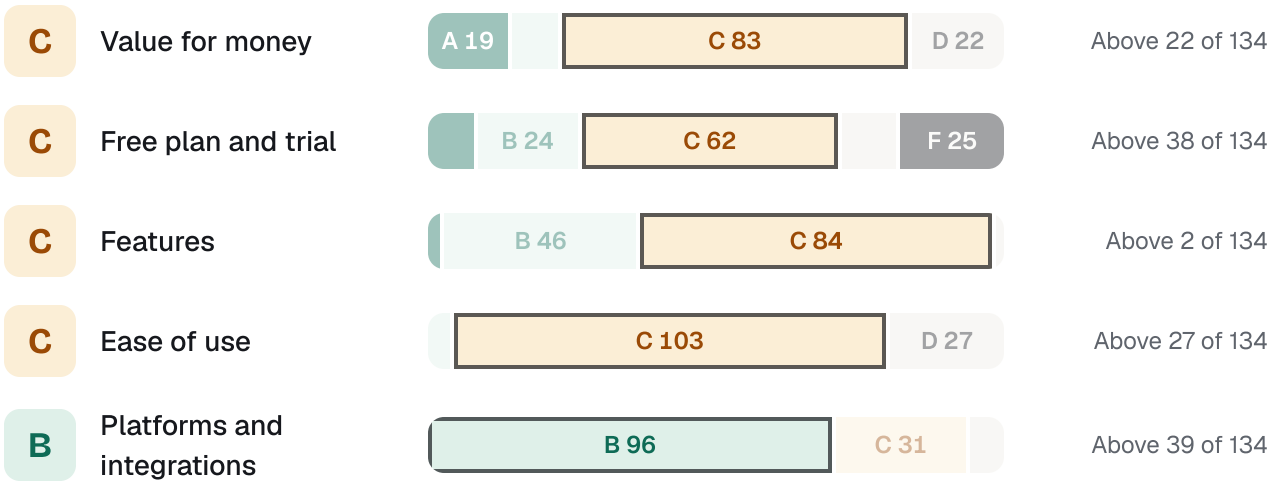

Other automation tools it is graded above

Bizagi's GPA of 2.2 is higher than 54 of the 134 other automation tools we grade, and level with 35.

It stands best on platforms and integrations (B, above 39 of 134) and worst on features (C, above 2).

Each grade against the category

Every bar is all 135 automation tools we grade, cut by the letter each got. Bizagi's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Bizagi you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Case management: an app builder makes this well.

What you could not

- Connections to other products, each kept working as those products change.
- A builder that other people can use without writing code.
- A tool that builds and hosts other apps.
- An AI agent, with the models and the safeguards behind it.
- A diagram editor.

What this rests on. Bizagi's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

Where this guide comes from

The prices, plans, platforms and features were read from Bizagi's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Bizagi's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews. The pricing page would not load as text when we checked, so the grades rest on the listing.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Bizagi. Prices change, so check bizagi.com before you buy.
