Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 11 of the 122 other email apps we grade

BlueMind is a French open-source email and calendar platform for organizations that host their own mail. It works natively with Outlook and also with webmail, mobile and Thunderbird. The vendor sells to public-sector bodies, companies and large organizations, and gives no prices on its website.

To get you started, here are **7 things to know about BlueMind**, taken from its own pages and our grades.

> **It publishes no prices, the site routes you to a demo request, and it's a server platform, not a service for individuals.**
>
> From our report card of BlueMind

1 **Best for open-source collaborative email with Outlook support**

BlueMind is open-source email and calendar for organisations, with native Outlook support and video meetings.

2 **It runs on Web**

Web.

3 Collaborative mailboxes

Webmail with aliases, groups, shared mailboxes, delegation, filters, S/MIME, templates, scheduled sending and full-text search.

4 Calendar and contacts

User, group and resource calendars with sharing, delegation and availability search, plus shared address books and distribution lists.

5 Native Outlook compatibility

The vendor says Outlook works with BlueMind natively, with no connectors, alongside webmail, mobile and Thunderbird access.

6 A 2.0 GPA, above 11 of 122

That is against the other email apps we grade, on value, the free plan, features, ease of use and platforms.

7 Keep it

To replace BlueMind you would be making an email client: sending, receiving, threading and searching years of mail. That is not a weekend's work, with an AI app builder or without one.

TOOLGPA REPORT CARD **BlueMind** Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No prices are published, so there's nothing to compare.
Free plan and trial	F	Nothing free is listed. Visitors are sent to request a demo.
Features	B	Collaborative mailboxes, calendar and contacts, native Outlook compatibility, video meetings and migration tooling. The listing shows no gap in the job.
Ease of use	C	No store rating on record. An organisation sets up the platform and accounts for its users.
Platforms and integrations	B	Web, with Outlook, Thunderbird, Teams, Zoom, Webex, Jitsi, Nextcloud and BigBlueButton connections.
Grade point average		Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who BlueMind is for

- ✓ Fits if your organisation wants shared mailboxes and calendars with Outlook support
- ✓ Works for IT teams that want an open-source platform with migration help

Who it is not for

- ✗ Skip it if you are one person, as the pages describe a server platform for organisations
- ✗ Skip it if you want a price first, since the site routes you to a demo
- ✗ Not for you if you want a free plan or a trial
- ✗ Watch out: pages are French-led, with some videos in French with subtitles

Good to know

Good for

- ✓ Public-sector bodies and universities that want French or EU-hosted mail
- ✓ Organizations replacing Exchange but keeping Outlook
- ✓ Teams that prefer an open-source codebase they can audit

Worth knowing

- ⓘ No prices are published; the site routes visitors to a demo request.
- ⓘ The pages describe a server platform for organizations, not a service for individual users.
- ⓘ Site and product pages are French-led, with some videos in French with subtitles.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

BlueMind's current pricing could not be confirmed from its own site.

> **No prices are published, so there's nothing to compare.**
>
> From our grade for value for money

We could not confirm BlueMind's current prices from its own site, so this guide lists no plans. bluemind.net has them.

Open-source collaborative email and calendar with Outlook support. Here is what it does, as its own site describes it, and what it covers: open source, calendar, email client, shared inbox.

> **Collaborative mailboxes, calendar and contacts, native Outlook compatibility, video meetings and migration tooling.**
>
> From our grade for features

Collaborative mailboxes

Webmail with aliases, groups, shared mailboxes, delegation, filters, S/MIME, templates, scheduled sending and full-text search.

Calendar and contacts

User, group and resource calendars with sharing, delegation and availability search, plus shared address books and distribution lists.

Native Outlook compatibility

The vendor says Outlook works with BlueMind natively, with no connectors, alongside webmail, mobile and Thunderbird access.

Video meetings

Calendar events can start a video conference on a platform the user picks. Listed integrations include Teams, Zoom, Webex, Jitsi and BigBlueButton.

Migration tooling

The vendor describes a tooled migration process meant to carry over both data and user context when an organization switches.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

11/122

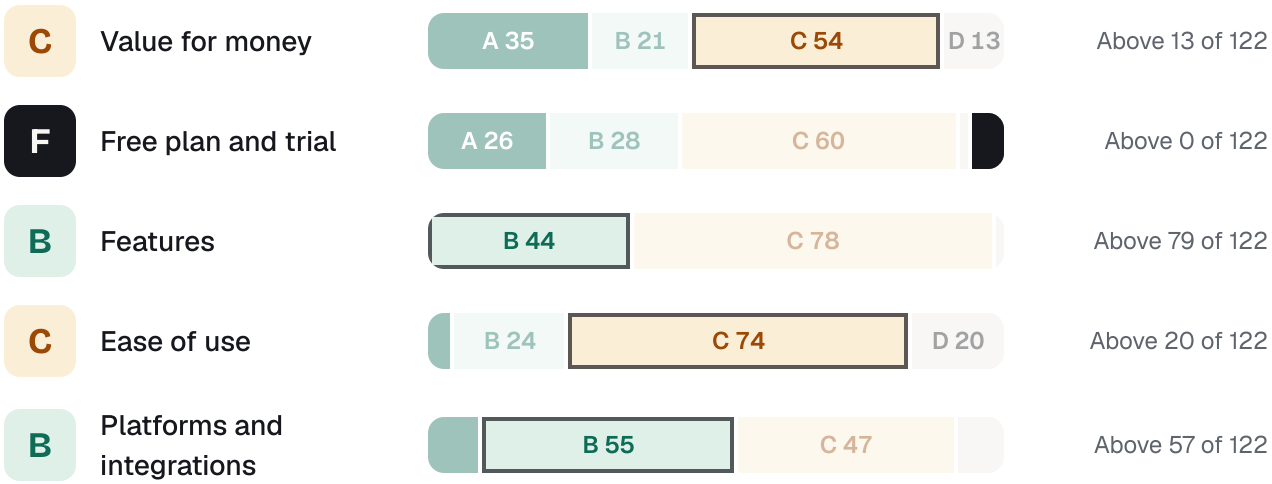

Other email apps it is graded above

BlueMind's GPA of 2.0 is higher than 11 of the 122 other email apps we grade, and level with 17.

It stands best on features (B, above 79 of 122) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 123 email apps we grade, cut by the letter each got. BlueMind's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace BlueMind you would be making an email client: sending, receiving, threading and searching years of mail. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 94 of the 122 other email apps grade higher. BlueMind is open source, so there is a third way: take its code and run it yourself.

What you could make

- Calendar: an app builder makes this well.

What you could not

- An email client: sending, receiving, threading and searching years of mail.
- One mailbox that several people work at once.
- It plugs into other products, Microsoft Outlook, Thunderbird and Microsoft Teams among them.
- Sharing with other people, which means accounts and invitations.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. BlueMind's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
