Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 37 of the 61 other email verification and deliverability tools we grade

Bounceless checks whether email addresses are valid, risky or unconfirmed before a send. It handles single checks, bulk list uploads and an API, and it labels catch-all domains instead of guessing. A paid plan adds sender-health and inbox-placement tools.

To get you started, here are **9 things to know about Bounceless**, taken from its own pages and our grades.

> **Upload a list or call the API; most platforms need a CSV round trip.**
>
> From our grade for ease of use

1 **Best for checking an email list with a free monthly allowance**

It has no native integrations, so most platforms mean exporting a CSV, checking it and importing it back.

2 **Paid plans start at $19 a month**

As its pricing page puts it: $19 per month for 6,500 verification credits, billed monthly.

3 **There is a free plan**

1,000 verification credits a month with a work email, no card required. Public email addresses do not get the free credits.

4 **It runs on Web**

Web.

5 **Single and bulk verification**

Check one address in the web checker, upload a CSV list in the workspace, or call the API. Each result comes with a Keep, Review or Remove call and the reason behind it.

6 **Catch-all resolution**

Domains that accept mail for any address get a second pass, and the result stays marked as unconfirmed when the mailbox cannot be confirmed. The extra pass is included in the one-credit price.

7 **Unconfirmed results are not billed**

The pricing page says unconfirmed verification results are not charged. Credits do not expire, whether they come from a subscription or a pack.

8 **A 2.4 GPA, above 37 of 61**

That is against the other email verification and deliverability tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

Nothing Bounceless does is plain enough to make in a weekend. The 2 things listed below take a company.

The report card

Best for checking an email list with a free monthly allowance

Bounceless verifies single addresses, lists and sign-up forms, and gives 1,000 credits a month free to people with a work email. It has no native integrations, so most platforms mean exporting a CSV, checking it and importing it back.

Bounceless

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	Starter is $19 a month for 6,500 credits, between the category's cheaper quarter ($15.83) and its middle ($23). Pay-as-you-go packs start at $19 too.
Free plan and trial	B	1,000 credits a month free with no card, but only with a work email; public addresses get none.
Features	C	Single and bulk checks, catch-all resolution, form checks, and unconfirmed results are not billed. No native app integrations yet.
Ease of use	C	No rating on record. Upload a list or call the API; most platforms need a CSV round trip.
Platforms and integrations	B	Web only, but with an API on the free plan and guides for eight platforms.

Grade point average — Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Bounceless is for

- ✓ Fits if you verify a few thousand addresses a month
- ✓ Works for developers who want a free API allowance to start with

Who it is not for

- ✕ Skip it if you sign up with a Gmail or other public address, as it gets no free credits
- ✕ Tight if you want live connections, as the guides export and re-import a CSV
- ✕ Pricey if you grow, with steps up to $249 a month for 300,000 credits
- ✕ Watch out: verification does not guarantee inbox placement, the vendor says so
- ✕ Watch out: Sender Health and Inbox Placement are separate from plain checking

Good to know

Good for

- ✓ Marketers cleaning a list before a campaign
- ✓ Developers adding an address check to a sign-up form
- ✓ Small senders who want credits that never expire

Worth knowing

- ⓘ The free 1,000 credits a month need a work email address; public addresses get none.
- ⓘ No native app integrations yet: the guides export a CSV from each platform, verify it and re-import it (Mailgun and SparkPost use their APIs).
- ⓘ Verification does not guarantee inbox placement, as the vendor states: delivery also depends on sender reputation and content.
- ⓘ Pay-as-you-go packs run from 5,000 credits for $19 up to 10,000,000 credits for $2,790, with no subscription.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Email verification for lists, single checks and sign-up forms. Here is what it does, as its own site describes it, and what it covers: public API, email verification.

> **Single and bulk checks, catch-all resolution, form checks, and unconfirmed results are not billed.**
>
> From our grade for features

Single and bulk verification

Check one address in the web checker, upload a CSV list in the workspace, or call the API. Each result comes with a Keep, Review or Remove call and the reason behind it.

Catch-all resolution

Domains that accept mail for any address get a second pass, and the result stays marked as unconfirmed when the mailbox cannot be confirmed. The extra pass is included in the one-credit price.

Unconfirmed results are not billed

The pricing page says unconfirmed verification results are not charged. Credits do not expire, whether they come from a subscription or a pack.

Sign-up form checks

The Doorman tool checks an address when someone submits a form or signs up, so bad entries can be caught before they reach a list.

Sender Health and Inbox Placement

Paid plans include domain checks, email tests, monitoring and check history, plus separate inbox placement tests compared by mailbox provider.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

37/61

Other email verification and deliverability tools it is graded above

Bounceless's GPA of 2.4 is higher than 37 of the 61 other email verification and deliverability tools we grade, and level with 16.

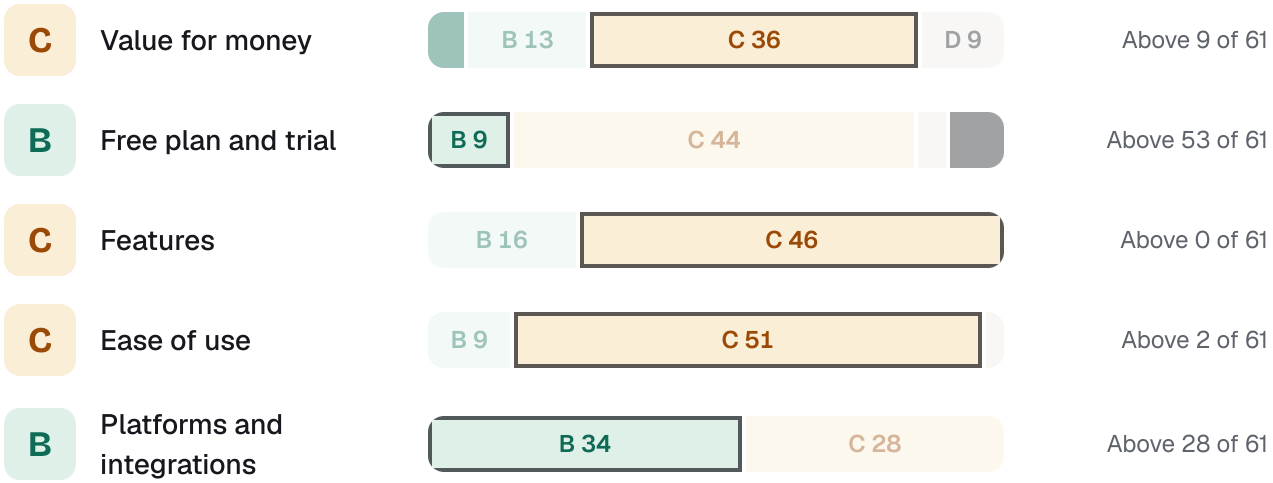

It stands best on free plan and trial (B, above 53 of 61) and worst on features (C, above 0).

Its paid plans start at $19 a month, against a middle price of $21.50 for the category: 16 of the 43 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 7 tools score higher and cost less.

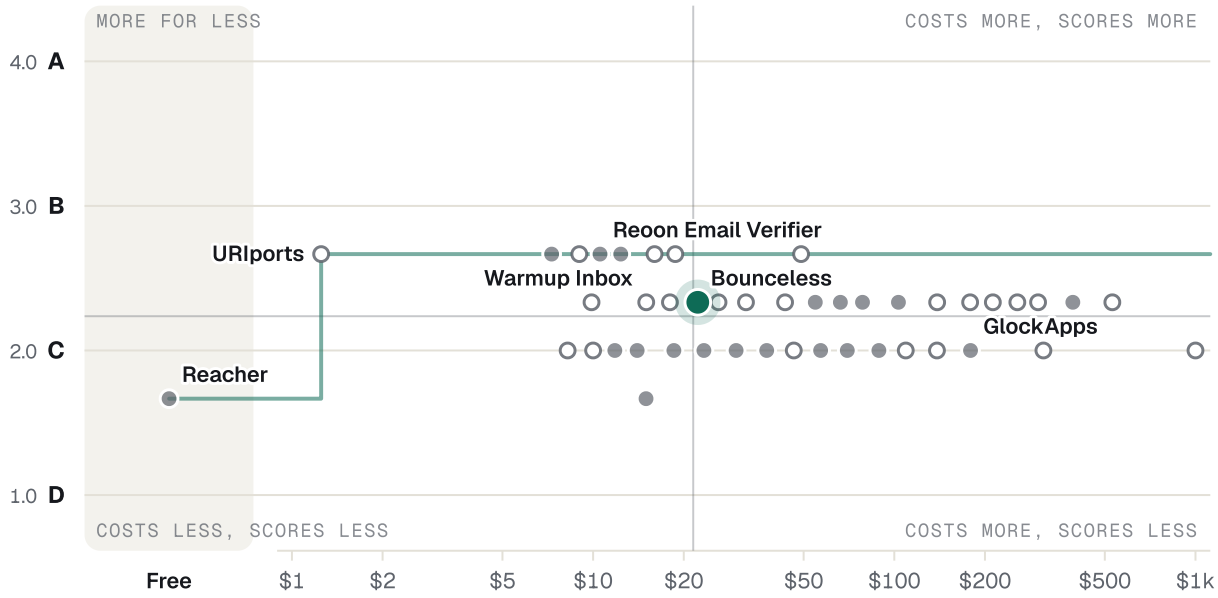

Each grade against the category

Every bar is all 62 email verification and deliverability tools we grade, cut by the letter each got. Bounceless's own letter is outlined.

Price against what you get

Each dot is one of 45 email verification and deliverability tools. Further left costs less; higher up scores better on features, ease of use and platforms. Bounceless is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Nothing Bounceless does is plain enough to make in a weekend. The 2 things listed below take a company.

It costs $228 a year.

What you could not

- ✕ Checking that an address exists without writing to it.
- ✕ It plugs into other products, ActiveCampaign, AWeber and Campaign Monitor among them, and has an API.

What this rests on. Bounceless's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
