Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Brands Gateway you would be making suppliers who ship each order for you. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 62 of the 70 other print-on-demand and dropshipping services grade higher. It costs $2,508 a year.

What you could make

- Inventory: an app builder makes this well.

What you could not

- Suppliers who ship each order for you.
- Checkout, card payments and sales tax handled for you.
- It plugs into other products, Shopify, Wix and WooCommerce among them, and has an API.

What this rests on. Brands Gateway's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
