# Welcome

What it is, who it suits, its grades and the ten things to know first

**1.8**

GPA, above 7 of the 149 other project management tools we grade

Bryntum Gantt is a Gantt chart library for JavaScript, React, Angular and Vue applications, aimed at developers rather than end users. A free open-source Community edition exists, and paid licenses are priced per developer per year. It is one of five Bryntum components that can also be bought as a bundle.

To get you started, here are **9 things to know about Bryntum Gantt**, taken from its own pages and our grades.

**1** **Best for developers who need a Gantt chart inside their own app**

Bryntum Gantt is a JavaScript component for React, Angular or Vue, with a free MIT Community edition.

**2** **Paid plans start at $58.25 a month when paid by the year**

As its pricing page puts it: $699 per developer / year.

**3** **There is a free plan**

Community edition, open source under the MIT license, including for commercial use.

**4** **It runs on Web**

Web.

**5** **Framework support**

Works with plain JavaScript and TypeScript, and with React, Angular and Vue.

**6** **Resource assignments**

Resource assignments and calendars come with the Business license.

**7** **Critical paths and baselines**

Enterprise adds baselines and critical path analysis.

**8** **A 1.8 GPA, above 7 of 149**

## The report card

### Best for developers who need a Gantt chart inside their own app

Bryntum Gantt is a JavaScript component for React, Angular or Vue, with a free MIT Community edition. It is a library, not a tool for managers, and the

useful parts such as critical paths and baselines sit on $1,100 a developer a year.

| TOOLGPA REPORT CARD | **Bryntum Gantt** | Graded Nov 12, 2026 |
|---|---|---|
| SUBJECT | GRADE | COMMENT |
| **Value for money** | D | Business is $699 a developer a year and Enterprise $1,100, far above the $30 a month for the dearest tenth of project tools. It is one app and one developer, with extras on top. |
| **Free plan and trial** | B | The Community edition is free under the MIT license, commercial use included, with fewer features. Trial terms aren't stated. |
| **Features** | C | Resource assignments, critical paths, baselines, MS Project import. It does the Gantt job fully, but the job is a component, with no tasks, chat or reporting beyond it. |
| **Ease of use** | D | No store rating, and you need code and a build to use it. |
| **Platforms and integrations** | C | Runs in the browser through React, Angular, Vue and TypeScript. No API or integrations list for managers. |
| **Grade point average** | | Weak, out of 4.0 **1.8** |

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

### Who Bryntum Gantt is for

- ✓ Fits if you are building software that needs a Gantt chart
- ✓ Works for a developer who can start on the free Community edition

### Who it is not for

- ✕ Not for you if you want a ready-made tool: it is a library, so you build the screens
- ✕ Pricey if you need baselines, critical paths or MS Project import: Enterprise is $1,100 a developer a year
- ✕ Watch out: a SaaS or commercial product that includes it needs an OEM licence quoted by sales
- ✕ Tight if you plan several apps or developers: the $699 and $1,100 figures cover one developer and one app

## Good to know

### Good for

- ✓ Developers adding a Gantt chart to an internal or commercial web app
- ✓ Teams that need source-level control rather than a hosted planner

### Worth knowing

- ⓘ It is a software library, not a ready-to-use project tool for managers.
- ⓘ Licenses are per developer, and the page shows $699 and $1,100 for one developer and one application; options such as premium support and floating licenses change the total.
- ⓘ Selling a SaaS or commercial product that includes it needs an OEM license quoted by sales.
- ⓘ The vendor lists 30% off for charity, environmental or educational work.

PART 04 · STANDING

# Where it stands

Its grades against its category, and whether to keep it or make your own

**7** /149

Other project management tools it is graded above

Bryntum Gantt's GPA of 1.8 is higher than 7 of the 149 other project management tools we grade, and level with 6.

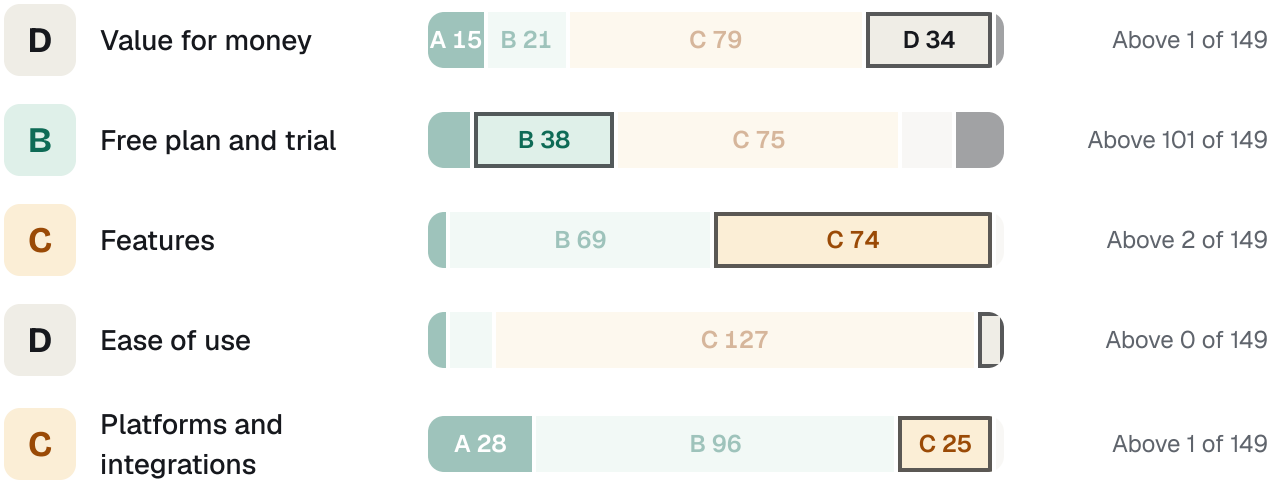

It stands best on free plan and trial (B, above 101 of 149) and worst on ease of use (D, above 0).

Its paid plans start at $58.25 a month when paid by the year, against a middle price of $9 for the category: 118 of the 121 others that charge start lower.

On features, ease of use and platforms it scores 1.7 out of 4. 120 tools score higher and cost less.

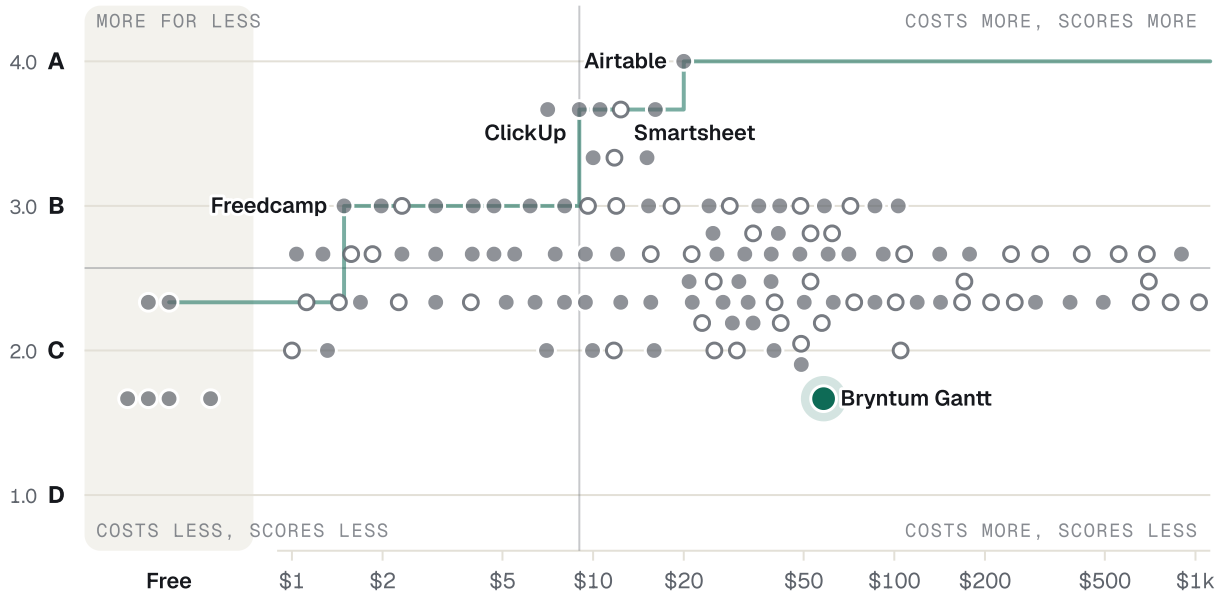

## Each grade against the category

Every bar is all 150 project management tools we grade, cut by the letter each got. Bryntum Gantt's own letter is outlined.

## Price against what you get

Each dot is one of 128 project management tools. Further left costs less; higher up scores better on features, ease of use and platforms. Bryntum Gantt is the marked dot.

## Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

### Your call

A project tool at its plainest is tasks on a board with an owner and a date.

You could make the core of Bryntum Gantt for yourself: Gantt & timelines. What you would give up is listed below. Whether that is worth the price is your call. It costs $699 a year. Bryntum Gantt is open source, so there is a third way: take its code and run it yourself.

### What you could make

- Gantt & timelines: an app builder makes this well.
- It runs in a browser, which is where something home-made would run too.

### What you could not

- AI features, unless you pay a model provider for each request yourself.

**What this rests on.** Bryntum Gantt's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
