Welcome

What it is, who it suits, its grades and the ten things to know first

3.0

GPA, above 132 of the 149 other project management tools we grade

Bugasura is a bug tracker and test management platform from Moolya. It captures issues through a Chrome reporter and a web widget, and adds requirements tracking, a knowledge base and AI agents it calls Asuras. The core platform is free with no user cap; a custom plan covers on-premises hosting and extra AI features.

To get you started, here are **8 things to know about Bugasura**, taken from its own pages and our grades.

1 **Best for free bug tracking with test management**

But custom pricing is not published, its own pages disagree on which AI helpers are early access, and no desktop or mobile apps are listed.

2 **There is a free plan**

Unlimited users, projects and bug reports, test management, the built-in Asuras and 50 GB of storage.

3 **It runs on Web**

Web, with a browser extension too.

4 **AI issue tracker**

Bug capture, triage and duplicate detection, with AI filling in report details.

5 **Test management**

Plan, run and track test cycles across sprints, with requirements linked to tests so coverage changes show up.

6 **Capture from the browser**

A Chrome reporter and an embeddable web widget let testers and users file bugs from the page they are on.

7 **A 3.0 GPA, above 132 of 149**

That is against the other project management tools we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace Bugasura you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for free bug tracking with test management

Bugasura is a bug tracker with test management and a Chrome reporter, free for unlimited users and projects with 50 GB of storage. But custom pricing is not published, its own pages disagree on which AI helpers are early access, and no desktop or mobile apps are listed.

TOOLGPA REPORT CARD **Bugasura** Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	A	The free plan has unlimited users, projects and bug reports, so it is free and substantial next to the $9 middle of the category.
Free plan and trial	A	Free forever with test management and 50 GB of storage. No cap a normal team would reach.
Features	C	Bug tracking, test management, browser capture and an MCP server. Its homepage and pricing page disagree on which Asuras are included or early access.
Ease of use	C	No store rating on record. Projects and the Jira or GitHub links have to be set up.
Platforms and integrations	B	Web and a Chrome extension, with Jira, GitHub, Asana, Slack, ClickUp and Linear links. No desktop or mobile apps.
Grade point average		Very good, out of 4.0 **3.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Bugasura is for

- ✓ Fits if you want a free bug tracker for a whole team
- ✓ Works for testers who file bugs from the browser

Who it is not for

- ✕ Skip it if you need on-premises, SSO or Testpert AI, as those go through a custom quote with no published price
- ✕ Watch out: the pricing page lists some AI helpers as included while the homepage calls them early access
- ✕ Too light for teams that want phone apps, as none are listed
- ✕ Tight if you store a lot of screenshots and video, as free storage stops at 50 GB

Good to know

Good for

- ✓ QA and engineering teams that want bug tracking and test cycles in one place
- ✓ Small teams: the free plan has no seat or project limit
- ✓ Teams already on Jira, GitHub or Slack that want a separate bug tracker linked to them

Worth knowing

- ⓘ Custom pricing is not published; the site points to on-premises deployment, Testpert AI and SSO as the reasons to ask for it.
- ⓘ The free plan has a 50 GB storage cap.
- ⓘ The pricing page lists Browser, API and Duplicate Bug Asuras as included, while the homepage labels the Browser, API, Duplicate and Mobile Asuras early access.
- ⓘ The pages read list a Chrome reporter and a web widget but no dedicated desktop or mobile apps.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Bugasura you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 3.0 is higher than 132 of the 149 other project management tools we grade.

What you could make

- Issue tracking: an app builder makes this well.

What you could not

- An AI agent, with the models and the safeguards behind it.
- It plugs into other products, Jira, GitHub and Asana among them, and has an API.
- Hooks into the device itself: widgets.

What this rests on. Bugasura's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
