PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

74/127

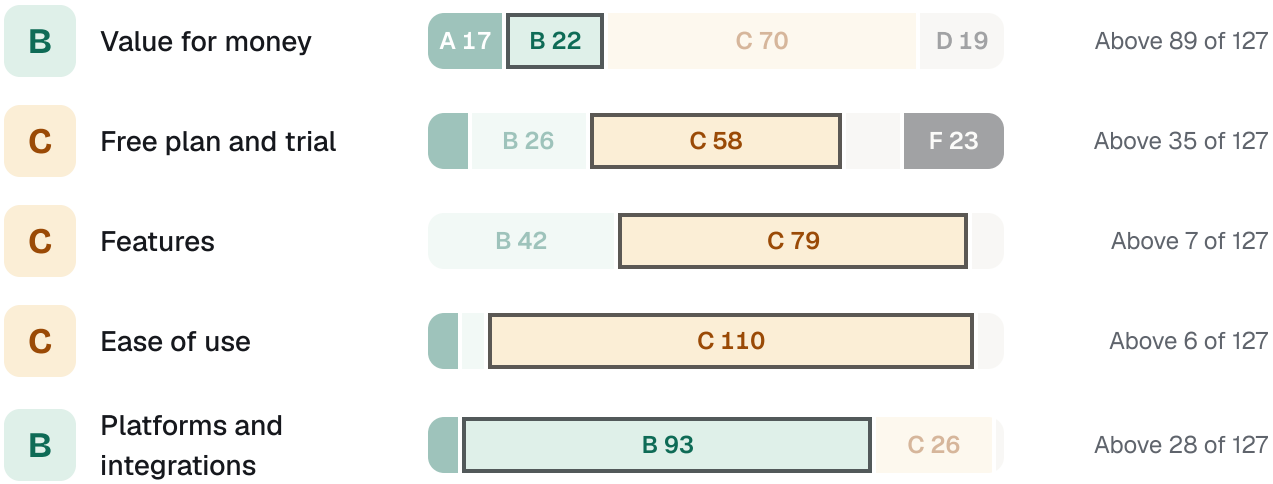

Other accounting and invoicing tools it is graded above

Bukku's GPA of 2.4 is higher than 74 of the 127 other accounting and invoicing tools we grade, and level with 19.

It stands best on value for money (B, above 89 of 127) and worst on ease of use (C, above 6).

Each grade against the category

Every bar is all 128 accounting and invoicing tools we grade, cut by the letter each got. Bukku's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Bukku you would be making live feeds from your bank, which take an agreement with each bank or a service that has them. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Invoicing, inventory, reports and expense tracking: an app builder makes these well.

What you could not

- × Live feeds from your bank, which take an agreement with each bank or a service that has them.
- × It plugs into other products, Maybank, Shopee and Lazada among them.

What this rests on. Bukku's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
