It stands best on features (B, above 53 of 70) and worst on ease of use (C, above 1).

Each grade against the category

Every bar is all 71 print-on-demand and dropshipping services we grade, cut by the letter each got. BurgerPrints's own letter is outlined.

Price against what you get

Each dot is one of 68 print-on-demand and dropshipping services. Further left costs less; higher up scores better on features, ease of use and platforms. BurgerPrints is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

BurgerPrints is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces.

What you could not

- ✕ Printers that make and ship each order.
- ✕ Suppliers who ship each order for you.
- ✕ It plugs into other products, Amazon, Etsy and Shopify among them, and has an API.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. BurgerPrints's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
