# Welcome

What it is, who it suits, its grades and the ten things to know first

## 2.0

GPA, above 8 of the 61 other email verification and deliverability tools we grade

Byteplant's Email-Validator checks addresses for syntax, DNS and MX records, disposable domains, misspelled domains and mailbox existence, and tests for catch-all and greylisting. It works on uploaded lists and CRM data, and through a real-time API. Credits never expire and are shared by list cleaning and the API.

To get you started, here are **9 things to know about Byteplant Email Validator**, taken from its own pages and our grades.

**1** **Best for thorough list checks with catch-all and greylisting tests**

Byteplant checks addresses end to end, including catch-all and greylisting tests, in bulk or by API.

**2** **What it costs**

Paid plans start at €0.00999 per credit at 50,000 credits (€499.50), shown in euros.

**3** **You can try it first**

1,000 free email address checks, no credit card required

**4** **It runs on Web**

Web.

**5** **End-to-end deliverability check**

Checks run from syntax and DNS or MX lookup through to SMTP mailbox existence checking.

**6** **Catch-all and greylisting tests**

Identifies domains that accept all mail and detects greylisting and temporary unavailability.

**7** **Disposable and misspelled domains**

Detects disposable email addresses and misspelled domains, including typosquatting.

**8** **A 2.0 GPA, above 8 of 61**

That is against the other email verification and deliverability tools we grade, on value, the free plan, features, ease of use and platforms.

**9** **Keep it**

Nothing Byteplant Email Validator does is plain enough to make in a weekend. The 3 things listed below take a company.

## Byteplant Email Validator

Graded Nov 13, 2026

| SUBJECT | GRADE | COMMENT |
|---|---|---|
| **Value for money** | D | €499.50 for 50,000 credits, about €0.00999 each, when other checkers sell 10,000 for $10 to $30. We graded it on the euro price shown. |
| **Free plan and trial** | C | 1,000 free checks with no card, once. No free plan. |
| **Features** | B | End-to-end checks, catch-all and greylisting tests, disposable and misspelled domains, API, de-duplication and data deletion. The listing names no gap. |
| **Ease of use** | C | No store rating on record. You upload lists or call the API. |
| **Platforms and integrations** | C | Web and API with only Zapier listed. No apps. |

**Grade point average** Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

### Who Byteplant Email Validator is for

- ✓ Fits if you want catch-all and greylisting tests on a big list
- ✓ Works for teams that want data deleted after checking

### Who it is not for

- ✗ Pricey if you check small lists, since the page starts its calculator at 50,000 credits
- ✗ Watch out: the page showed euros from India and dollars weren't confirmed
- ✗ Watch out: a monthly subscription exists but its prices weren't read
- ✗ Skip it if you want integrations, as only Zapier is listed

## Good to know

### Good for

- ✓ Teams that want credits shared between list cleaning and an API
- ✓ European buyers who prefer a German vendor with GDPR terms
- ✓ Companies that want phone and chat support

### Worth knowing

- ⓘ The pricing page loads its prices with a calculator and showed euros from India; US dollars were not confirmed.
- ⓘ A monthly subscription option exists, but its prices were not read.
- ⓘ A 30-day money-back guarantee is stated for orders.
- ⓘ Orders over the largest tier shown are quoted individually by email.

PART 04 · STANDING

# Where it stands

Its grades against its category, and whether to keep it or make your own

**8**/61

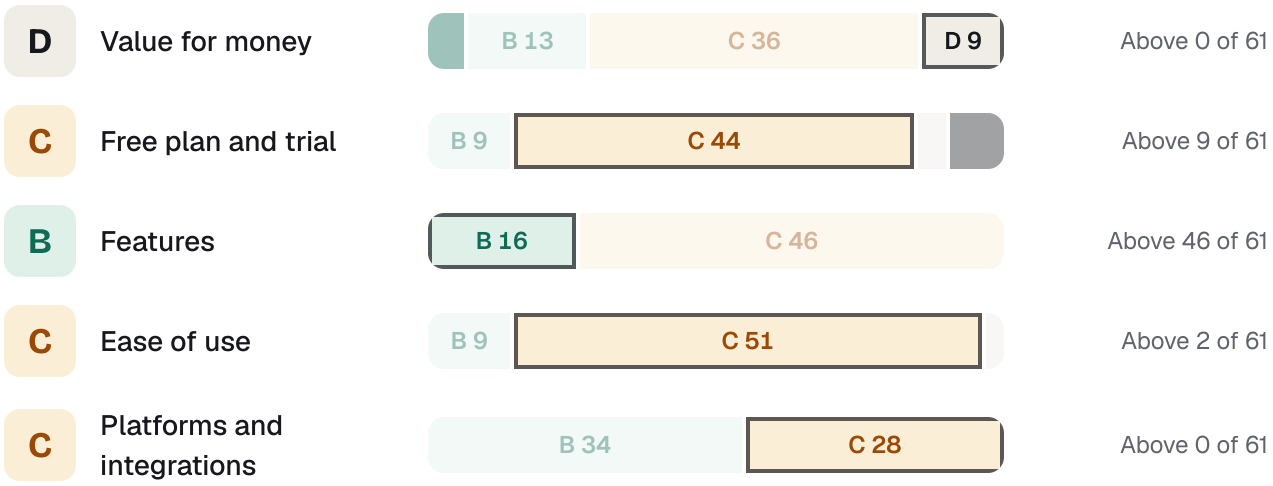

Other email verification and deliverability tools it is graded above

Byteplant Email Validator's GPA of 2.0 is higher than 8 of the 61 other email verification and deliverability tools we grade, and level with 14.

It stands best on features (B, above 46 of 61) and worst on value for money (D, above 0).

## Each grade against the category

Every bar is all 62 email verification and deliverability tools we grade, cut by the letter each got. Byteplant Email Validator's own letter is outlined.

## Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

## Keep it

Nothing Byteplant Email Validator does is plain enough to make in a weekend. The 3 things listed below take a company.

That makes this kind of software worth paying for, not this one in particular: 39 of the 61 other email verification and deliverability tools grade higher.

### What you could not

- ✕ Checking that an address exists without writing to it.
- ✕ It plugs into other products, Zapier among them, and has an API.
- ✕ The depth: we grade its features B, which means it covers the whole job.

**What this rests on.** Byteplant Email Validator's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
