Keep it, or make your own?

Keep it

To replace Carbonmade you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 65 of the 104 other website and landing page builders grade higher. It costs $99 a year.

What you could make

- Templates: an app builder makes this well.

What you could not

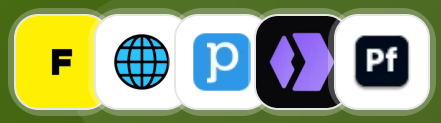

- A builder that other people can use without writing code.

	× A tracking script and a database that counts every visit.

What this rests on. Carbonmade's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
