Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 2 of the 25 other law practice software we grade

CASEpeer, now branded 8am CasePeer, is a cloud case management system made for personal injury firms. It tracks medical treatment, injuries, liens, settlements, case expenses and statute deadlines alongside the usual contacts, documents and calendars. Higher plans add client intake, two-way texting, more than 50 extra reports and, on Advanced, API access.

To get you started, here are **8 things to know about CASEpeer**, taken from its own pages and our grades.

> **No store rating is on record, and a case system needs your matters, stages and users set up.**
>
> From our grade for ease of use

1 **Best for personal injury firms tracking cases and treatment**

CASEpeer, now branded 8am CasePeer, is cloud case management for personal injury firms, with treatment, liens, settlements and a client portal.

2 **Paid plans start at $90 a month for each person**

As its pricing page puts it: $90 per user / month.

3 **It runs on Web**

Web.

4 **Personal injury case tracking**

Medical treatment, injuries, liens and letters of protection, case expenses, settlement calculations and automated statute alerts sit inside each case.

5 **Client portal and texting**

Clients see case information in a portal. Pro adds unlimited two-way texting that accepts images; Advanced adds scheduled texts.

6 **Intake and case stages**

From Pro, intake management, case stage screens and litigation event plans cover the path from a new lead to a filed case.

7 **A 1.6 GPA, above 2 of 25**

That is against the other law practice software we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

The plain part of CASEpeer you could make: case management, time tracking and reports. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

The report card

Best for personal injury firms tracking cases and treatment

CASEpeer, now branded 8am CasePeer, is cloud case management for personal injury firms, with treatment, liens, settlements and a client portal. It is $90 a user a month at the lowest tier, and intake, texting and the API sit on the dearer ones.

TOOLGPA REPORT CARD **CASEpeer** Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	D	Basic is $90 per user a month, which is where the dearest tenth of law-practice tools starts against a $59 middle, and the useful extras sit on Pro at $130.
Free plan and trial	F	No free plan and no trial; the page offers a demo with no card.
Features	C	Case tracking, treatment, liens, settlements and a client portal are there, but e-signature is an add-on, intake and texting start at Pro, and it is built for personal injury only.
Ease of use	C	No store rating is on record, and a case system needs your matters, stages and users set up.
Platforms and integrations	B	Web only, with Outlook, Microsoft 365, QuickBooks, Dropbox, LawPay, Zapier and EvenUp links. No native mobile app is listed, and API access needs Advanced.
Grade point average		Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who CASEpeer is for

- ✓ Fits if you run a personal injury firm and track treatment and liens
- ✓ Works for firms that want a client portal and statute alerts

Who it is not for

- ✕ Pricey if you add staff: $90 a user a month on Basic, $130 on Pro, $160 on Advanced
- ✕ Skip it if you practise anything but personal injury, since the vendor points other firms to MyCase
- ✕ Tight if you need intake or texting on Basic, as both start at Pro
- ✕ Watch out: e-signature is an add-on on every plan, and API access needs Advanced
- ✕ Watch out: the page does not say whether prices are billed monthly or annually

Good to know

Good for

- ✓ Plaintiff firms that handle personal injury cases
- ✓ Firms that track medical treatment, liens and settlements in the case file
- ✓ Firms that want texting and intake in the same system as case work

Worth knowing

- ⓘ Built for personal injury; the vendor points firms with other practice areas to its sister product MyCase.
- ⓘ The pricing page does not say whether prices are billed monthly or annually. It states no long-term contract or setup fee.
- ⓘ Intake, texting, extra reports and the AI assistant start at Pro ($130); API access needs Advanced ($160).
- ⓘ E-signature is an add-on on every plan, and the vendor does not list native mobile apps (the table says only mobile friendly).

Where it stands

Its grades against its category, and whether to keep it or make your own

2/25

Other law practice software it is graded above

CASEpeer's GPA of 1.6 is higher than 2 of the 25 other law practice software we grade, and level with 1.

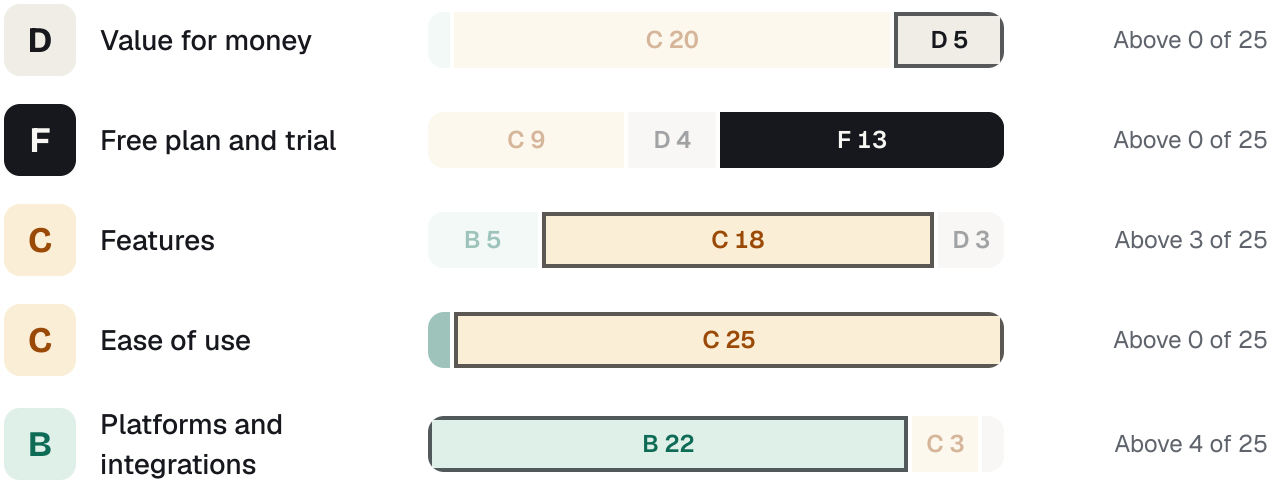

It stands best on platforms and integrations (B, above 4 of 25) and worst on free plan and trial (F, above 0).

Its paid plans start at $90 a month for each person, against a middle price of $59 for the category: 10 of the 10 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 2 tools score higher and cost less.

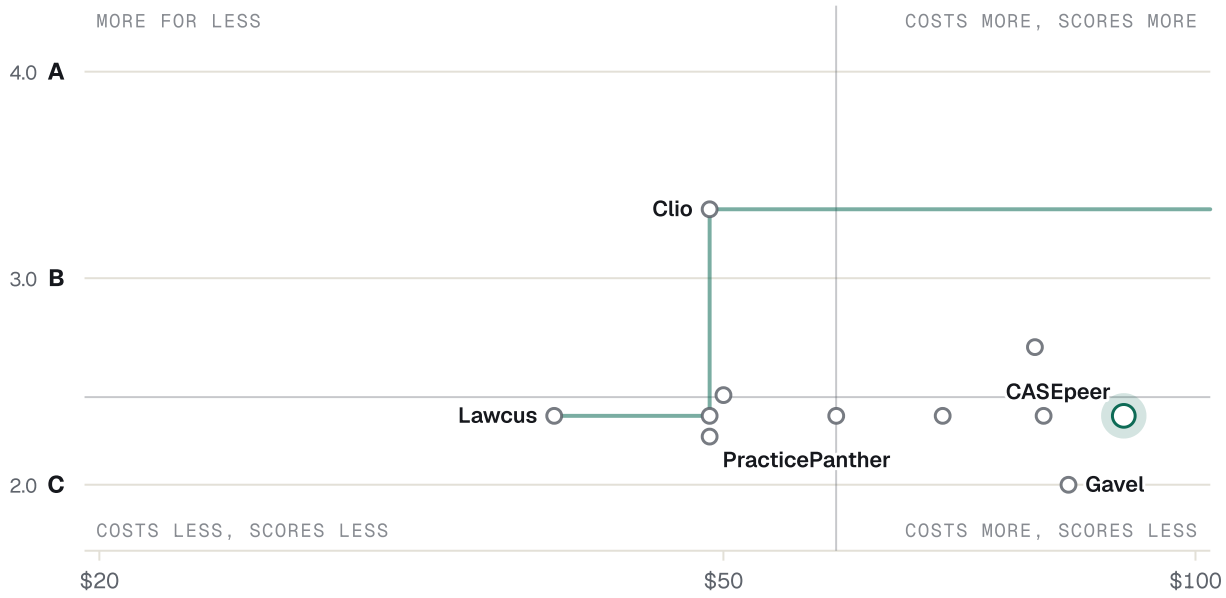

Each grade against the category

Every bar is all 26 law practice software we grade, cut by the letter each got. CASEpeer's own letter is outlined.

Price against what you get

Each dot is one of 11 law practice software. Further left costs less; higher up scores better on features, ease of use and platforms. CASEpeer is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of CASEpeer you could make: case management, time tracking and reports. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 22 of the 25 other law practice software grade higher. It costs $1,080 a year.

What you could make

- Case management, time tracking and reports: an app builder makes these well.

What you could not

- It is priced for each person, which means accounts and billing for a team.
- It plugs into other products, Outlook, Microsoft 365 and QuickBooks among them, and has an API.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. CASEpeer's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
