Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 30 of the 63 other HR software we grade

ChartHop is a people-operations platform that keeps employee data in one place and builds org charts, headcount planning, performance, goals, compensation and engagement modules on top, with an HRIS option. Pricing is a proposal sized to the team, requested through a short form.

To get you started, here are **7 things to know about ChartHop**, taken from its own pages and our grades.

> **No price is published: the pricing page is a three-question form that leads to a proposal.**
>
> From our report card of ChartHop

1 **Best for org charts and headcount planning**

ChartHop is built around org charts and people data, with headcount planning, performance, compensation and engagement on top.

2 **It runs on 2 platforms**

Web and iOS.

3 **Org charts and people data**

A core platform that collects employee data from connected systems, which leaders use to model scenarios and tradeoffs.

4 **Headcount planning**

A module for planning headcount, with AI-drafted plans mentioned in the October 2026 product updates.

5 **Performance and goals**

Performance reviews with a 9 Box calibration grid, and a goals module.

6 **A 2.0 GPA, above 30 of 63**

That is against the other HR software we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

The plain part of ChartHop you could make: employee records, reports, goals and surveys. What surrounds it you could not. The 5 things listed below take a company, not a weekend.

The report card

Best for org charts and headcount planning

ChartHop is built around org charts and people data, with headcount planning, performance, compensation and engagement on top. No price is

published: the pricing page is a three-question form that leads to a proposal. And since it is a core platform plus modules, the cost depends on what you add.

TOOLGPA REPORT CARD	ChartHop	Graded Nov 12, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	No price is published; the pricing page is a form that leads to a proposal, and the cost depends on the modules.
Free plan and trial	F	No free plan and no trial is on record in the listing or on its pricing page.
Features	B	Org charts, headcount planning, performance and goals, compensation, engagement and an HRIS. The listing names no gap in its own job.
Ease of use	C	No store rating on record. An org chart and planning tool needs data loaded in from your HR and payroll systems first.
Platforms and integrations	B	Web and iOS apps, with an integrations page (5 on record). The iOS app is a directory app, and no Android app was confirmed.
Grade point average		Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who ChartHop is for

- ✓ Fits if you plan headcount and compensation and want it drawn as an org chart
- ✓ Works for HR teams that already have a payroll system to feed it

Who it is not for

- ✗ Skip it if you want a price before talking to sales, as none is published
- ✗ Watch out: it is a core platform plus modules, so the bill depends on what you add
- ✗ Tight if you need an Android app, which was not confirmed
- ✗ Skip it if you want a free plan or trial, as none is listed

Good to know

Good for

- ✓ People and finance teams planning headcount together
- ✓ Companies that already have an HRIS and payroll and want planning on top
- ✓ HR teams that want org charts and reports built from live data

Worth knowing

- ⓘ No prices are published; the pricing page is a three-question form that leads to a proposal.
- ⓘ It is sold as a core platform plus modules, so cost depends on which modules you add.
- ⓘ The mobile app named on the site is a directory app on the App Store; no Android app was confirmed.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

ChartHop's current pricing could not be confirmed from its own site.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

30/63

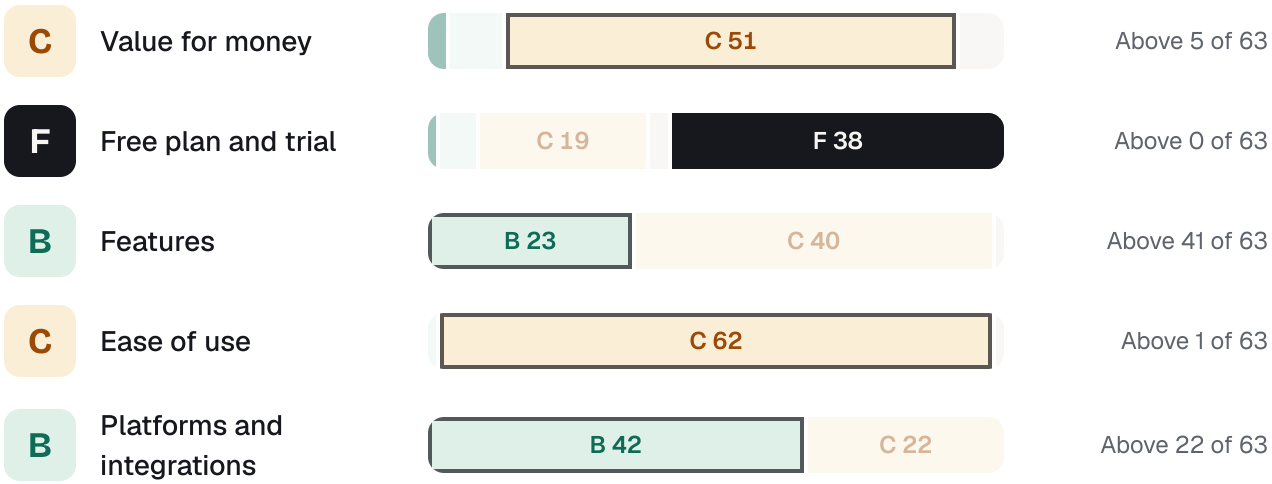

Other HR software it is graded above

ChartHop's GPA of 2.0 is higher than 30 of the 63 other HR software we grade, and level with 10.

It stands best on features (B, above 41 of 63) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 64 HR software we grade, cut by the letter each got. ChartHop's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of ChartHop you could make: employee records, reports, goals and surveys. What surrounds it you could not. The 5 things listed below take a company, not a weekend.

What you could make

- Employee records, reports, goals and surveys: an app builder makes these well.

What you could not

- Connections that pull numbers from dozens of other services.
- A real app for iOS. Something home-made would be a web page.
- It plugs into other products, ADP Workforce Now, BambooHR and Greenhouse among them.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. ChartHop's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
