Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 2 of the 127 other accounting and invoicing tools we grade

Chaser is accounts receivable software that connects to an accounting system, sends reminders on overdue invoices by email, SMS and automated calls, and forecasts incoming cash. Plans are sized by company revenue and priced in the hundreds of dollars a month. A paid Care add-on provides a dedicated receivables specialist.

To get you started, here are **9 things to know about Chaser**, taken from its own pages and our grades.

> **No store rating on record, and you connect your accounting system and build the follow-up workflows.**
>
> From our grade for ease of use

1 **Best for chasing late payers on top of Xero or QuickBooks**

Chaser sends reminders on overdue invoices by email, SMS and automated calls, and forecasts incoming cash.

2 **Paid plans start at $233 a month**

As its pricing page puts it: $233 per month and up, billed yearly ($259 billed monthly).

3 **You can try it first**

Free trial offered; its length is not stated on the pricing page

4 **It runs on Web**

Web.

5 **Automated payment chasing**

Sends reminder emails, SMS and automated phone calls on overdue invoices, using follow-up templates and workflows set up in advance.

6 **Accounting system sync**

Two-way integrations with accounting systems and ERPs, plus a CSV import tool and an API for systems without a direct connection.

7 **Cash flow and receivables forecasts**

Cash flow, revenue and receivables forecasts, plus payment prediction and AI debtor risk insights. The receivables forecast is listed on Complete.

8 **A 1.6 GPA, above 2 of 127**

That is against the other accounting and invoicing tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Chaser you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for chasing late payers on top of Xero or QuickBooks

Chaser sends reminders on overdue invoices by email, SMS and automated calls, and forecasts incoming cash. But it needs an accounting system to work from, plans start at $233 a month by revenue band, and the specialist service costs a lot more.

TOOLGPA REPORT CARD	Chaser	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	D	$233 a month on yearly billing is several times the category's $20 middle plan. The Core plan with unlimited users is $700 and Complete is $1,050.
Free plan and trial	D	A free trial whose length isn't stated, and no free plan.

SUBJECT	GRADE	COMMENT
Features	D	One narrow job, chasing overdue invoices, and it needs a connected accounting system to be useful.
Ease of use	C	No store rating on record, and you connect your accounting system and build the follow-up workflows.
Platforms and integrations	B	Web only, with Xero, QuickBooks and Business Central.
Grade point average		Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Chaser is for

- ✓ Fits if you have a pile of overdue invoices in Xero or QuickBooks
- ✓ Makes sense if a company with several million in revenue wants chasing automated

Who it is not for

- ✗ Pricey if you are small: $233 a month and up, set by revenue band
- ✗ Skip it if you don't already have an accounting system, because it works from one
- ✗ Tight if you're on Compact: 4 users, 30 templates and 4 automated workflows
- ✗ Watch out: the Care service starts at $1,199 a month
- ✗ Watch out: the free trial's length isn't stated

Good to know

Good for

- Finance teams chasing many overdue invoices by hand
- Mid-sized companies that want a cash forecast tied to receivables
- Businesses that would rather outsource chasing through the Care add-on

Worth knowing

- Pricing is set by company revenue band, and the dollar figures are entry prices shown as "From".
- Compact is limited to 4 users, 30 follow-up templates and 4 automated workflows.
- Care, the specialist service, costs more: Compact + Care starts at $1,199 a month billed monthly.
- The pricing page names bands in pounds, so the revenue limits are not dollar figures.

Where it stands

Its grades against its category, and whether to keep it or make your own

2/127

Other accounting and invoicing tools it is graded above

Chaser's GPA of 1.6 is higher than 2 of the 127 other accounting and invoicing tools we grade, and level with 9.

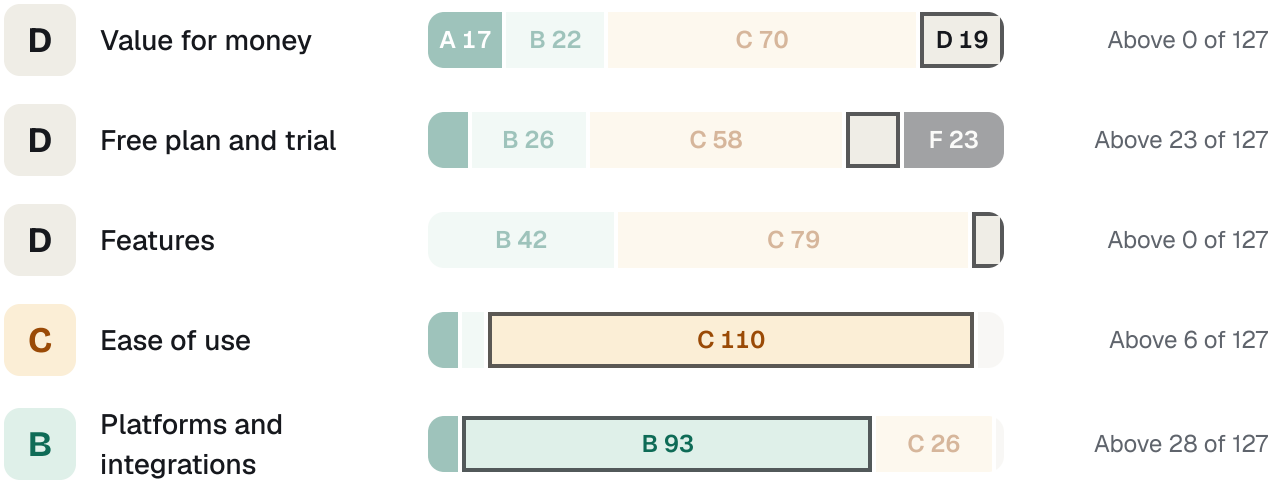

It stands best on platforms and integrations (B, above 28 of 127) and worst on value for money (D, above 0).

Its paid plans start at $233 a month, against a middle price of $18.09 for the category: 88 of the 90 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 78 tools score higher and cost less.

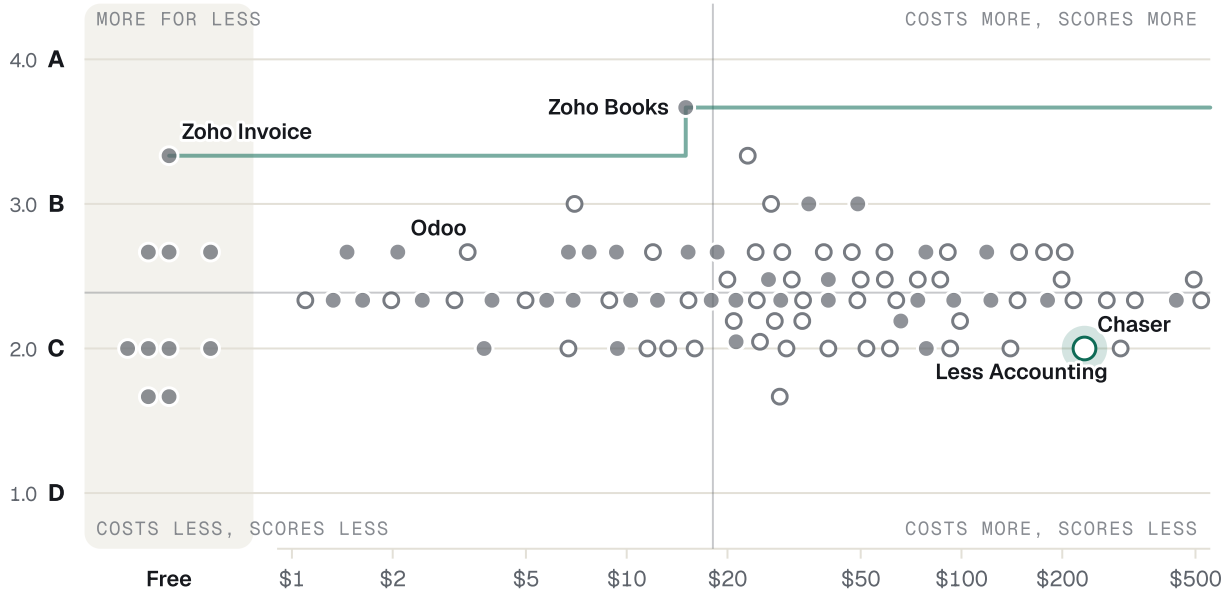

Each grade against the category

Every bar is all 128 accounting and invoicing tools we grade, cut by the letter each got. Chaser's own letter is outlined.

Price against what you get

Each dot is one of 101 accounting and invoicing tools. Further left costs less; higher up scores better on features, ease of use and platforms. Chaser is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Chaser you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 116 of the 127 other accounting and invoicing tools grade higher. It costs $2,796 a year.

What you could make

- Reports: an app builder makes this well.

What you could not

- Connections to other products, each kept working as those products change.
- Connections that pull numbers from dozens of other services.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Chaser's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
