Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 0 of the 87 other AI assistants we grade

ChatPlayground AI sends a single prompt to several chat models at once and shows each answer side by side. One subscription covers models from OpenAI, Anthropic, Google, DeepSeek, Meta, Perplexity and others without separate API keys. It also offers file chat, image generation, a prompt library and a way to combine several responses.

To get you started, here are **8 things to know about ChatPlayground AI**, taken from its own pages and our grades.

1 **Best for asking several chatbots the same question side by side**

ChatPlayground AI sends one prompt to several models and shows the answers side by side, with file chat, images and a prompt library behind one subscription.

2 **Paid plans start at $15 a month**

As its pricing page puts it: $15 per month, billed annually ($20 billed monthly).

3 It runs on Web

Web.

4 Compare mode

One prompt goes to up to 6 models at once and answers stream in parallel; any panel can be switched to another model.

5 Combine responses

An AI collaboration mode merges several models' answers into one refined response.

6 Chat with files and images

Upload PDFs, documents, spreadsheets, code or images and ask every selected model about them. Uploaded files are deleted after 3 days, according to the site.

7 A 1.6 GPA, above 0 of 87

That is against the other AI assistants we grade, on value, the free plan, features, ease of use and platforms.

8 Keep it

To replace ChatPlayground AI you would be making an AI model, which you can rent by the request but not make. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for asking several chatbots the same question side by side

ChatPlayground AI sends one prompt to several models and shows the answers side by side, with file chat, images and a prompt library behind one subscription. Plans are $15 a month billed yearly or $20 monthly, there's no free plan or trial, and on a phone it only compares two models at a time.

TOOLGPA REPORT CARD	ChatPlayground AI	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	$15 a month on yearly billing, which is the dearer quarter of AI assistants, and $20 if you pay monthly. The cost comparison on the page uses its own $20 estimates.
Free plan and trial	F	Nothing free: no plan and no trial on the page. You pay to see it work.
Features	C	Compare mode, combining answers, file and image chat, images and a prompt library. A focused job it does fully, with no API and no free route to try it.
Ease of use	C	No rating on record. It's a web page where you type a prompt and read the columns.
Platforms and integrations	C	Web only; on a phone it's the web app added to the home screen, comparing 2 models at a time.
Grade point average		Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who ChatPlayground AI is for

- ✓ Fits if you want to see how Claude, GPT and Gemini answer the same question
- ✓ Works for people who check one answer against several before trusting it

Who it is not for

- ✗ Skip it if you want to try before paying, as there's no free plan and no trial
- ✗ Pricey if you pay monthly: $20 against $15 on yearly billing
- ✗ Watch out: the cost comparison on the page uses the vendor's own $20-a-month figures
- ✗ Too light for phone use: it compares only 2 models at once there
- ✗ Watch out: the /pricing address returns a not-found page; the plans sit on the homepage

Good to know

Good for

- ✓ People who check one question against several models
- ✓ Writers and marketers who want several drafts from one prompt

Worth knowing

- ⓘ There is no free plan or free trial listed on the page; both plans are paid.
- ⓘ The page's separate-subscription cost comparison uses its own $20-a-month estimates, not current vendor prices.
- ⓘ On a phone it runs through the web app added to the home screen and compares 2 models at a time.
- ⓘ The pricing sits on the homepage, and the /pricing address returns a not-found page.

Where it stands

Its grades against its category, and whether to keep it or make your own

0/87

Other AI assistants it is graded above

ChatPlayground AI's GPA of 1.6 is higher than 0 of the 87 other AI assistants we grade, and level with 1.

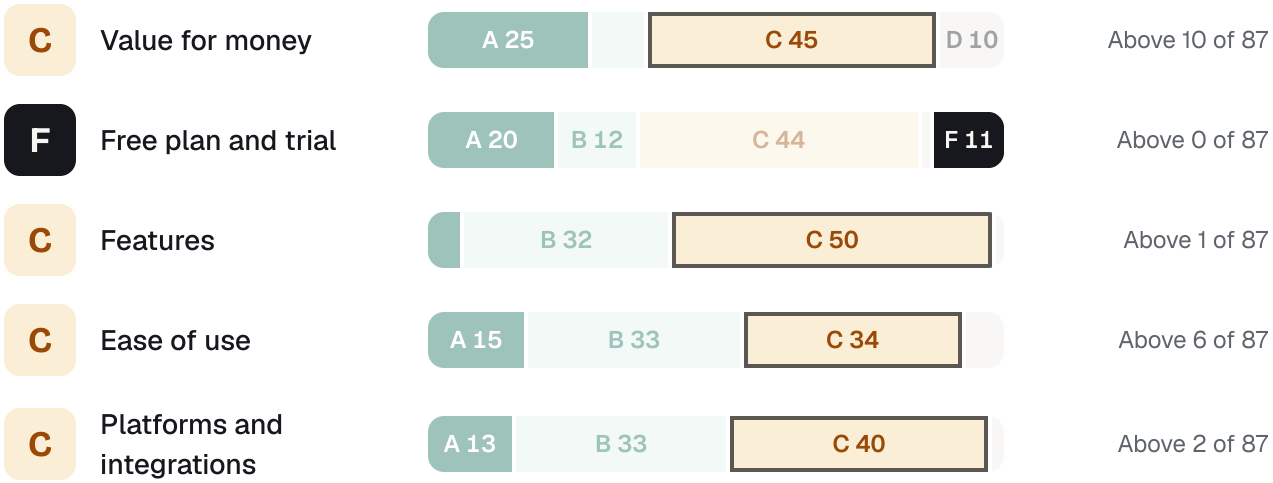

It stands best on value for money (C, above 10 of 87) and worst on free plan and trial (F, above 0).

Its paid plans start at $15 a month, against a middle price of $12.46 for the category: 32 of the 53 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 35 tools score higher and cost less.

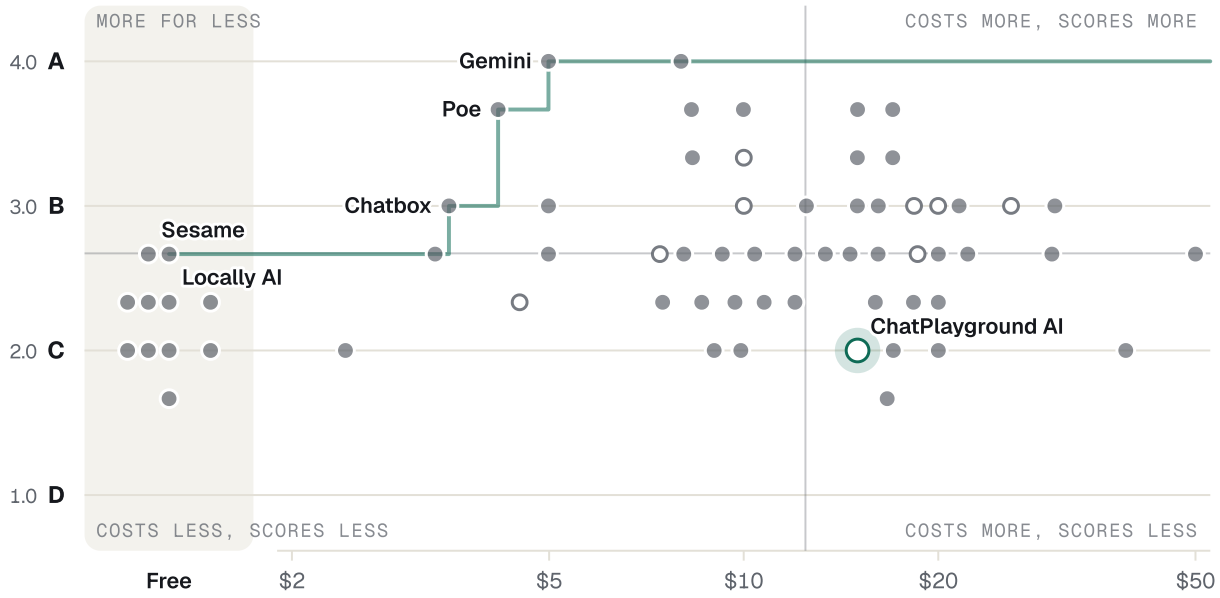

Each grade against the category

Every bar is all 88 AI assistants we grade, cut by the letter each got. ChatPlayground AI's own letter is outlined.

Price against what you get

Each dot is one of 65 AI assistants. Further left costs less; higher up scores better on features, ease of use and platforms. ChatPlayground AI is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace ChatPlayground AI you would be making an AI model, which you can rent by the request but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 86 of the 87 other AI assistants grade higher. It costs $180 a year.

What you could make

- Templates: an app builder makes this well.

What you could not

- An AI model, which you can rent by the request but not make.

- An image model, which you can rent by the picture but not make.
- A search engine with an AI model behind it.
- Sharing with other people, which means accounts and invitations.

What this rests on. ChatPlayground AI's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
