Where it stands

Its grades against its category, and whether to keep it or make your own

1/60

Other therapy and clinic software it is graded above

ChiroHD's GPA of 1.6 is higher than 1 of the 60 other therapy and clinic software we grade, and level with 13.

It stands best on features (B, above 39 of 60) and worst on free plan and trial (F, above 0).

Its paid plans start at $299 a month, against a middle price of $35.75 for the category: 32 of the 32 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 13 tools score higher and cost less.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace ChiroHD you would be making insurance claims sent to payers through a clearinghouse. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 46 of the 60 other therapy and clinic software grade higher. It costs $3,588 a year.

What you could make

- Clinical notes, appointment booking and review collection: an app builder makes these well.

What you could not

- Insurance claims sent to payers through a clearinghouse.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. ChiroHD's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
