07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Cisco Secure Endpoint's own pages, its app-store listings and our grades. Every fact in it is on Cisco Secure Endpoint's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 26 of the 56 other antivirus apps we grade

Cisco Secure Endpoint, formerly AMP for Endpoints, is a cloud-native endpoint security product that combines prevention, EDR and threat hunting. It draws on Cisco Talos threat intelligence, ties into Cisco XDR, and is sold to organizations through Cisco and its partners.

To get you started, here are **7 things to know about Cisco Secure Endpoint**, taken from its own pages and our grades.

1 **Best for Cisco shops that want endpoint protection and response**

Prices are not published, and it only really pays off if you want it tied into Cisco XDR and Duo.

2 **It runs on Web**

Web.

3 **Built-in or managed EDR**

Detection and response is included, with a managed option, plus threat hunting and risk-based vulnerability management from Kenna Security.

4 **Talos threat intelligence**

Cisco says detections come from Talos research, so a threat seen once can be blocked everywhere, with one-click isolation of an infected host.

5 **USB device control**

Admins create rules so only approved USB devices work, and blocked-device events appear in investigations.

6 **A 2.2 GPA, above 26 of 56**

That is against the other antivirus apps we grade, on value, the free plan, features, ease of use and platforms.

7

Keep it

To replace Cisco Secure Endpoint you would be making an engine that recognises new malware as it appears. That is not a weekend's work, with an AI app builder or without one.

Cisco Secure Endpoint at a glance

PRICING Paid	FREE PLAN No
FREE TRIAL None stated	RUNS ON Web
MADE BY Cisco	CATEGORY Antivirus & Malware Protection
OUR GRADE 2.2 GPA, fair	

The report card

Best for Cisco shops that want endpoint protection and response

Cisco Secure Endpoint, formerly AMP for Endpoints, adds built-in or managed detection and response, threat hunting and USB device control, backed by Cisco's Talos research. Prices are not published, and it only really pays off if you want it tied into Cisco XDR and Duo. It is not a consumer antivirus.

TOOLGPA REPORT CARD **Cisco Secure Endpoint** Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published, so there is nothing to set against this category's $2.58 to $6.50 a month; the listing says it is by quote. Buying goes through Cisco or a partner.
Free plan and trial	D	The page points to trials and demos on a separate Cisco page whose terms were not read, so we cannot grade it above a D.
Features	B	Detection and response, threat hunting, USB device control, vulnerability management and an XDR link. The listing names no gap in the core job.
Ease of use	C	Business product with a console and agents to roll out; no store rating is on record and the listing shows setup work, so it sits at the ordinary grade.
Platforms and integrations	B	A web console with real integrations: Cisco XDR, Duo, Talos and Kenna Security. Supported operating systems and phone apps are not listed.
Grade point average		Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Cisco Secure Endpoint is for

- ✓ Fits if you already run Cisco XDR or Duo and want endpoint data in the same place
- ✓ Works for teams that want a managed threat-hunting option from the vendor

Who it is not for

- ✕ Not for you if you want a published price, since buying goes through Cisco or a partner
- ✕ Skip it if you want a consumer antivirus, as this is sold to businesses
- ✕ Watch out: the trial terms were not read and supported operating systems are not on the page
- ✕ Too light for a small shop with no security staff to read alerts

Good to know

Good for

- ✓ Organizations already invested in Cisco security and networking
- ✓ Teams that want threat hunting and an XDR view from one vendor

Worth knowing

- ⓘ No prices are published on the product page; buying goes through Cisco or a partner.
- ⓘ The page offers trials and demos through a separate Cisco page, and its terms were not read.
- ⓘ It is sold to businesses, not as a consumer antivirus.
- ⓘ Supported operating systems are not listed on the page read, so platforms show only the cloud console.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Cisco Secure Endpoint's current pricing could not be confirmed from its own site.

> **The page points to trials and demos on a separate Cisco page whose terms were not read, so we cannot grade it above a D.**
>
> From our grade for free plan and trial

We could not confirm Cisco Secure Endpoint's current prices from its own site, so this guide lists no plans. cisco.com has them.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Cloud-native endpoint protection and EDR, formerly AMP for Endpoints. Here is what it does, as its own site describes it, and what it covers: AI features, malware protection.

> **Detection and response, threat hunting, USB device control, vulnerability management and an XDR link.**
>
> From our grade for features

Built-in or managed EDR

Detection and response is included, with a managed option, plus threat hunting and risk-based vulnerability management from Kenna Security.

Talos threat intelligence

Cisco says detections come from Talos research, so a threat seen once can be blocked everywhere, with one-click isolation of an infected host.

USB device control

Admins create rules so only approved USB devices work, and blocked-device events appear in investigations.

Cisco XDR link

Unifies incidents across Cisco products and runs automated playbooks from Cisco XDR.

Talos threat hunting

Cisco analysts search a customer's environment for threats, map findings to MITRE ATT&CK and send alerts with remediation advice.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

26/56

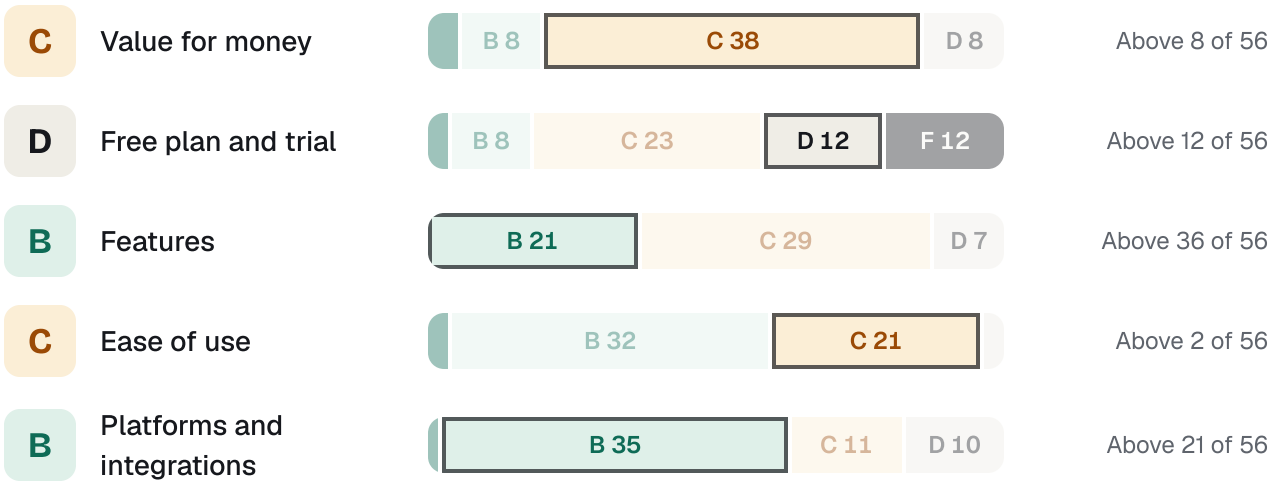

Other antivirus apps it is graded above

Cisco Secure Endpoint's GPA of 2.2 is higher than 26 of the 56 other antivirus apps we grade, and level with 5.

It stands best on features (B, above 36 of 56) and worst on free plan and trial (D, above 12).

Each grade against the category

Every bar is all 57 antivirus apps we grade, cut by the letter each got. Cisco Secure Endpoint's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Cisco Secure Endpoint you would be making an engine that recognises new malware as it appears. That is not a weekend's work, with an AI app builder or without one.

What you could not

- ✕ An engine that recognises new malware as it appears.
- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Cisco Secure Endpoint's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

CrowdStrike Falcon Go, Sophos Home and WithSecure Elements

The 3 tools Cisco Secure Endpoint is most often weighed against, with where each one differs from it.

2.2 GPA

CrowdStrike Falcon Go

Free trial · from $59.99/yr

Small-business antivirus with USB device control and mobile protection.

- Only Cisco Secure Endpoint lists a web app.
- Only CrowdStrike Falcon Go lists Windows, macOS, Linux, iOS and Android apps.

Cisco Secure Endpoint and CrowdStrike Falcon Go compared in full

2.4 GPA

Sophos Home

Free trial · from $59.99/yr

Business-grade antivirus for up to 10 Windows PCs and Macs.

- Only Cisco Secure Endpoint lists a web app.
- Only Sophos Home lists Windows, macOS, Android and iOS apps.

Cisco Secure Endpoint and Sophos Home compared in full

2.4
GPA

WithSecure Elements

Free trial · from €16.90/mo

Modular endpoint, exposure and MDR platform from WithSecure.

- Only WithSecure Elements lists Windows, macOS, Linux, iOS and Android apps.
- WithSecure Elements also covers reports.

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

10

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Cisco Secure Endpoint free?

No. Cisco Secure Endpoint is a paid product.

What platforms does Cisco Secure Endpoint work on?

Cisco Secure Endpoint is available on Web.

Does Cisco Secure Endpoint have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Cisco Secure Endpoint is listed for Web.

Does Cisco Secure Endpoint have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Cisco Secure Endpoint is listed for Web.

Is Cisco Secure Endpoint open source?

Cisco Secure Endpoint is not described as open source on its own site, as read on Nov 13, 2026.

What does Cisco Secure Endpoint integrate with?

Cisco Secure Endpoint's listing names Cisco XDR, Duo, Cisco Talos and Kenna Security.

Who makes Cisco Secure Endpoint?

Cisco Secure Endpoint is made by Cisco.

What are the alternatives to Cisco Secure Endpoint?

The closest alternatives to Cisco Secure Endpoint in our directory are CrowdStrike Falcon Go, Sophos Home and WithSecure Elements.

How does Cisco Secure Endpoint compare with other antivirus apps?

Cisco Secure Endpoint's GPA of 2.2 is higher than 26 of the 56 other antivirus apps we grade, and level with 5.

Could I make my own version of Cisco Secure Endpoint?

To replace Cisco Secure Endpoint you would be making an engine that recognises new malware as it appears.

Where this guide comes from

The prices, plans, platforms and features were read from Cisco Secure Endpoint's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Cisco's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Cisco. Prices change, so check cisco.com before you buy.
