PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

0/41

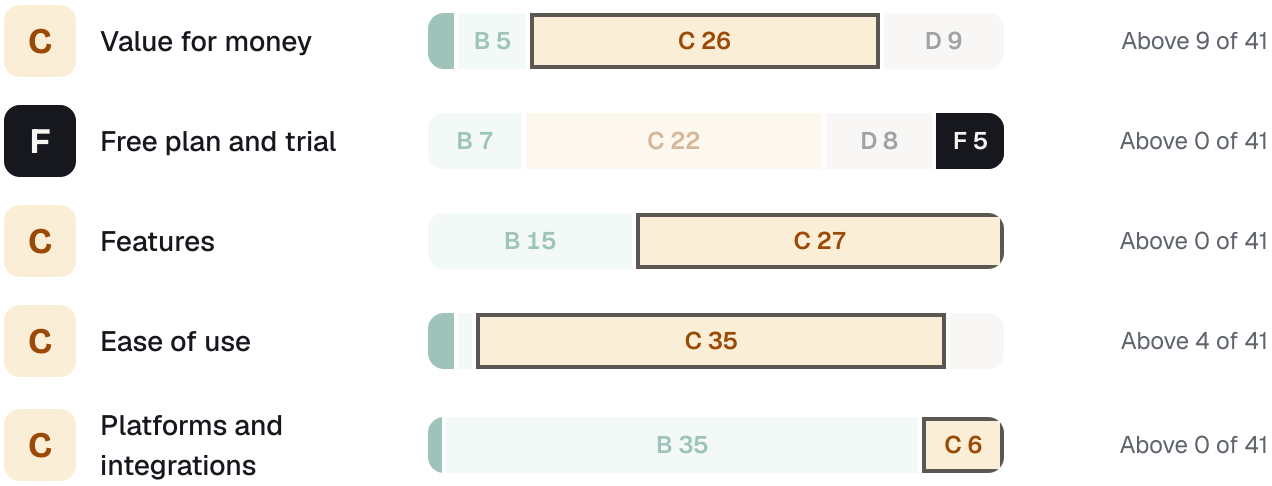

Other course and community platforms it is graded above

Classplus's GPA of 1.6 is higher than 0 of the 41 other course and community platforms we grade, and level with 3.

It stands best on value for money (C, above 9 of 41) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 42 course and community platforms we grade, cut by the letter each got. Classplus's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Classplus you would be making email sent in volume that still reaches the inbox. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 38 of the 41 other course and community platforms grade higher.

What you could make

- Online courses and reports: an app builder makes these well.

What you could not

- Email sent in volume that still reaches the inbox.
- People on the other end: coaches. No app builder makes those.

What this rests on. Classplus's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
