07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Cleric's own pages, its app-store listings and our grades. Every fact in it is on Cleric's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 64 of the 178 other AI agents we grade

Cleric is an AI SRE service that checks each production change for regressions and investigates alerts. It reads from observability, cloud and code tools, proposes fixes for approval, and is used from Slack, Microsoft Teams, a web app or MCP clients. Billing is by credits rather than by seat.

To get you started, here are **9 things to know about Cleric**, taken from its own pages and our grades.

> **No store rating on record, and it has to be wired into your alerting and chat tools first.**
>
> From our grade for ease of use

1 **Best for checking changes and chasing alerts for engineering teams**

Cleric is an AI that verifies production changes and investigates alerts, charging in credits at $0.50 each.

2 **Paid plans start at $700 a month**

As its pricing page puts it: $700 per month for 1,400 credits.

3 **You can try it first**

1,000 evaluation credits after approval, with no time limit.

4 **It runs on Web**

Web.

5 Change verification

Each production change, usually one per pull request, is watched for up to 14 days. If a regression appears, Cleric reports the cause and proposes a fix.

6 Alert investigation

An Issue can start from an alert, monitor or failed deploy. Cleric looks for the root cause, verifies it and proposes a fix; repeat alerts join the open Issue.

7 Operational memory

Cleric stores service relationships, infrastructure patterns, team guidance and earlier results for use in later investigations.

8 A 2.0 GPA, above 64 of 178

That is against the other AI agents we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace Cleric you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for checking changes and chasing alerts for engineering teams

Cleric is an AI that verifies production changes and investigates alerts, charging in credits at $0.50 each. The cheapest plan is $700 a month, and scheduled agents, SAML sign-in and the audit log are not on it, so this is priced for companies, not individuals.

TOOLGPA REPORT CARD — **Cleric** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	D	Team is $700 a month for 1,400 credits, far above the category's $150 dearest-tenth line. Each change checked costs 2 credits and each Issue investigated costs 10.
Free plan and trial	C	1,000 evaluation credits with no time limit, but only after approval, so you cannot just sign up and try it.
Features	C	Change checks, alert investigation, memory of past incidents and custom agents. Scheduled agents and the audit log are left off the Team plan.
Ease of use	C	No store rating on record, and it has to be wired into your alerting and chat tools first.
Platforms and integrations	B	Web, with Slack, Teams, MCP and a list of eight integrations. No desktop or phone app.
Grade point average		Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Cleric is for

- ✓ Fits if a team spends hours a week checking deploys and triaging alerts
- ✓ Works for companies that already chat in Slack or Teams and want answers there

Who it is not for

- ✗ Pricey if you are small: nothing is listed below $700 a month
- ✗ Tight if you want one price, as credits are used per change, per issue and per chat minute
- ✗ Watch out: scheduled agents, the Connector, Okta/SAML sign-in and the audit log are not in Team
- ✗ Watch out: unused credits roll over only one month, up to twice the monthly allowance
- ✗ Not for you if you want to try it right away, because the evaluation credits need approval

Good to know

Good for

- ✓ Engineering teams that want alerts triaged before a person is paged
- ✓ Teams that merge many pull requests and want each change checked in production
- ✓ Companies that prefer usage-based credits over per-seat pricing

Worth knowing

- ⓘ Credits are $0.50 each: 2 per change verified, 10 per Issue investigated, and 1 per started minute of chat after the first 30 seconds.
- ⓘ Monthly credits roll over for one month, up to twice the monthly allocation; annual plans use one pool for the year.
- ⓘ Scheduled agents, the Cleric Connector, Okta/SAML sign-in and the audit log are not in the Team plan.
- ⓘ The pricing page lists no self-serve plan below $700 per month; evaluation credits require approval.

PART 02 · PRICING

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$700

A month to start

Cleric is a paid product with a free trial, starting at $700 per month for 1,400 credits.

TEAM

$700

per month for 1,400 credits ($8,400 billed annually)

Unlimited users and integrations, custom agents and alert routing, memory and investigation history. Email support.

PRO

$1,500

per month for 3,000 credits ($18,000 billed annually)

Team plus scheduled agents and monitors, the Cleric Connector for private resources, Okta and SAML/OIDC, and an audit log.

SCALE

$3,000

per month for 6,000 credits ($36,000 billed annually)

Pro plus a shared Slack channel with Cleric engineers.

ENTERPRISE

Custom

Annual billing only, with custom retention and region, a negotiated DPA, vendor security reviews and a customer success manager.

Trying it first

1,000 evaluation credits after approval, with no time limit.

Read from cleric.ai on Nov 13, 2026.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

AI agents that watch production changes and alerts. Here is what it does, as its own site describes it, and what it covers: AI features, workflow automation, AI agents.

"

Change checks, alert investigation, memory of past incidents and custom agents.

From our grade for features

Change verification

Each production change, usually one per pull request, is watched for up to 14 days. If a regression appears, Cleric reports the cause and proposes a fix.

Alert investigation

An Issue can start from an alert, monitor or failed deploy. Cleric looks for the root cause, verifies it and proposes a fix; repeat alerts join the open Issue.

Operational memory

Cleric stores service relationships, infrastructure patterns, team guidance and earlier results for use in later investigations.

Custom agents and routing

Teams can define agents with their own instructions and send matching alerts from Slack or Microsoft Teams to them. Scheduled agents need the Pro plan.

Slack, Teams, web and MCP

Cleric can be used in Slack, Microsoft Teams or the web app, and from MCP clients such as Claude Code and Cursor. It can also call your own MCP servers.

Where it runs

- Web

What it works with

- Datadog
- Grafana
- Prometheus
- New Relic
- Splunk
- Elasticsearch
- Slack
- Microsoft Teams

Cleric is made by Cleric, and has been around since 2023.

Where it stands

Its grades against its category, and whether to keep it or make your own

64/178

Other AI agents it is graded above

Cleric's GPA of 2.0 is higher than 64 of the 178 other AI agents we grade, and level with 16.

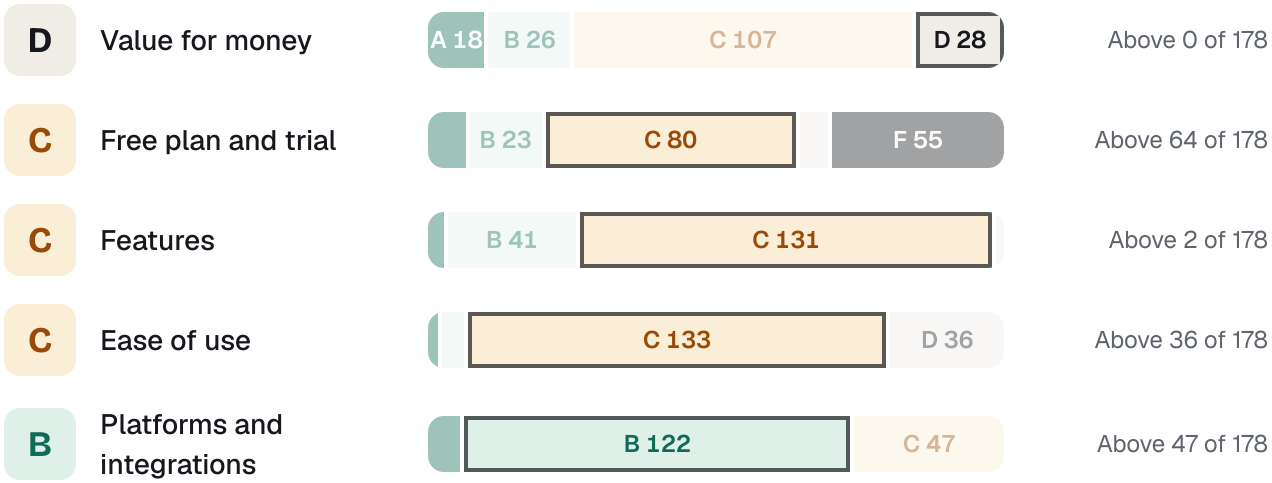

It stands best on platforms and integrations (B, above 47 of 178) and worst on value for money (D, above 0).

Its paid plans start at $700 a month, against a middle price of $25 for the category: 97 of the 98 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 37 tools score higher and cost less.

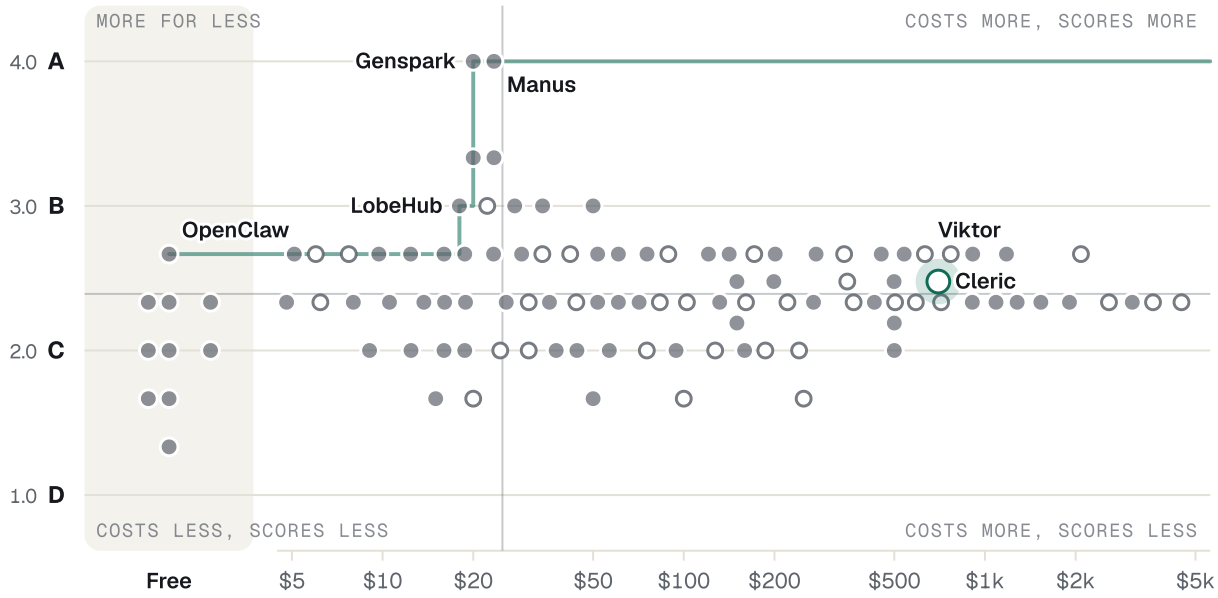

Each grade against the category

Every bar is all 179 AI agents we grade, cut by the letter each got. Cleric's own letter is outlined.

Price against what you get

Each dot is one of 109 AI agents. Further left costs less; higher up scores better on features, ease of use and platforms. Cleric is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Cleric you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

It costs $8,400 a year.

What you could not

- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ Connections to other products, each kept working as those products change.

What this rests on. Cleric's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Resolve AI, Traversal and Devin

The 3 tools Cleric is most often weighed against, with where each one differs from it.

1.8 GPA

Resolve AI

Paid

AI SRE agents for on-call, incidents and production tasks.

Cleric and Resolve AI compared in full

1.8 GPA

Traversal

Paid

AI SRE that triages alerts and finds root causes.

Cleric and Traversal compared in full

2.4
GPA

Devin

Free plan · from $20/mo

Autonomous software engineer that runs in the cloud or locally.

- Devin has a free plan. Cleric does not, though it has a free trial.
- Only Devin lists macOS, Windows and Linux apps.
- Cleric also covers workflow automation.

Quick answers

The questions people ask about it, each answered in a line or two

12

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Cleric free?

No, Cleric is a paid product, but you can try it first. 1,000 evaluation credits after approval, with no time limit.

How much does Cleric cost?

Cleric lists 4 plans. Team: $700 per month for 1,400 credits ($8,400 billed annually).

What platforms does Cleric work on?

Cleric is available on Web.

Does Cleric have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Cleric is listed for Web.

Does Cleric have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Cleric is listed for Web.

Is Cleric open source?

Cleric is not described as open source on its own site, as read on Nov 13, 2026.

What does Cleric integrate with?

Cleric's listing names Datadog, Grafana, Prometheus, New Relic, Splunk, Elasticsearch, Slack and Microsoft Teams.

Who makes Cleric?

Cleric is made by a company of the same name. It dates from 2023.

What are the alternatives to Cleric?

The closest alternatives to Cleric in our directory are Resolve AI, Traversal and Devin.

How does Cleric compare with other AI agents?

Cleric's GPA of 2.0 is higher than 64 of the 178 other AI agents we grade, and level with 16.

Is Cleric good value for money?

ToolGPA grades Cleric D for value for money. Its paid plans start at $700 a month, against a middle price of $25 for the category: 97 of the 98 others that charge start lower.

Could I make my own version of Cleric?

To replace Cleric you would be making an AI agent, with the models and the safeguards behind it.

Where this guide comes from

The prices, plans, platforms and features were read from Cleric's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Cleric's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Cleric. Prices change, so check cleric.ai before you buy.
