Welcome

What it is, who it suits, its grades and the ten things to know first

2.6

GPA, above 14 of the 46 other voice dictation apps we grade

CleverType is a keyboard for iPhone and Android, with a desktop app and browser extensions, that adds AI writing help to whatever app you type in. It fixes grammar, changes tone and writes replies, and its voice typing turns speech into punctuated text with filler words removed.

To get you started, here are **9 things to know about CleverType**, taken from its own pages and our grades.

If you change your mind mid-sentence only the final wording is written, and fillers such as um and uh are dropped.

7 Grammar and tone

Fix grammar with one tap, or rewrite in a chosen tone such as professional, casual or polite, or in a custom tone.

8 A 2.6 GPA, above 14 of 46

It stands best on value for money (A, above 22 of 46) and worst on features (C, above 1).

Each grade against the category

Every bar is all 47 voice dictation apps we grade, cut by the letter each got. CleverType's own letter is outlined.

Price against what you get

Each dot is one of 35 voice dictation apps. Further left costs less; higher up scores better on features, ease of use and platforms. CleverType is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace CleverType you would be making dictation that types into any app on your computer. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 24 of the 46 other voice dictation apps grade higher. It costs $59.88 a year.

What you could not

- ✕ Dictation that types into any app on your computer.
- ✕ An AI model, which you can rent by the request but not make.

- ✕ Grammar checking as you type, wherever you type.
- ✕ Apps for macOS, Windows, iOS and Android that stay in step with each other.

What this rests on. CleverType's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
