Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Clinicient's own pages, its app-store listings and our grades. Every fact in it is on Clinicient's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 1 of the 60 other therapy and clinic software we grade

Clinicient's Insight platform is an EMR and billing system for physical, occupational and speech-language pathology organizations. It ties documentation to charge capture and adds scheduling, outcomes tracking, home exercise programs and revenue cycle services. Pricing is available only through a demo request.

To get you started, here are **7 things to know about Clinicient**, taken from its own pages and our grades.

> **No store rating on record, and an enterprise rollout needs setup with the vendor.**
>
> From our grade for ease of use

1 **Best for EMR and billing for large rehab therapy groups**

No price is published, plans come after a demo, and it covers rehab therapy only.

2 **It runs on Web**

Web.

3 **Rehab-specific documentation**

Insight EMR offers goal tracking, smart copy-forward between visits, voice-to-text transcription and bookmarks for clinical content.

4 **Charge intelligence**

Charge codes are generated from clinical documentation, and the system applies assistant modifiers, CCI edits and Medicare therapy threshold tracking.

5 **Scheduling and intake**

Color-coded appointment types, waitlist management, online scheduling, digital intake and automated appointment reminders.

6 **A 1.6 GPA, above 1 of 60**

That is against the other therapy and clinic software we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Clinicient you would be making insurance claims sent to payers through a clearinghouse. That is not a weekend's work, with an AI app builder or without one.

Clinicient at a glance

PRICING Paid	FREE PLAN No

MADE BY Clinicient	CATEGORY Therapy & Clinic Software
OUR GRADE 1.6 GPA, weak	

The report card

Best for EMR and billing for large rehab therapy groups

Clinicient is an EMR and billing system for PT, OT and speech therapy, with HL7 links to hospital systems and outcomes reporting. No price is published, plans come after a demo, and it covers rehab therapy only.

TOOLGPA REPORT CARD	Clinicient	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published; plans are quoted after a demo request, so it can't be set against the category's $39 middle.
Free plan and trial	F	No free plan and no trial on record, only a demo through the sales team.
Features	C	Rehab documentation, charge intelligence, scheduling, billing, outcomes and exercise programs. It is built for rehab therapy only, so it is a narrower job than a general therapy system.
Ease of use	C	No store rating on record, and an enterprise rollout needs setup with the vendor.
Platforms and integrations	C	Web only on the listing, with no desktop or phone app named.
Grade point average		Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Clinicient is for

- ✓ Fits if you run a multi-clinic PT, OT or speech organization
- ✓ Works for teams that need HL7 connections to hospital systems

Who it is not for

- ✕ Not for you if you are a solo therapist wanting a price list, since plans are quoted after a demo
- ✕ Skip it if you do mental health or primary care, as it is rehab only
- ✕ Too light for a trial: none is listed
- ✕ Watch out: the site links to WebPT and Keet Health, related products from the same group

Good to know

Good for

- ✓ Larger multi-clinic PT, OT and speech therapy organizations
- ✓ Practices that need HL7 connections to hospital systems
- ✓ Teams that want outcomes reporting and billing from one vendor

Worth knowing

- ⓘ No prices are published; plans are quoted after a demo request, so no price is recorded here.
- ⓘ The vendor describes the platform as enterprise-grade and lists no free plan or trial.
- ⓘ Built for rehab therapy only; it is not a general mental health or primary care system.
- ⓘ The site links to WebPT and Keet Health, which are related products from the same group.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Clinicient's current pricing could not be confirmed from its own site.

> **No free plan and no trial on record, only a demo through the sales team.**

From our grade for free plan and trial

We could not confirm Clinicient's current prices from its own site, so this guide lists no plans. clinicient.com has them.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Insight EMR and billing for PT, OT and speech therapy. Here is what it does, as its own site describes it, and what it covers: reports, clinical notes, insurance billing, appointment booking.

> **Rehab documentation, charge intelligence, scheduling, billing, outcomes and exercise programs.**
>
> From our grade for features

Rehab-specific documentation

Insight EMR offers goal tracking, smart copy-forward between visits, voice-to-text transcription and bookmarks for clinical content.

Charge intelligence

Charge codes are generated from clinical documentation, and the system applies assistant modifiers, CCI edits and Medicare therapy threshold tracking.

Scheduling and intake

Color-coded appointment types, waitlist management, online scheduling, digital intake and automated appointment reminders.

Billing and revenue cycle

Electronic and paper claims go out with the associated chart notes, and a separate revenue cycle management service sits alongside the billing software.

Outcomes and exercise programs

Outcomes management and a QCDR for MIPS reporting, plus a home exercise program, come through the Keet Health products linked from the site.

Interoperability

The vendor says the EMR supports HL7 messages such as ADT, MDM, ORU, SIU, DFT and ORM, and has a real-time data store for analytics.

Web

What it works with

Its own pages name no integrations.

Clinicient is made by Clinicient.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

1/60

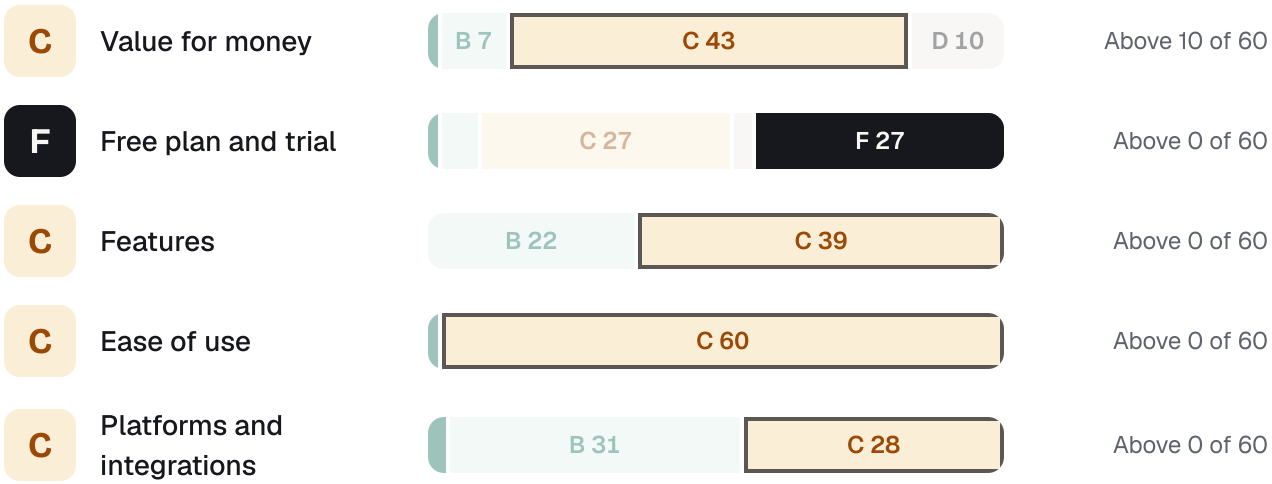

Other therapy and clinic software it is graded above

Clinicient's GPA of 1.6 is higher than 1 of the 60 other therapy and clinic software we grade, and level with 13.

It stands best on value for money (C, above 10 of 60) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 61 therapy and clinic software we grade, cut by the letter each got. Clinicient's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Clinicient you would be making insurance claims sent to payers through a clearinghouse. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 46 of the 60 other therapy and clinic software grade higher.

What you could make

- Clinical notes, appointment booking and reports: an app builder makes these well.

What you could not

- Insurance claims sent to payers through a clearinghouse.

What this rests on. Clinicient's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side
