Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 49 of the 89 other AI image and video generators we grade

Clipdrop is a browser-based set of AI image tools: background removal and replacement, object and text cleanup, upscaling, relighting, uncropping and resizing, plus a text-to-image generator. Free use is capped per day, and Pro raises most caps to 1,000 uses a day at high resolution. It was built by InitML, which Stability bought in 2023 and sold to Jasper in 2024.

To get you started, here are **9 things to know about Clipdrop**, taken from its own pages and our grades.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Clipdrop you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

It costs $180 a year.

What you could not

- ✕ An image model, which you can rent by the picture but not make.
- ✕ An API that other software can build on.

- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Clipdrop's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
