07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Cloud 66's own pages, its app-store listings and our grades. Every fact in it is on Cloud 66's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 99 of the 122 other web hosts we grade

Cloud 66 is a deployment and server management platform. You connect a Git repository and a cloud provider (or your own servers), and it builds, deploys and monitors the application, including containerized apps, background jobs, static sites and managed databases. It does not sell servers, so hosting costs are paid to the cloud provider separately.

> "
>
> **You connect cloud accounts and set up servers and apps.**
>
> From our grade for ease of use

To get you started, here are **9 things to know about Cloud 66**, taken from its own pages and our grades.

1 **Best for deploying apps to servers in your own cloud account**

Cloud servers are billed separately, and server, site, member and build-minute caps push you up the plans.

2 **Paid plans start at $23 a month**

As its pricing page puts it: $23 per month, billed annually (Developer; $59 billed monthly for Team).

3 **There is a free plan**

1 deployment server and 1 static site, 5 deployments per 24 hours, 1 team member, no card required.

4 **It runs on Web**

Web.

5 **Deploy to any cloud**

Connect a Git repository and a cloud provider such as AWS, Google Cloud or Azure, or deploy to your own servers or a mix of both.

6 **Native and containerized apps**

Runs apps directly on virtual machines or in containers, with background jobs, scheduled tasks and deployment hooks.

7 **Zero-downtime deployments**

Health checks and zero-downtime deployments are part of the platform, with failover groups and autoscaling listed on the plan comparison.

8 **A 2.4 GPA, above 99 of 122**

That is against the other web hosts we grade, on value, the free plan, features, ease of use and platforms.

9 **Your call**

Cloud 66 sits between: not beyond making, and not a weekend's work either.

The report card

Best for deploying apps to servers in your own cloud account

Cloud 66 deploys and manages apps on servers in your own cloud account, with a free plan for 1 server and 1 static site. Cloud servers are billed separately, and server, site, member and build-minute caps push you up the plans.

TOOLGPA REPORT CARD	Cloud 66	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	Developer is $23 a month billed annually for 2 servers, just above the $20.83 dearer-quarter line for web hosting. Your cloud servers are billed separately.
Free plan and trial	B	A free plan with 1 server, 1 static site, 5 deployments per 24 hours and 1 team member, no card. Light use fits inside it.
Features	C	Deploys to any cloud, native and containerised apps, zero-downtime deploys, databases and backups, static sites and team controls. Plans cap servers at 1, 2, 4 and 7.
Ease of use	C	No store rating on record. You connect cloud accounts and set up servers and apps.
Platforms and integrations	B	Web only, but it works with AWS, Google Cloud, Azure and Slack, and has an API.
Grade point average		Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Cloud 66 is for

- ✓ Fits if you deploy a small app or two to your own cloud servers
- ✓ Works for teams that want one console across several clouds

Who it is not for

- ✕ Tight if you need more than 1 server on the free plan, or 5 deployments a day
- ✕ Pricey if you add servers, which cost $12 a month each, or sites at $10 a month
- ✕ Watch out: extra team members are $5 a month and extra build minutes $0.03 each
- ✕ Watch out: prices shown are annual, and only Team lists a monthly price

Good to know

Good for

- ✓ Developers who want a PaaS-style workflow on servers they own
- ✓ Teams moving off Heroku who need to keep their own cloud account
- ✓ Small teams running a handful of servers

Worth knowing

- ⓘ Cloud servers are not included; you pay your cloud provider separately.
- ⓘ Plans cap servers (1, 2, 4 and 7) and static sites; extra servers cost $12 per month and extra sites $10.
- ⓘ Extra team members cost $5 per month and extra build minutes $0.03 each beyond the plan's allowance.
- ⓘ Prices shown are the annual rate, and only Team lists its monthly-billed price on the page.

PART 02 · PRICING

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$23

A month to start. There is a free plan too

Cloud 66 has a free plan. Paid plans start at $23 per month, billed annually (Developer; $59 billed monthly for Team).

> **Your cloud servers are billed separately.**
>
> From our grade for value for money

FREE

$0

1 server and 1 static site, 5 deployments per 24 hours, 50 build minutes, 1 GB of static-site traffic, 1 hour of metrics.

DEVELOPER

$23

per month, billed annually

Up to 2 servers and 2 static sites, 50 deployments per 24 hours, 200 build minutes, 100 GB static-site traffic, Slack support.

TEAM

$47

per month, billed annually ($59 billed monthly)

Up to 4 servers and 5 static sites with unlimited deployments, 10 team members and 1,000 GB static-site traffic.

BUSINESS

$80

per month, billed annually

Up to 7 servers and 10 static sites, 30 team members, 5,000 GB of static-site traffic and 30 days of metrics.

ENTERPRISE

Custom

For more than 50 servers: on-prem and dedicated options, onboarding support, a dedicated account manager and invoicing.

The free plan

1 deployment server and 1 static site, 5 deployments per 24 hours, 1 team member, no card required.

STARTUPS

Startup and education pricing

The FAQ says qualified startups and educational institutions get special pricing, arranged through the sales team.

Stated on cloud66.com

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Deploy and manage apps on your own servers and cloud accounts. Here is what it does, as its own site describes it, and what it covers: public API, databases.

> **Deploys to any cloud, native and containerised apps, zero-downtime deploys, databases and backups, static sites and team controls.**
>
> From our grade for features

Deploy to any cloud

Connect a Git repository and a cloud provider such as AWS, Google Cloud or Azure, or deploy to your own servers or a mix of both.

Native and containerized apps

Runs apps directly on virtual machines or in containers, with background jobs, scheduled tasks and deployment hooks.

Zero-downtime deployments

Health checks and zero-downtime deployments are part of the platform, with failover groups and autoscaling listed on the plan comparison.

Managed databases and backups

Managed databases are listed on every plan. Managed backup storage is billed at $0.38 per GB on paid plans.

Static sites and preview deployments

Hosts sites built with generators such as Jekyll and Hugo, and the comparison table lists preview deployments from branches, tags or pull requests.

Team controls and API

Full API access, audit logs, live logs and cost management alerts are listed, with SAML SSO and user provisioning in the comparison table.

Where it runs

Web

What it works with

AWS

Google Cloud

Azure

Slack

Cloud 66 is made by Cloud66, Inc., and has been around since 2012.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

99/122

Other web hosts it is graded above

Cloud 66's GPA of 2.4 is higher than 99 of the 122 other web hosts we grade, and level with 14.

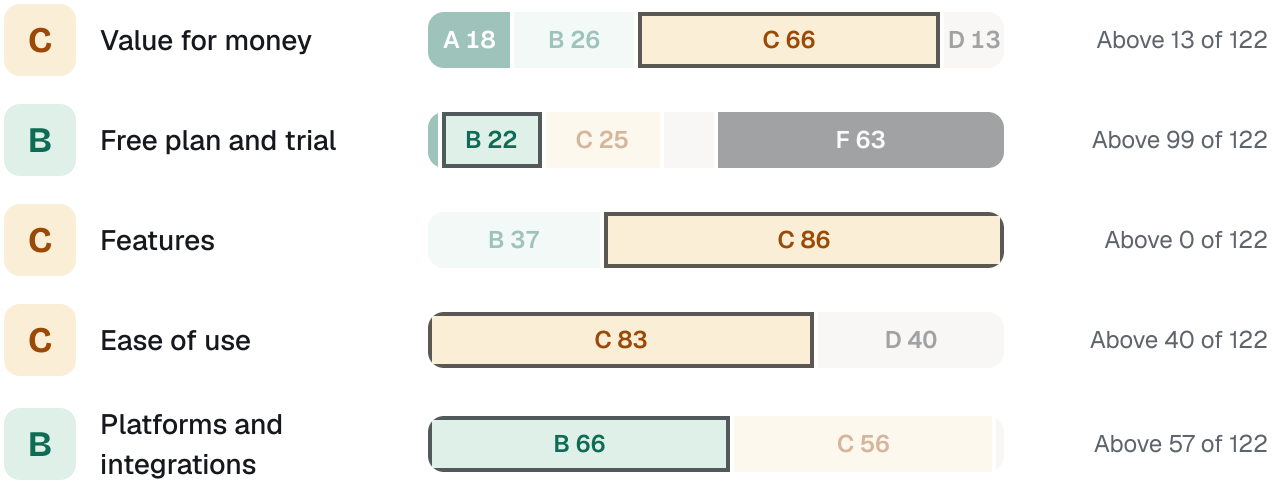

It stands best on free plan and trial (B, above 99 of 122) and worst on features (C, above 0).

Its paid plans start at $23 a month, against a middle price of $9.69 for the category: 85 of the 107 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 7 tools score higher and cost less.

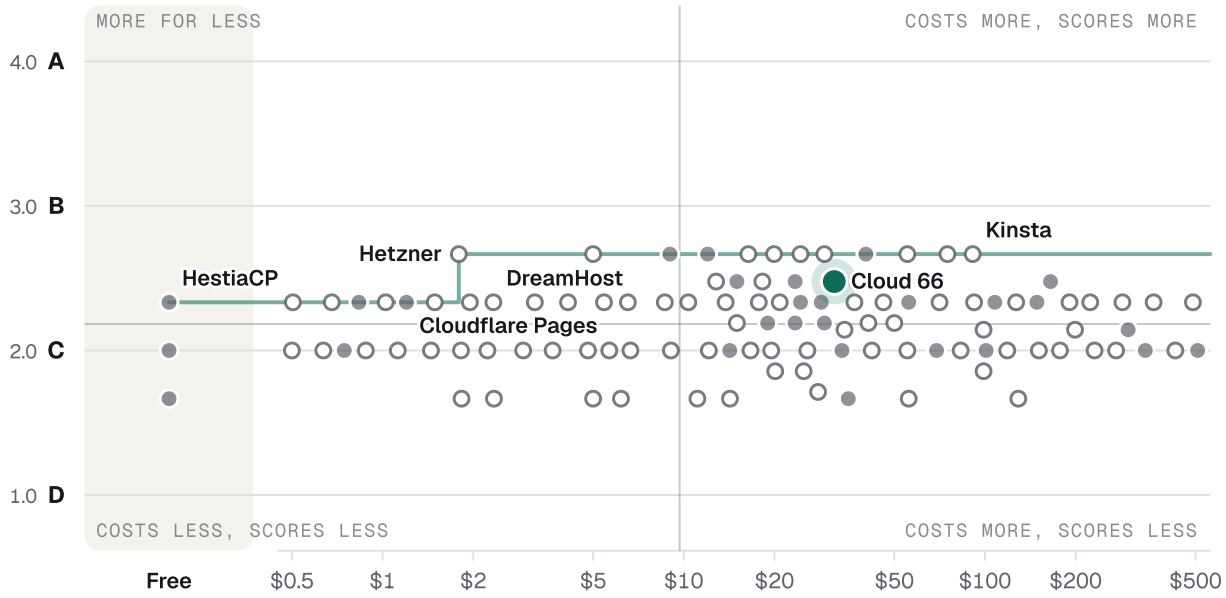

Each grade against the category

Every bar is all 123 web hosts we grade, cut by the letter each got. Cloud 66's own letter is outlined.

Price against what you get

Each dot is one of 111 web hosts. Further left costs less; higher up scores better on features, ease of use and platforms. Cloud 66 is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

Cloud 66 sits between: not beyond making, and not a weekend's work either.

What you would give up is listed below. Whether that is worth the price is your call. It costs $276 a year.

What you could make

- It runs in a browser, which is where something home-made would run too.

What you could not

- Databases with views, filters and links between them.

- It plugs into other products, AWS, Google Cloud and Azure among them, and has an API.
- What a company asks for before it lets staff use something: single sign-on and audit logs.

What this rests on. Cloud 66's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Laravel Forge, RunCloud, Heroku, Render and Coolify

The 5 tools Cloud 66 is most often weighed against, with where each one differs from it.

1.8 GPA

Laravel Forge

From $12/mo

Server management and deploys for Laravel, PHP and Node apps.

- Cloud 66 has a free plan. Laravel Forge does not.
- Cloud 66 also covers databases.
- Laravel Forge also covers workflow automation.

Cloud 66 and Laravel Forge compared in full

2.0 GPA

RunCloud

Free trial · from $9/mo

Web server control panel for PHP sites on your own cloud servers.

- Cloud 66 has a free plan. RunCloud does not, though it has a free trial.
- Cloud 66 also covers databases.
- RunCloud also covers page speed.

Cloud 66 and RunCloud compared in full

1.8 GPA

Heroku

From $5/mo

Platform for deploying apps in containers called dynos.

- Cloud 66 has a free plan. Heroku does not.

Cloud 66 and Heroku compared in full

R

2.4 GPA

Render

Free plan · from $25/mo

Cloud hosting for web services, databases and workers.

- Render also covers workflow automation.

Cloud 66 and Render compared in full

2.4 GPA

Coolify

Free plan · from $5/mo

Open-source platform to deploy apps and databases to your own servers.

- Coolify is open source and self-hostable, according to its own site.

Cloud 66 and Coolify compared in full

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

14

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Cloud 66 free?

Cloud 66 has a free plan. 1 deployment server and 1 static site, 5 deployments per 24 hours, 1 team member, no card required.

How much does Cloud 66 cost?

Cloud 66 lists 5 plans. Free: $0.

What platforms does Cloud 66 work on?

Cloud 66 is available on Web.

Does Cloud 66 offer any discounts?

Cloud 66 publicly lists the following: Save about 20% with annual billing; Startup and education pricing.

Does Cloud 66 have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Cloud 66 is listed for Web.

Does Cloud 66 have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Cloud 66 is listed for Web.

Is Cloud 66 open source?

Cloud 66 is not described as open source on its own site, as read on Nov 13, 2026.

Does Cloud 66 have an API?

Yes. Cloud 66 offers a public API, according to its own site.

What does Cloud 66 integrate with?

Cloud 66's listing names AWS, Google Cloud, Azure and Slack. A listing names up to eight integrations, so it may connect to more.

Who makes Cloud 66?

Cloud 66 is made by Cloud66, Inc. It dates from 2012.

What are the alternatives to Cloud 66?

The closest alternatives to Cloud 66 in our directory are Laravel Forge, RunCloud, Heroku, Render and Coolify.

How does Cloud 66 compare with other web hosts?

Cloud 66's GPA of 2.4 is higher than 99 of the 122 other web hosts we grade, and level with 14.

Is Cloud 66 good value for money?

ToolGPA grades Cloud 66 C for value for money. Its paid plans start at $23 a month, against a middle price of $9.69 for the category: 85 of the 107 others that charge start lower.

Could I make my own version of Cloud 66?

Cloud 66 sits between: not beyond making, and not a weekend's work either.

Where this guide comes from

The prices, plans, platforms and features were read from Cloud 66's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Cloud 66's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Cloud66, Inc. Prices change, so check cloud66.com before you buy.
