Welcome

What it is, who it suits, its grades and the ten things to know first

2.8

GPA, above 53 of the 54 other web hosts we grade

Cloudflare Pages builds and deploys sites from a Git repository or by direct upload, serving them from Cloudflare's network. Static asset requests are free and unlimited on every plan, and server-side code runs as Pages Functions billed as Workers requests. Cloudflare's own docs now say Workers supports most Pages use cases and that new projects should start there.

> **You connect a repo, set a build command and manage domains, so there's setup work.**

> From our grade for ease of use

To get you started, here are **9 things to know about Cloudflare Pages**, taken from its own pages and our grades.

1 **Best for static sites with free bandwidth**

Cloudflare Pages serves static sites with free, unlimited bandwidth on the free plan.

2 **Paid plans start at $5 a month**

As its pricing page puts it: $5 per month (Workers Paid, for Pages Functions usage).

3 There is a free plan

Unlimited static requests and bandwidth, 500 builds a month, 20,000 files per site, 100 projects, and Functions requests counted against 100,000 a day.

4 It runs on Web

Web.

5 Git and direct upload deploys

Each push to a connected GitHub or GitLab repository triggers a build, and sites can also be deployed by direct upload or the CLI.

6 Preview deployments

The limits page says projects can have an unlimited number of preview deployments active at once.

7 Pages Functions

Server-side code runs as Functions, with bindings to Workers KV and Durable Objects, and is billed as Workers requests.

8 A 2.8 GPA, above 53 of 54

That is against the other web hosts we grade, on value, the free plan, features, ease of use and platforms.

9 Your call

Cloudflare Pages sits between: not beyond making, and not a weekend's work either.

The report card

Best for static sites with free bandwidth

Cloudflare Pages serves static sites with free, unlimited bandwidth on the free plan. But Cloudflare's own docs recommend starting new projects on Workers, the free plan allows 500 builds a month, and dynamic code is billed through a Workers plan.

TOOLGPA REPORT CARD — **Cloudflare Pages** — Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	A	Free with no bandwidth charge for static requests, and the paid add-on is $5 a month, under the category's cheaper quarter of $5.28.
Free plan and trial	B	500 builds a month, 100 projects and unlimited preview deployments, one build at a time. One person can live on it; Functions are capped at 100,000 requests a day.
Features	C	Git and upload deploys, previews, Functions, rollbacks and a REST API. The gaps: docs point new projects to Workers, assets are capped at 25 MiB and dynamic apps aren't covered by the free allowance.
Ease of use	C	No store rating on record. You connect a repo, set a build command and manage domains, so there's setup work.
Platforms and integrations	B	Web only, but with GitHub, GitLab, Workers KV, Durable Objects, R2 and a REST API.

Grade point average — Good, out of 4.0 **2.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Cloudflare Pages is for

- ✓ Fits if you run static sites or front-end apps and want no bandwidth bill
- ✓ Works for people already using Cloudflare DNS and Workers

Who it is not for

- ✗ Skip it if you want a dynamic app on the free allowance, since Functions run on Workers billing
- ✗ Tight if you push often: 500 builds a month, one at a time, with a 20-minute build limit
- ✗ Not for you if a single file is over 25 MiB
- ✗ Watch out: Cloudflare recommends Workers for new projects, so Pages may not be where the work goes

Good to know

Good for

- ✓ Static sites and front-end apps that want free bandwidth
- ✓ Developers already using Cloudflare DNS and Workers
- ✓ Personal and small projects within the free build limits

Worth knowing

- ⓘ Cloudflare's docs say Workers supports most Pages use cases and recommend starting new projects on Workers.
- ⓘ The Free plan allows 500 builds a month, one at a time, with a 20-minute build timeout; Pro and Business raise this to 5,000 and 20,000.
- ⓘ A single site asset can be at most 25 MiB, and a Pages account is limited to 100 projects.
- ⓘ Functions usage is billed through a Workers plan, so dynamic apps are not covered by the free static allowance.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

Cloudflare Pages sits between: not beyond making, and not a weekend's work either.

What you would give up is listed below. Whether that is worth the price is your call. It costs $60 a year.

What you could make

- It runs in a browser, which is where something home-made would run too.

What you could not

- Speed tests run from real browsers on a schedule.

- It plugs into other products, GitHub, GitLab and Workers KV among them, and has an API.

What this rests on. Cloudflare Pages's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
