07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Coassemble's own pages, its app-store listings and our grades. Every fact in it is on Coassemble's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 45 of the 98 other course and community platforms we grade

Coassemble is a training platform built to be embedded in other products and internal systems. Teams author courses in a builder or through an API and AI agent, deliver them through embeddable components or SCORM export, and read completions back through webhooks. Plans are priced by yearly allowances of identified recipients, with unlimited course creators on every plan.

To get you started, here are **9 things to know about Coassemble**, taken from its own pages and our grades.

> "
>
> **A free sandbox lets developers try it first.**
>
> From our report card of Coassemble

1 **Best for embedding AI-built courses in your own product**

Coassemble is API-first course authoring that you embed in your own product, with SCORM export and AI generation.

2 **Paid plans start at $208.33 a month when paid by the year**

As its pricing page puts it: $2,500 per year, with a 12-month agreement.

3 **You can try it first**

Free sandbox with the full API and builder, at validation-level usage limits

4 **It runs on Web**

Web.

5 **Authoring with AI**

A block-based builder plus AI generation of courses from documents or a brief, quizzes, images and narration, all available through the API.

6 **Embeddable components**

Drop-in course player, card, list and builder components, with per-tenant themes and translations.

7 **REST API and webhooks**

Programmatic control of courses and collections, with completions and progress sent back through a tracking API and webhooks.

8 **A 2.2 GPA, above 45 of 98**

That is against the other course and community platforms we grade, on value, the free plan, features, ease of use and platforms.

9 **Your call**

You could make the core of Coassemble for yourself: online courses and reports.

The report card

Best for embedding AI-built courses in your own product

Coassemble is API-first course authoring that you embed in your own product, with SCORM export and AI generation. It starts at $2,500 a year on a 12-month agreement, priced by identified recipients, far above self-serve course tools. A free sandbox lets developers try it first.

TOOLGPA REPORT CARD

Coassemble

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	D	$2,500 a year on a 12-month agreement, about $208 a month, against the category's dearest tenth starting at $135. The monthly option costs $250 a month, or $3,000 over the year.
Free plan and trial	C	A free sandbox with the full API and builder, but at validation-level usage limits and not for real use.
Features	B	AI authoring, embeddable components, REST API and webhooks, SCORM and agent access. The listing names no gap in the core work, only a standalone offline SCORM add-on.
Ease of use	C	No store rating on record, and embedding it takes developer work.
Platforms and integrations	B	Web, with an API, webhooks and links to Slack, Google Drive, OneDrive, Notion, Confluence and Moodle.

Grade point average — Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Coassemble is for

- ✓ Fits if you build a product and want training embedded inside it
- ✓ Works for developers who want an API and webhooks around course content

Who it is not for

- ✗ Pricey if you are small: $2,500 a year is the entry price
- ✗ Not for you if you want a monthly plan, as the monthly option still needs a 12-month agreement
- ✗ Watch out: allowances are 600, 2,400 or 6,000 identified recipients a year
- ✗ Skip it if you want offline SCORM, which is a Partner add-on on request

Good to know

Good for

- ✓ Software companies embedding training inside their own product
- ✓ Agencies delivering courses under each client's brand
- ✓ Teams that want to generate and update courses through an API

Worth knowing

- ⓘ Priced by identified recipients a year (600, 2,400 or 6,000); the page calls the allowances soft, with no surprise cut-offs.
- ⓘ There is no per-seat charge, but the entry price is $2,500 a year, far above self-serve course tools.
- ⓘ The monthly option still needs a 12-month agreement: $250 a month equals $3,000 a year, against $2,500 paid yearly.
- ⓘ Standalone offline SCORM is a Partner add-on on request.

PART 02 · PRICING

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$208.33

A month to start, paid by the year

Coassemble is a paid product with a free trial, starting at $2,500 per year, with a 12-month agreement.

> **A free sandbox with the full API and builder, but at validation-level usage limits and not for real use.**
>
> From our grade for free plan and trial

BUILD

$2,500

per year, 12-month agreement ($250 per month billed monthly)

600 identified recipients a year, full API, webhooks, all embeddables, SCORM export and SOC 2 Type 2 documentation.

SCALE

$5,000

per year, 12-month agreement ($500 per month billed monthly)

2,400 identified recipients a year, plus priority support, a controlled-release server option and more AI generation.

PARTNER

$20,000

per year and up, 12-month agreement ($2,000 per month billed monthly)

6,000 identified recipients a year, dedicated or region-locked servers, self-hosting on request and an MSA.

Trying it first

Free sandbox with the full API and builder, at validation-level usage limits

Read from coassemble.com on Nov 13, 2026.

Ways to pay less

ANNUAL DISCOUNT

2 months free when paying yearly

Paying yearly saves two months: Build is $2,500 a year against $3,000 on the monthly basis over a 12-month agreement.

Stated on coassemble.com

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

API-first course authoring and embeddable training. Here is what it does, as its own site describes it, and what it covers: public API, AI features, reports, online courses.

> **AI authoring, embeddable components, REST API and webhooks, SCORM and agent access.**

From our grade for features

Authoring with AI

A block-based builder plus AI generation of courses from documents or a brief, quizzes, images and narration, all available through the API.

Embeddable components

Drop-in course player, card, list and builder components, with per-tenant themes and translations.

REST API and webhooks

Programmatic control of courses and collections, with completions and progress sent back through a tracking API and webhooks.

SCORM

SCORM 1.2 and 2004 export, import of existing SCORM courses and hosting of uploaded packages.

MCP and agent access

An MCP server lets Claude, Cursor or any MCP client author courses by prompt, with 50+ tools listed.

Hosting options

Multi-region hosting, with dedicated, region-locked (US, EU, UK, AU) or self-hosted setups on the Partner plan.

Coassemble is made by Coassemble, and has been around since 2015.

Where it stands

Its grades against its category, and whether to keep it or make your own

45/98

Other course and community platforms it is graded above

Coassemble's GPA of 2.2 is higher than 45 of the 98 other course and community platforms we grade, and level with 20.

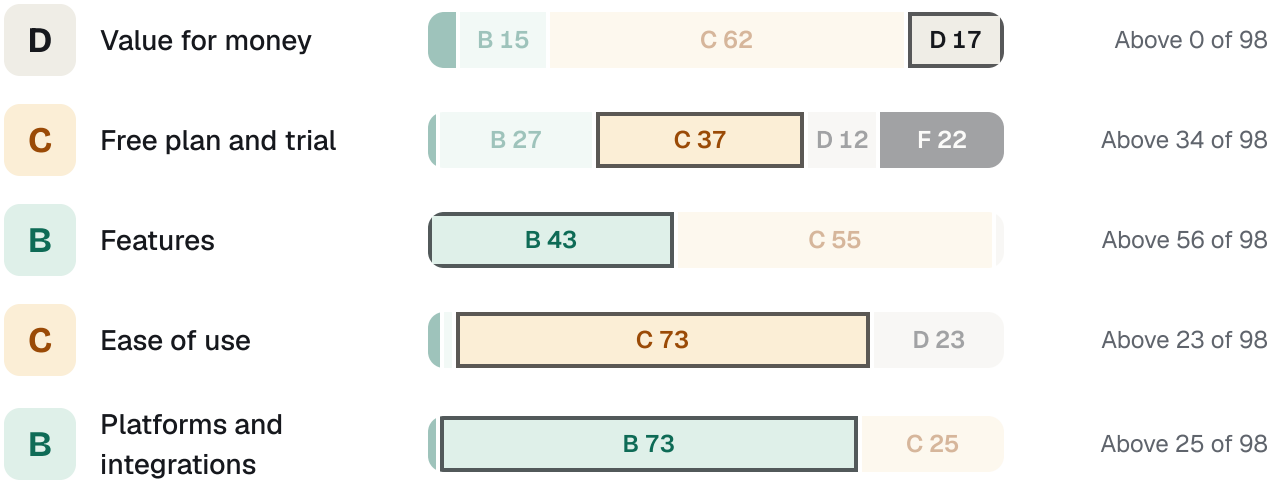

It stands best on features (B, above 56 of 98) and worst on value for money (D, above 0).

Its paid plans start at $208.33 a month when paid by the year, against a middle price of $36 for the category: 62 of the 65 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 3 tools score higher and cost less.

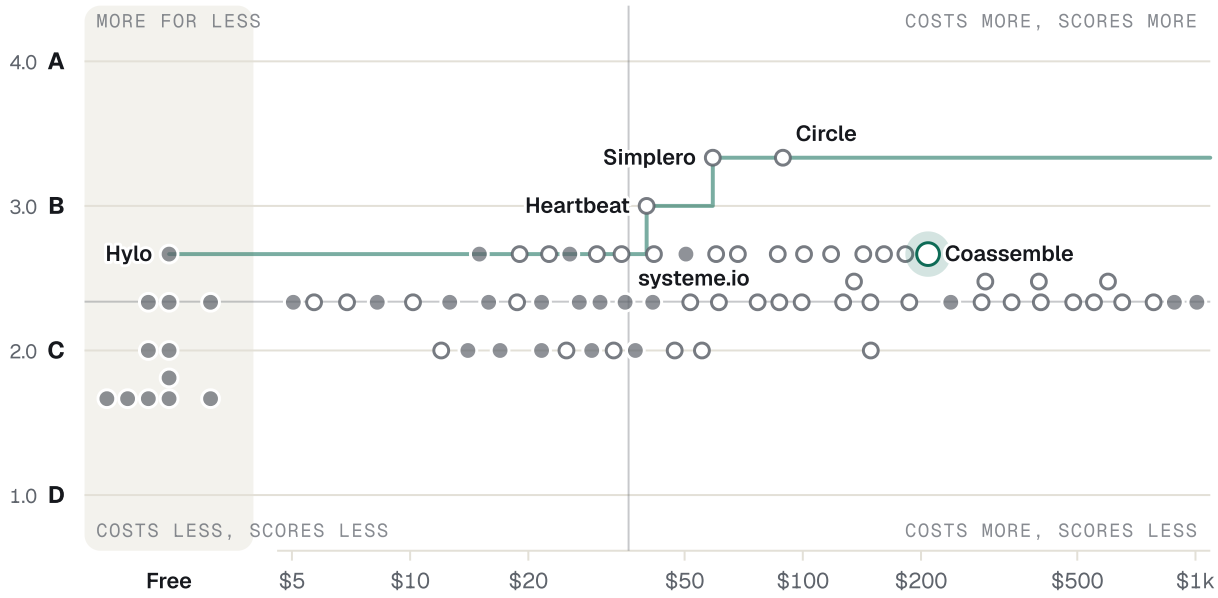

Each grade against the category

Every bar is all 99 course and community platforms we grade, cut by the letter each got. Coassemble's own letter is outlined.

Price against what you get

Each dot is one of 78 course and community platforms. Further left costs less; higher up scores better on features, ease of use and platforms. Coassemble is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

You could make the core of Coassemble for yourself: online courses and reports.

What you would give up is listed below. Whether that is worth the price is your call. It costs $2,500 a year.

What you could make

- Online courses and reports: an app builder makes these well.

What you could not

- ✕ It plugs into other products, Slack, Google Drive and OneDrive among them, and has an API.

- It runs in a browser, which is where something home-made would run too.

- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Coassemble's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Quick answers

The questions people ask about it, each answered in a line or two

14

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Coassemble free?

No, Coassemble is a paid product, but you can try it first. Free sandbox with the full API and builder, at validation-level usage limits.

How much does Coassemble cost?

Coassemble lists 3 plans. Build: $2,500 per year, 12-month agreement ($250 per month billed monthly).

What platforms does Coassemble work on?

Coassemble is available on Web.

Does Coassemble offer any discounts?

Coassemble publicly lists the following: 2 months free when paying yearly.

Does Coassemble have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Coassemble is listed for Web.

Does Coassemble have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Coassemble is listed for Web.

Is Coassemble open source?

Coassemble is not described as open source on its own site, as read on Nov 13, 2026.

Does Coassemble have an API?

Yes. Coassemble offers a public API, according to its own site.

What does Coassemble integrate with?

Coassemble's listing names Slack, Google Drive, OneDrive, Notion, Confluence and Moodle.

Who makes Coassemble?

Coassemble is made by a company of the same name. It dates from 2015.

What are the alternatives to Coassemble?

The closest alternatives to Coassemble in our directory are Easygenerator, iSpring Learn, TalentLMS, LearnUpon and Docebo.

How does Coassemble compare with other course and community platforms?

Coassemble's GPA of 2.2 is higher than 45 of the 98 other course and community platforms we grade, and level with 20.

Is Coassemble good value for money?

ToolGPA grades Coassemble D for value for money. Its paid plans start at $208.33 a month when paid by the year, against a middle price of $36 for the category: 62 of the 65 others that charge start lower.

Could I make my own version of Coassemble?

You could make the core of Coassemble for yourself: online courses and reports.

Where this guide comes from

The prices, plans, platforms and features were read from Coassemble's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Coassemble's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Coassemble. Prices change, so check coassemble.com before you buy.
