Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 51 of the 89 other AI app builders we grade

CodeDesign.ai generates a complete, editable website from one prompt and lets users keep editing in a drag-and-drop visual builder or with an AI assistant. Sites are hosted by the vendor and can be exported as HTML or React. Plans are sold monthly or yearly, with AI credits that are used up by each AI edit, and a set of lifetime deals is sold beside them.

> From our grade for ease of use

To get you started, here are **9 things to know about CodeDesign**, taken from its own pages and our grades.

1 **Best for a business website from one prompt**

CodeDesign.ai makes a full website from one prompt, then you edit it in a drag-and-drop builder or with an AI assistant, and export HTML or React.

2 **Paid plans start at $12 a month**

As its pricing page puts it: $12 per month, billed yearly ($15 billed monthly).

3 **There is a free plan**

Up to 3 AI website generations, the visual builder and publishing on a codedesign.app subdomain.

4 **It runs on Web**

Web.

5 **Prompt-to-website generation**

A complete multi-page site is generated from one prompt, in many languages, and can then be edited by hand or with the AI companion.

6 **Visual builder**

A drag-and-drop, responsive editor with templates, ready-made sections and animations; the site lists 2000+ templates.

7 **Code export**

Sites can be exported as HTML and React, and a WordPress site can be generated and synced.

8 **A 2.4 GPA, above 51 of 89**

That is against the other AI app builders we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace CodeDesign you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for a business website from one prompt

CodeDesign.ai makes a full website from one prompt, then you edit it in a drag-and-drop builder or with an AI assistant, and export HTML or React. But it builds websites, not apps with a backend, free sites sit on a codedesign.app subdomain, and the pricing page says MYR while showing dollar signs.

TOOLGPA REPORT CARD

CodeDesign

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	B	Individual is $12 a month yearly, $15 monthly, inside the cheapest quarter of the $15 to $25 range. Lifetime plans start at $97 one-time for one site.
Free plan and trial	C	Free gives up to 3 AI website generations, the visual builder and a codedesign.app subdomain. A custom domain needs a paid licence.
Features	C	Prompt-to-site, a visual builder, code export, hosting and business tools. The listing itself says it builds websites rather than full-stack apps.
Ease of use	C	A web builder where the work is shaping the site yourself. No store rating on record.
Platforms and integrations	B	Web with WordPress, Stripe, ChatGPT, Claude and Cursor named, plus HTML and React export.

Grade point average Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who CodeDesign is for

- ✓ Fits if you want a small business website without writing code
- ✓ Works for people who prefer one payment, as lifetime plans exist

Who it is not for

- ✗ Skip it if you want an app with logins and a database, as it builds websites
- ✗ Tight if you stay free: 3 AI generations and a codedesign.app address
- ✗ Watch out: the pricing page says its prices are in MYR but shows dollar signs
- ✗ Watch out: credits are used by each AI edit, and the table lists 100 a month on every paid plan

Good to know

Good for

- ✓ Freelancers and small businesses that need a marketing site or landing page
- ✓ Agencies producing client sites they can host or export
- ✓ Buyers who prefer a one-time lifetime plan to a subscription

Worth knowing

- ⓘ It builds websites rather than full-stack apps with their own backend.
- ⓘ The pricing page text says its prices are in MYR but displays dollar signs; the figures here are as displayed.
- ⓘ Free-plan sites are published on a codedesign.app subdomain, and a custom domain needs a license on a paid plan.
- ⓘ AI credits are used up by each AI edit; the comparison table lists 100 credits a month on every paid plan, and more can be bought.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

51/89

Other AI app builders it is graded above

CodeDesign's GPA of 2.4 is higher than 51 of the 89 other AI app builders we grade, and level with 15.

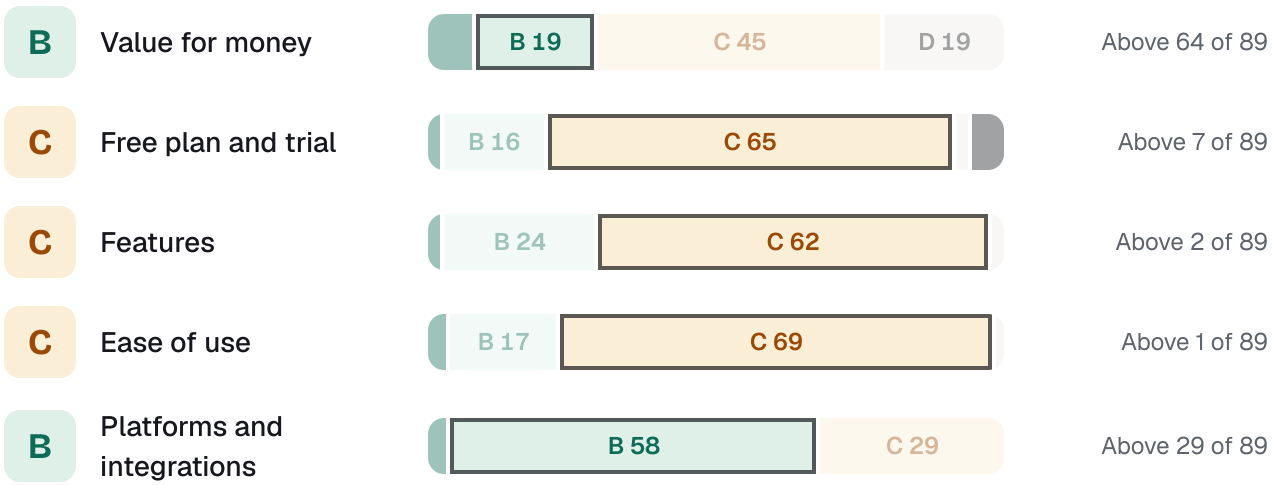

It stands best on value for money (B, above 64 of 89) and worst on ease of use (C, above 1).

Its paid plans start at $12 a month, against a middle price of $20 for the category: 14 of the 82 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 6 tools score higher and cost less.

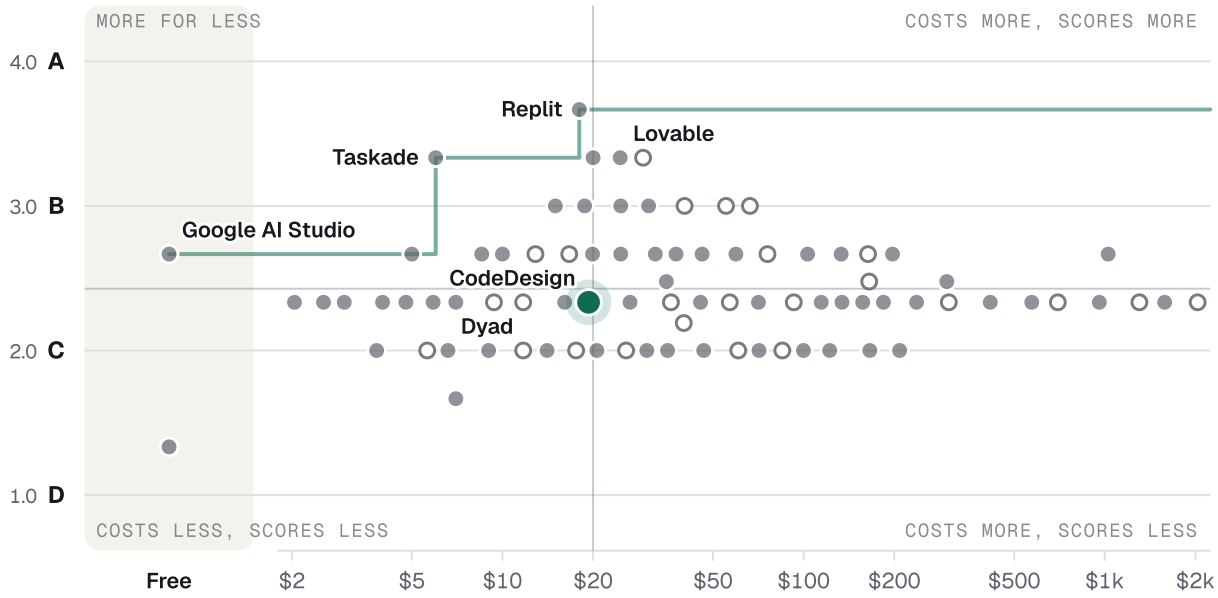

Each grade against the category

Every bar is all 90 AI app builders we grade, cut by the letter each got. CodeDesign's own letter is outlined.

Price against what you get

Each dot is one of 85 AI app builders. Further left costs less; higher up scores better on features, ease of use and platforms. CodeDesign is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace CodeDesign you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

It costs $144 a year.

What you could make

- Forms: an app builder makes this well.

What you could not

- A tool that builds and hosts other apps.

- A builder that other people can use without writing code.
- A chatbot builder hooked into the messaging apps.
- A crawler that checks every page of a site.
- It plugs into other products, WordPress, Stripe and ChatGPT among them.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. CodeDesign's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
